## CAUTION

**RISK OF ELECTRIC SHOCK  
DO NOT OPEN**

**CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK DO NOT REMOVE COVER. NO USER SERVICABLE PARTS INSIDE.**

**REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.**

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the products' enclosure that may be of sufficient magnitude to constitute a risk of electric shock.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

**WARNING: TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS UNIT TO RAIN OR MOISTURE.**

**CAUTION: TO PREVENT ELECTRIC SHOCK, MATCH WIDE BLADE OF THE PLUG TO THE WIDE SLOT AND FULLY INSERT.**

**NEED HELP?**

**CONTACT US FIRST**

**DO NOT RETURN THIS PRODUCT TO THE STORE**

**Please make sure to register your product at [www.lorextechnology.com](http://www.lorextechnology.com) to receive product updates and technical support.**

# Important Safeguards

In addition to the careful attention devoted to quality standards in the manufacture process of your product, safety is a major factor in the design of every instrument. However, safety is your responsibility too. This sheet lists important information that will help to ensure your enjoyment and proper use of the product and accessory equipment. Please read them carefully before operating and using your product.

## General Precautions

1. All warnings and instructions in this manual should be followed.
2. Remove the plug from the outlet before cleaning. Do not use liquid aerosol detergents. Use a water-dampened cloth for cleaning.
3. Do not use this product in humid or wet places.
4. Keep enough space around the product for ventilation. Slots and openings in the storage cabinet should not be blocked.
5. It is highly recommended to connect the product to a surge protector to protect from damage caused by electrical surges. It is also recommended to connect the product to an uninterruptible power supply (UPS), which has an internal battery that will keep the product running in the event of a power outage.

## Installation

1. **Read and Follow Instructions** - All the safety and operating instructions should be read before the product is operated. Follow all operating instructions.
2. **Retain Instructions** - The safety and operating instructions should be retained for future reference.
3. **Heed Warnings** - Comply with all warnings on the product and in the operating instructions.
4. **Polarization** - Do not defeat the safety purpose of the polarized or grounding-type plug.  

A polarized plug has two blades with one wider than the other.

A grounding type plug has two blades and a third grounding prong.

The wide blade or the third prong are provided for your safety.

If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
5. **Power Sources** - This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied to your location, consult your video dealer or local power company. For products intended to operate from battery power, or other sources, refer to the operating instructions.

6. **Overloading** - Do not overload wall outlets or extension cords as this can result in the risk of fire or electric shock. Overloaded AC outlets, extension cords, frayed power cords, damaged or cracked wire insulation, and broken plugs are dangerous. They may result in a shock or fire hazard. Periodically examine the cord, and if its appearance indicates damage or deteriorated insulation, have it replaced by your service technician.
7. **Power-Cord Protection** - Power supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them. Pay particular attention to cords at plugs, convenience receptacles, and the point where they exit from the product.
8. **Surge Protectors** - It is highly recommended that the product be connected to a surge protector. Doing so will protect the product from damage caused by power surges. Surge protectors should bear the UL listing mark or CSA certification mark.
9. **Uninterruptible Power Supplies (UPS)** - Because this product is designed for continuous, 24/7 operation, it is recommended that you connect the product to an uninterruptible power supply. An uninterruptible power supply has an internal battery that will keep the product running in the event of a power outage. Uninterruptible power supplies should bear the UL listing mark or CSA certification mark.

**Caution:** Maintain electrical safety. Power line operated equipment or accessories connected to this product should bear the UL listing mark or CSA certification mark on the accessory itself and should not be modified so as to defeat the safety features. This will help avoid any potential hazard from electrical shock or fire. If in doubt, contact qualified service personnel.

## *Installation (Continued)*

10. **Ventilation** - Slots and openings in the case are provided for ventilation to ensure reliable operation of the product and to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should never be placed near or over a radiator or heat register. This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided and the product manufacturer's instructions have been followed.
11. **Attachments** - Do not use attachments unless recommended by the product manufacturer as they may cause a hazard.
12. **Water and Moisture** - Do not use this product near water — for example, near a bath tub, wash bowl, kitchen sink or laundry tub, in a wet basement, near a swimming pool and the like.
13. **Heat** - The product should be situated away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.
14. **Accessories** - Do not place this product on an unstable cart, stand, tripod, or table. The product may fall, causing serious damage to the product. Use this product only with a cart, stand, tripod, bracket, or table recommended by the manufacturer or sold with the product. Any mounting of the product should follow the manufacturer's instructions and use a mounting accessory recommended by the manufacturer.
15. **Camera Extension Cables** - Check the rating of your extension cable(s) to verify compliance with your local authority regulations prior to installation.
16. **Mounting** - The cameras provided with this system should be mounted only as instructed in this guide or the instructions that came with your cameras, using the provided mounting brackets.
17. **Camera Installation** - Cameras are not intended for submersion in water. Not all cameras can be installed outdoors. Check your camera environmental rating to confirm if they can be installed outdoors. When installing cameras outdoors, installation in a sheltered area is required.

## *Service*

1. **Servicing** - Do not attempt to service this product yourself, as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.
2. **Conditions Requiring Service** - Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
  - A. When the power supply cord or plug is damaged.
  - B. If liquid has been spilled or objects have fallen into the product.
  - C. If the product has been exposed to rain or water.
  - D. If the product has been dropped or the cabinet has been damaged.
  - E. If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions. Improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to its normal operation.
  - F. When the product exhibits a distinct change in performance. This indicates a need for service.
7. **Replacement Parts** - When replacement parts are required, have the service technician verify that the replacements used have the same safety characteristics as the original parts. Use of replacements specified by the product manufacturer can prevent fire, electric shock, or other hazards.
8. **Safety Check** - Upon completion of any service or repairs to this product, ask the service technician to perform safety checks recommended by the manufacturer to determine that the product is in safe operating condition.

## *Use*

1. **Cleaning** - Unplug the product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
2. **Product and Cart Combination** - When product is installed on a cart, product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the product and cart combination to overturn.
3. **Object and Liquid Entry** - Never push objects of any kind into this product through openings as they may touch dangerous voltage points or "short-out" parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.
4. **Lightning** - For added protection of this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the product due to lightning and power line surges.

## NOTICES

### FCC/IC Notice:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception (which can be determined by turning the equipment on and off), the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio or television technician for assistance

### Modification:

Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the device.

Toute modification non approuvée explicitement par le fournisseur de licence de l'appareil peut entraîner l'annulation du droit de l'utilisateur à utiliser l'appareil.

### RoHS:

This product is fully compliant with the European Union Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment ("RoHS") Directive (2002/95/EC). The RoHS directive prohibits the sale of electronic equipment containing certain hazardous substances such as lead, cadmium, mercury, and hexavalent chromium, PBB, and PBDE in the European Union.

This product has been certified and found to comply with the limits regulated by FCC, EMC, and LVD. Therefore, it is designated to provide reasonable protection against interference and will not cause interference with other appliance usage.

However, it is imperative that the user follows the guidelines in this manual to avoid improper usage, which may result in damage to the product, electrical shock and fire hazard injury.

In order to improve the features, functions, and quality of this product, the specifications are subject to change without notice from time to time.

# Features

## Digital Video Recorder Features

- HD-SDI full HD 1080p (1920x1080)<sup>1</sup>
- Real-time recording (30 fps per channel)
- Digital Zoom in live view & playback
- Dual streaming to conserve bandwidth<sup>2</sup>
- Pentaplex operation - View, Record, Playback, Backup & Remotely control the system simultaneously
- 24x7 100% duty cycle HDD preinstalled. Supports 2 HDD (expandable up to 8TB)
- HDMI Output for convenient connection to HD TVs or monitor

## Connectivity Features<sup>3</sup>

- Remote Viewing on PC, Mac, smartphone & tablet<sup>4</sup>
- LOREX Stratus Solution - Quick & simple Internet *cloud connectivity*
- Instant e-mail alerts with snap shot attachments

- 
1. High-Definition Serial Digital Interface (HD-SDI) uncompressed high definition broadcast-grade video over standard coax cable. Recording time may vary based on recording resolution, quality, lighting conditions and movement in the scene.
  2. HD video streaming locally to the DVR. Optimized lower resolution steaming for mobile devices. Mobile connectivity is dependent on bandwidth and resolution of the mobile device.
  3. Requires a high speed internet connection and a router (not included). An upload speed of 1Mbps is recommended for the best video performance. Up to 3 devices may connect to the system at the same time.
  4. Smart Phone & Tablet Compatibility: iPad®, iPhone®, Android (version 2.2 & above). Mobile phone data plan is required (not included). For the latest compatibility list check [www.lorextechnology.com](http://www.lorextechnology.com) as new models become available in the market.

# Getting Started

The system comes with the following components:

**DVR (DIGITAL VIDEO RECORDER)**

**12V DC POWER SUPPLY**  
(may not be exactly as shown)

**REMOTE CONTROL**  
(may not be exactly as shown)

**USB MOUSE**

**ETHERNET CABLE**

**HDMI CABLE**

**QUICKSTART GUIDES  
DOCUMENTATION CD**

HARD DRIVE SIZE, NUMBER OF CHANNELS, AND CAMERA CONFIGURATION MAY VARY BY MODEL. PLEASE REFER TO YOUR PACKAGE FOR SPECIFIC DETAILS.  
CHECK YOUR PACKAGE TO CONFIRM THAT YOU HAVE RECEIVED THE COMPLETE SYSTEM, INCLUDING ALL COMPONENTS SHOWN ABOVE.

# Front Panel

## 1 IR Sensor: IR receiver for the remote control.

### LED Indicators:

- **PWR**: Power LED.
- **HDD**: Hard disk activity LED.

## 2 Menu & Playback Controls:

- **⏮**: In Playback Mode, press to rewind. Press repeatedly to increase rewind speed.
- **▶ ||**: In Playback Mode, press to play / pause video.
  - In Viewing mode, press to open Search Menu to select playback time.
- **⏭**: In Playback Mode, press to fast forward. Press repeatedly to increase fast forward speed.
- **■**: In Playback Mode, press to stop video playback.
  - In Live Viewing Mode, press to stop DVR recording. Password required; does not override scheduled recording.
  - Press and hold for 15 seconds to reset the DVR to the default resolution. DVR will reboot.
- **●**: Press to stop / resume recording. When the channel displays a red box with the letter "C", the channel is recording.
- **Menu / Esc**: Opens the system menu. In menus, press to go back / exit menus.

## 3 Channel Controls:

- **Ch1 ~ Ch9**: Press to view channel in Full-screen View.
- To access channels 10 and greater: Press **0** for channel 10 or 1+0 for channel 10, 1+1 for channel 11, 1+2 for channel 12, etc.
- **⏶**: In Live Viewing Mode, press repeatedly to switch between Split-screen Viewing modes.

---

#### 4 **Navigation Buttons:**

- ▲: Press to move cursor up.
- ▼: Press to move cursor down.
- ◀: Press to move cursor left.
- ▶: Press to move cursor right.

#### 5 **PTZ/ :**

- Within system menus, press to confirm a selection.
- In Live Viewing Mode, press to open the System Information window.
- In Live Viewing Mode, press and hold for 6 seconds to open the PTZ menu.

#### 6 **USB Port:** Connect a USB mouse (included) or USB flash drive (not included) for data backup or firmware updates.

# Rear Panel

## 4-Channel

## 8-Channel

- 1 HD SDI Video Input:** Connect HD-SDI cameras.
- 2 eSATA:** Connect a self-powered eSATA external hard drive (not included) for data backup.
- 3 IR-EXT:** Service only; not supported.
- 4 Audio Input:** RCA inputs for audio-enabled cameras (not included) or self-powered microphones (not included).
- 5 PTZ / Alarm Block:** Connect compatible PTZ cameras (not included) or alarm devices (not included).
- 6 VGA:** Connect a VGA monitor (not included) to view the system interface.
- 7 On / Off Switch:** Turns the DVR on or off.
- 8 Audio Output:** Output for 1 audio channel (e.g. speakers).
- 9 HDMI:** Connect to a HDMI-compatible TV or monitor (not included) to view the system interface.
- 10 LAN:** Connect a CAT 5 RJ45 Ethernet cable for local and remote connectivity.
- 11 USB Port:** Connect a USB mouse (included) or USB flash drive (not included) for data backup or firmware updates.
- 12 DC12V:** Connect the included AC power adapter.

# Basic Setup

## Step 1: Connect the HD-SDI Cameras

- Connect the HD-SDI cameras to the **HD SDI Video Input** ports on the rear panel of the DVR. For details, see “Connecting Cameras” on page 9.

8-channel model shown

Push and twist the BNC connector clockwise to secure it to the BNC port.

**NOTE:** Make sure to include some slack in the extension cable on both ends when connecting cameras to the DVR. Strip lines may appear in the image if the cable is too tight.

## Step 2: Connect the Mouse

- Connect a USB mouse (included) to one of the **USB** ports.

8-channel model shown

USB port

## Step 3: Connect the Ethernet Cable

- Connect an ethernet cable (included) to the **LAN** port on the rear panel of the DVR. Connect the other end of the ethernet cable to a router on your network.

8-channel model shown

LAN port

Connect ethernet cable

## Step 4: Connect the Monitor

- Connect the included HDMI cable from the **HDMI** port to the TV or monitor (recommended) **OR**;
- Connect a VGA cable (not included) from the **VGA** port to the monitor.

8-channel model shown

## Step 5: Connect the Power Adapter and Power on the DVR

- Connect the included power adapter to the **DC 12V** port. Connect the end of the power adapter to a wall socket or a surge protector.
- Turn the power switch to **I** to turn on the DVR. At startup, the system performs a basic system check and runs an initial loading sequence. After a few moments, the system loads a live display view.

8-channel model shown

## Step 6: Upgrade Firmware to Latest Version (if Available)

If a firmware upgrade is available, you will be asked to install it once the DVR starts up. **It is required to upgrade your system to the latest firmware version to enable remote connection to the system.**

**If a firmware upgrade is available:**

- 1 After startup, a notification will appear asking you to upgrade the firmware. Click **Yes** to upgrade.

- 2 Enter the system user name (default: **admin**) and password (default: **000000**) and click **Apply**. Wait for the firmware update to complete. The system will restart once the firmware has been upgraded.

**DO NOT POWER OFF THE UNIT OR DISCONNECT THE POWER CABLE DURING FIRMWARE INSTALLATION**

## Step 7: Verify Camera Image

- Power on the cameras, and then verify the camera video quality before mounting the cameras to a permanent location.
- Mount the cameras under a sheltered location. Always verify the outdoor rating of your camera before installing it in a permanent location.

## Step 8: Set the Time

- Set the system time and date for accurate video time stamps. Videos with inaccurate times may not be valid as surveillance evidence.
- For details on setting the system time, see “Setting the Date and Time” on page 18.

## Default System Password & Port Numbers

By default, the system user name is **admin** and the password is **000000**. It is recommended that you create your own password. For details, see “Managing Passwords” on page 30.

- The system requires a user name and password to log in to the system **remotely** using a computer or mobile device. After logging on remotely the first time, you will be asked to create a custom password for the system.

### Local DVR and remote connectivity (LAN & Internet) user name and password:

- Username: **admin** / Password: **000000**

### Default ports for DDNS remote access:

- Port **80** (HTTP port)
- Port **9000** (Client port)

## Lorex Stratus Connectivity

This system features the exclusive Lorex Stratus connectivity service. This is a cloud connectivity service that allows you to connect to your system over the Internet via a secure handshake with Lorex’s Stratus servers. This means you can easily connect to your system without requiring any network configuration.

For details on setting up your system to connect to the Internet using the Stratus service:

- See “Connecting to Your DVR Over the Internet on PC or Mac” on page 53.
- OR**
- See “Mobile Apps: Accessing your DVR Using a Mobile Device” on page 80.

Connectivity using Lorex’s free DDNS service is also available, but requires the ports listed above to be port forwarded on your router.

## Quick Access to System Information

- To quickly open a window that displays vital system information, press the **PTZ** /  button on the front panel of the system.

## Connecting Cameras

**ATTENTION:** This DVR is only compatible with 1080P HD-SDI cameras; regular BNC cameras will not work. Cameras differ in terms of installation or mounting instructions. Please see the documentation that came with your camera(s) for specific installation instructions.

### About HD-SDI

HD-SDI is a standard for transmitting un-compressed, high definition video along high-grade coaxial cables (such as RG59). It uses digital signals that carry large amounts of information (over 1Gbit/second).

Because HD-SDI video systems use digital signals, they are incompatible with traditional cameras and DVRs, which transmit video using analog signals, that are commonly used in video surveillance applications. This means that you cannot use non-HD-SDI security cameras with an HD-SDI DVR, and you cannot use HD-SDI cameras with a non-HD-SDI DVR.

### Installation Warnings

- Use the included extension cables or visit [www.lorextechnology.com](http://www.lorextechnology.com) for compatible RG59 extension cables.
- The extension cable must be a single stretch of cable between the DVR and camera. You cannot connect multiple extension cables to each other.
- You may only use 1080P HD-SDI cameras with the system. 720P HD-SDI cameras will not work with the system.

### Installation Tips

- Mount the camera where the lens is away from direct and intense sunlight.
- Plan your cable wiring so that it does not interfere with power lines or telephone lines.
- Ensure that the camera wiring is not exposed or easily cut.
- Mount the camera in an area that is visible, but out of reach.
- Avoid pointing the camera at a glass window to see outside, as this may result in a poor image caused by glare from indoor / outdoor lighting conditions.
- Adjust the camera angle so that it covers an area with high traffic.
- In "high-risk" locations, have multiple cameras point in the same area. This provides camera redundancy if a vandal attempts to damage the camera.

### Installing Cameras

Test the cameras before permanent installation. Plan where you will route the wiring for the camera and where you will aim the camera.

#### To install cameras:

- 1 Mount the camera(s) to the desired mounting surface according to the instructions that came with the camera(s). Choose a firm mounting surface.

**NOTE:** If you wish to mount cameras to drywall, it is recommended to use drywall plugs (not included).

- 2 Adjust the camera stand to ensure that the camera has a satisfactory view of the area you would like to monitor. Stand configuration depends on the mounting surface you have chosen (see below for suggested stand configurations).

Table Mount

Wall Mount

Ceiling Mount

Camera model not be exactly as shown

## Connecting HD-SDI Cameras to your DVR

- 1 Connect the BNC connector on the camera to the RG59 extension cable.
- 2 Connect the male power connector on the RG59 extension cable to the female power connector on the camera.
- 3 Connect the BNC connector on the other end of the RG59 extension cable to one of the **CAMERA INPUTS** ports on the rear panel of the DVR.

**NOTE:** Make sure to include some slack on the extension cable at both ends when connecting the camera to the DVR. Strip lines may appear in the image if the cable is too tight.

- 4 Connect the female power connector on the RG59 extension cable to the power adapter.
- 5 Plug the camera power adapter to a power outlet.

## Camera Connection Diagram

To Camera:

Male power connector

To Digital Video Recorder:  
(8-channel model shown)

Female power connector

## Connecting and Removing BNC Cables

BNC (Bayonet Nut Connector) is a special connector that locks on to the system port and cannot be accidentally removed.

### To connect or remove a BNC connector:

- Push the BNC connector firmly into the BNC port and simultaneously twist the connector clockwise to tighten.
- To remove a BNC connector from a BNC port, push and simultaneously twist the connector counter-clockwise to loosen the BNC connector.

# Mouse Control

The DVR is designed for mouse navigation. To use a USB mouse (included), connect the mouse to a **USB** port on the DVR.

8-channel model shown

## 1 Use the mouse buttons to perform the following:

- **Left-Button:** Click to select a menu option. During live viewing in Split-screen View, double-click on a channel to view the selected channel in full-screen; double-click the channel again to return to Split-screen View.

## 2 Right-Button:

- Click to open the Menu Bar (see “Using the Menu Bar” on page 14).
- In menus, use the right-button to go back / exit menus.

## 3 Scroll-Wheel: No function.

# Remote Control

You can also control the DVR using the included remote control.

- 1 **REC:** Press to resume recording after recording has been stopped.
  - **SEARCH:** Press to open the Search menu.
  - **Number Keys (1-0):** In Live Viewing Mode, press to open the desired channel in Full-screen view.
  - **Display Mode:** In Live Viewing Mode, press repeatedly to switch through split-screen viewing modes.
  - **2x2 / 3x3 / 4x4:** In Live Viewing Mode, press to open the corresponding Split-screen View. Press repeatedly to change channels shown in split-screen.
  - **AUTO:** Press to start / stop Sequence Mode.

- 2 **Navigation Cursors:** Press to navigate menus.
  - **ENTER:** In menus, press to confirm selections.
    - In Live Viewing Mode, press to access System Information.

- 3 **MENU/ESC:** Press to open the system menu. In menus, press to go back / exit menu.
  - **MUTE:** In Live Viewing and Playback Modes, press to mute / un-mute audio.
  - **PIP:** In Live Viewing Mode, press once to open Picture in Picture (PIP) 1X1 or twice to open PIP 1X2. Mouse is required to change channels shown in PIP.

- 4 **Playback Controls:**
  - **FWD:** In Playback Mode, press to fast forward / increase fast forward speed.
  - **REW:** In Playback Mode, press to rewind / increase rewind speed.
  - **PLAY:** In Playback Mode, press to play / pause video.
    - In Live Viewing Mode, press to open the Record Search Menu.
  - **STOP:** In Playback Mode, press to pause playback.
    - In Live Viewing Mode, press to stop recording. Password required; does not override scheduled recording.
  - **SLOW:** In Playback Mode, press to play video in slow motion. Press repeatedly to change slow motion playback speed.
  - **PAUSE/FRAME:** In Playback Mode, press to pause. Press repeatedly to view recordings frame by frame.

## 5 PTZ Controls:

- **Z+/Z-** : Adjust camera Zoom.
- **F+/F-** : Adjust camera Focus.
- **I+/I-** : Adjust camera Iris.
- **PTZ**: Opens the PTZ menu.

## Using the On-Screen Display

Use the system's graphical on-screen display to navigate menus and configure options and settings.

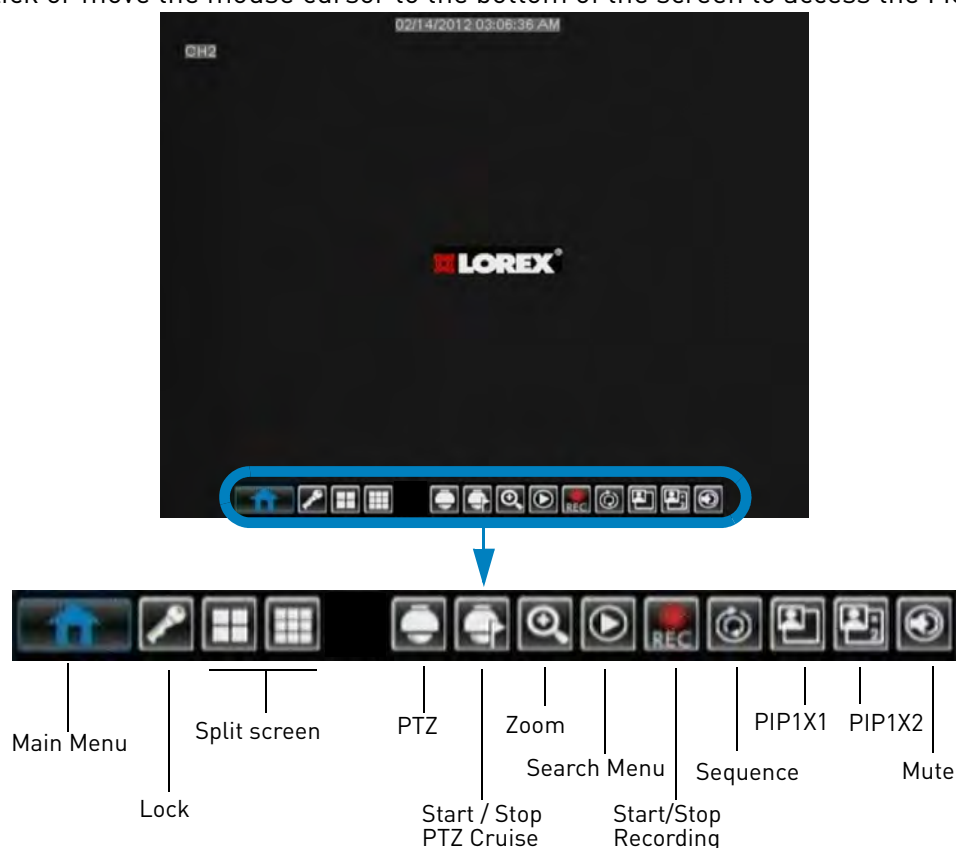

- 1 Date & Time:** Displays the date and time on the system
- 2 Record Status:** Displays the current recording status of the system: **C**=continuous (normal recording); **M**=motion recording; **A**=alarm recording.
- 3 Channel number / Channel title:** Displays channel number or channel title. To rename the channel number to a title, see "Configuring Custom Channel Names" on page 34.

## Using the Menu Bar

The Menu Bar allows you to access the Main Menu and control basic functions of the DVR.

### To access the Menu Bar:

- 1 Right-click or move the mouse cursor to the bottom of the screen to access the Menu Bar.

### Menu Bar Icons

- **Main Menu:** Opens the Main Menu.
- **Lock:** Click to Lock the Main Menu unless the password is entered. Lock icon is not visible unless passwords are enabled.
- **Split Screen buttons:** View the DVR in 4-way or 9-way (8-channel models only) Split-screen Mode.
- **PTZ:** Opens the PTZ controls.
- **Start / Stop PTZ Cruise:** Start or stop the PTZ cruise function.
- **Zoom:** Opens digital zoom. Must be in Full-screen / Live Viewing Mode.
- **Record Search:** Opens the DVR Search Menu. This allows you to search for video recorded on the DVR.
- **Start/Stop Recording:** Start or stop DVR recording on all channels. Password required; does not override scheduled recording.
- **Start/Stop SEQ:** Start or stop Sequence Mode. In Sequence Mode, DVR automatically switches between channels every few seconds.
- **PIP 1X1:** Enable Picture in Picture Mode with 1 camera in full screen and 1 in a small window.
- **PIP 1X2:** Enable Picture in Picture Mode with 1 camera in full screen and 2 in small windows.
- **Mute:** Mute/unmute the DVR volume (audio-capable cameras required, not included).

## Using the Virtual Keyboard and Mini-Keyboard

You can input numeric or text values using the on-screen virtual keyboard. You will need to use the Virtual Keyboard when entering your User ID and Password. The Virtual Mini-Keyboard is used to input numeric values, such as the time and date.

### To use the Virtual Keyboard:

- 1 Using the mouse, click on an option or field, such as the User ID and Password fields (if passwords are enabled).
  - The Virtual Keyboard opens.

Virtual Keyboard

- Click **Shift** to switch between upper and lowercase letters.
- Click ◀ ▶ to move the cursor between letters.
- Click ← to Backspace/Delete.
- Click **Enter** to enter your selection.
- Click **ESC** to close the virtual keyboard.

### To use the Virtual Mini-Keyboard:

- 1 Using the Mouse, click on an option or field, such as the Time or Date fields.
  - The Virtual Mini-Keyboard opens.

Virtual Mini-Keyboard

- Click ← to go back to the previous option.
- Click ↵ to enter your selection.

## Using the Zoom Mode

Zoom Mode allows you to zoom in on an image while viewing your cameras live. This can be useful if you want to get a closer look at a situation.

### To use the Zoom Mode:

- 1 In Live Viewing Mode, select the channel you want to zoom in on in full-screen (double-click the channel if you are in a Split-screen View).
- 2 Right-click to open the Menu Bar and select the Zoom button (  ). A Zoom icon appears on the screen.
- 3 Click and drag on the area of the screen you would like to enlarge. The image zooms in on the selected area.

- The box in the lower right-hand corner shows the entire camera picture with a black box around the zoomed-in area.
- Click inside the box and drag to move the zoom area.
- Right-click to exit and select a different zoom area. Right-click again to exit Zoom Mode and return to Live Viewing Mode.

## Using Picture in Picture (PIP) Mode

Picture in Picture (PIP) Mode allows you to view one channel in full-screen while viewing up to two other channels.

### To use Picture in Picture Mode:

- 1 Right-click to open the Menu Bar and select the PIP1X1 button (  ) or PIP1X2 button (  ). PIP1X1 shows 1 channel in full screen and 1 other channel; PIP1X2 shows 1 channel in full screen and 2 other channels.

Click inside the main viewing area to change the full-screen channel

Click inside the white bar and drag to move the smaller channels

Click inside the smaller channels to change the channel

- Picture in Picture Mode opens.
- To change the full-screen channel, click anywhere in the main viewing area.
- To change the smaller channels, click inside the channel.
- To move the smaller channels around the screen, click inside the white bar and drag.
- Right-click to exit and return to Live Viewing Mode.

# Setting the Date and Time

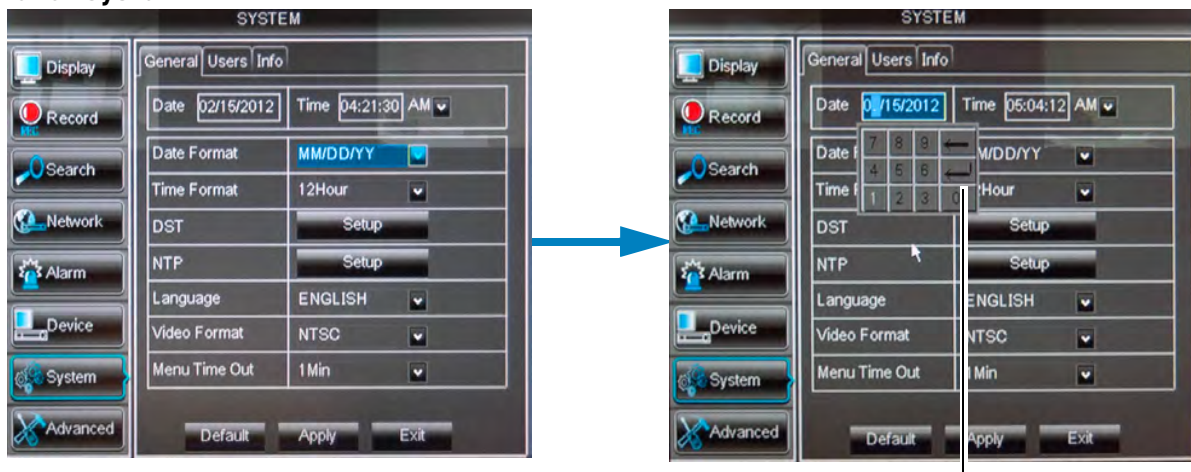

It is highly recommended to set the date and time when first setting up your system.

**Inaccurate time stamps may render your footage unusable for court evidence.**

## To set the date and time:

- 1 Right-click or move your mouse to the bottom of the screen to open the Menu Bar and click the Main Menu button (  ).
- 2 Enter the system user name (default: **admin**) and password (default: **000000**) and click **Apply**.
- 3 Click **System**.

Press  on the Mini-Keyboard after you have entered the Date or Time

- 4 Configure the following:
  - **Date:** Click inside the field and enter the month, date, and year.
  - **Time:** Click inside the field and enter the time.
  - **(Optional) Date Format:** Use the drop-down menu to select **MM/DD/YY** or, **DD/MM/YY**, or **YY-MM-DD**.
  - **(Optional) Time Format:** Use the drop-down menu to select **12Hours** or **24Hours**.
  - **(Optional) DST:** Click the **Setup** button next to DST to configure automatic Daylight Savings Time adjustments.
  - **(Optional) NTP:** Click the **Setup** button next to NTP to synchronize your DVR's time and date with a Network Time Protocol (NTP) time server. Lorex provides a free NTP service that automatically updates your DVR's time for Daylight Savings Time.

**NOTE:** A constant internet connection is required for the NTP server feature to function.

- 5 Click **Apply** to save your settings.

## Configuring Daylight Savings Time (DST)

If your region observes Daylight Savings Time (DST), follow the instructions below to configure your DVR to automatically update the time when the clock updates.

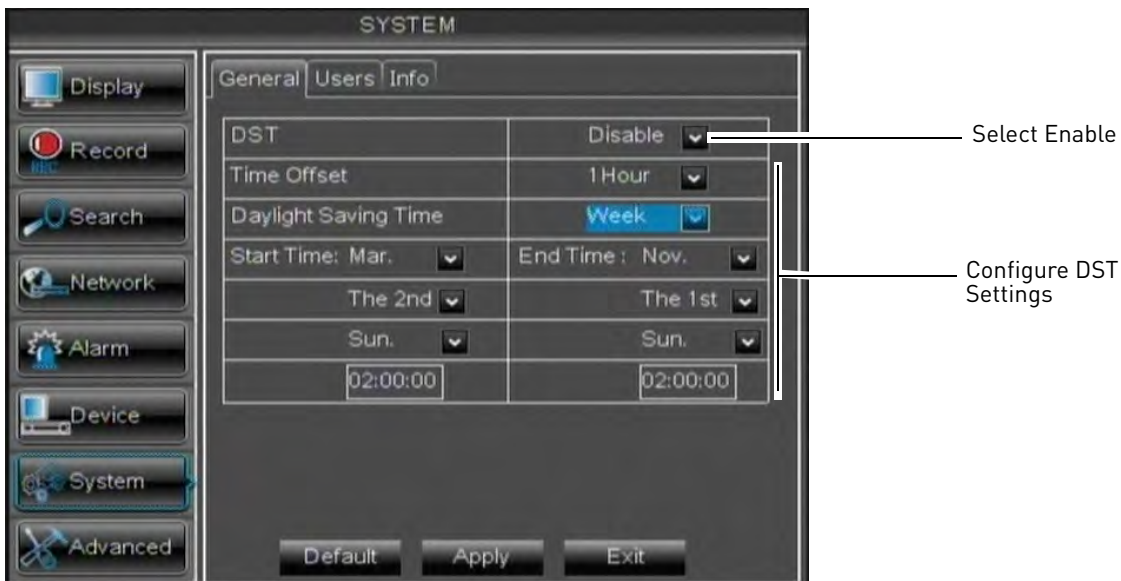

**To enable automatic DST adjustments:**

- 1 Click the **DST Setup** button.

- 2 Configure the following:

- **DST:** Select **Enable**.
- **Time Offset:** Select the number of hours the system should move forward or backward when DST occurs.
- **Daylight Saving Time:** Select **Week** or **Date**. This allows you to select whether DST should begin and end at the beginning of the week or on a specific date.
- **Start Time, End Time:** Enter when DST starts and ends.

- 3 Click **Apply** to save your settings.

## Using a NTP Server to set your System Time

A NTP (Network Time Protocol) server syncs your system time with an online time server. Lorex provides a free NTP service that allows your DVR to automatically update the time for Daylight Savings Time.

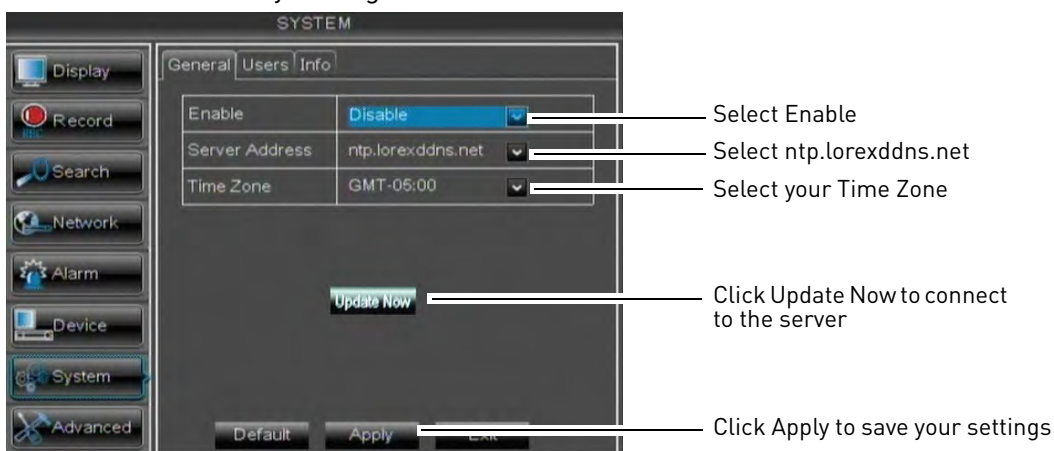

**NOTE:** A constant Internet connection is required to use the NTP feature.

### To enable NTP:

- 1 Right-click to open the Menu Bar and click the Main Menu button (  ).
- 2 Click **System**. Beside NTP, click **Setup**.

- 3 Configure the following:
  - **Enable:** Select **Enable**.
  - **Server Address:** Select **ntp.lorexddns.net** (recommended) as the time server or select another time server.
  - **Time Zone:** Select your region's time zone.

- 4 Click **Update Now** to connect to the time server.
- 5 Click **Apply** to save your settings.

---

# Recording

By default, the system is set to immediately record video from connected cameras in Continuous Recording Mode.

- **C Recording—Continuous:** Normal, continuous recording

You can set the system to stop recording once the hard drive is full, or to continually record by overwriting previously recorded data. For more details, see “Configuring Hard Drive settings” on page 46.

## Event Recording

The system also includes motion recording:

- **M Recording—Motion:** The system records when motion is detected by the camera

## Recording Audio

The system can also record audio for up to 4 channels (4-channel model) or 8 channels (8-channel models). You must have audio-capable cameras (not included) or self-powered microphones (not included) in order to record audio on the system.

For details, see “Appendix C: Recording Audio” on page 106.

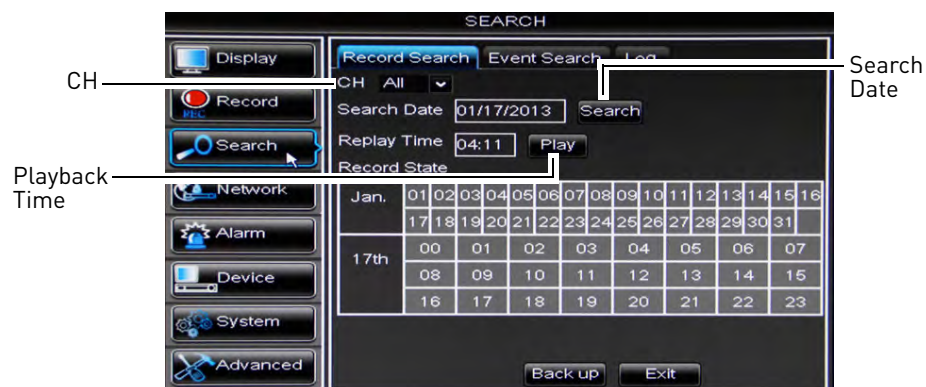

# Playback and Backup

You can view and back up recorded video on the system through the Search Menu.

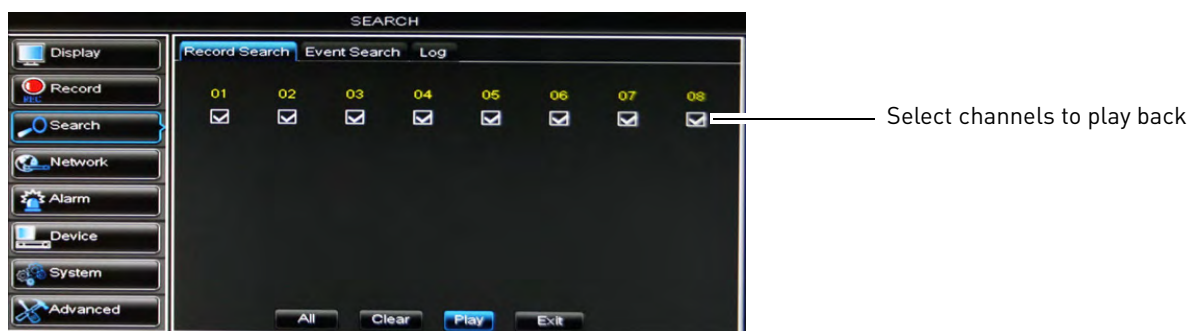

## Playing Back Recorded Video

**To playback a specific date and time:**

- 1 Right-click to open the Menu Bar and click the Record Search button (  ).
- 2 Enter the system user name (default: **admin**) and password (default: **000000**) and click **Apply**. The Record Search tab opens.
- 3 Configure the following:
  - **CH:** Select the channel you wish to search. Select **All** to search all channels.
  - **Search Date:** Enter the month, date, and year you wish to search for video.
  - **Playback Time:** Enter the desired time you wish to search for video.

- 4 Click **Play** to select the exact time specified in Playback Time.
- 5 Select the channel or channels you want to play back and click **Play**.

**To search for recorded footage on the DVR:**

- 1 Right-click to open the Menu Bar and click the Record Search button (  ). The Record Search tab opens.
- 2 Configure the following:
  - **CH:** Select the channel you wish to search. Select **All** to search all channels.
  - **Search Date:** Enter the month, date, and year you wish to search for video.
- 3 Click the **Search** button. Your search results appear in the calendar. In the top portion of the calendar, results are shown for each day in the month. In the bottom portion, results are shown for each hour in the selected day.

Days in the  
selected month

Hours in the  
selected day

**Search results:**

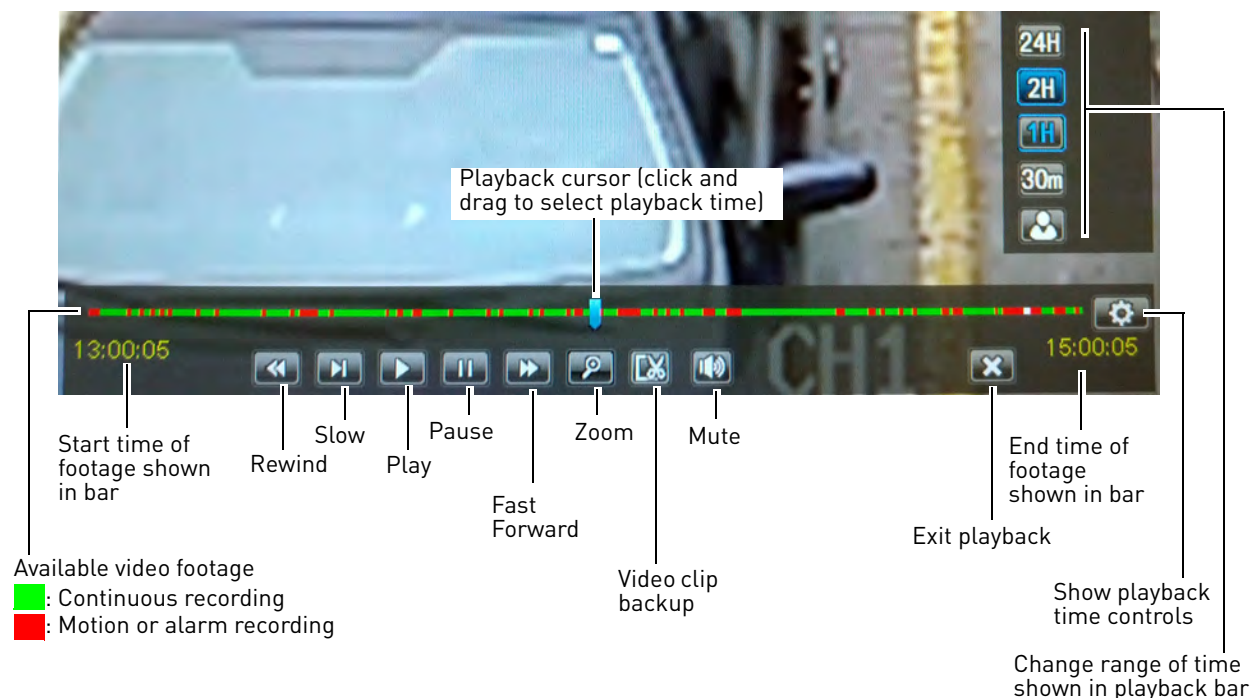

**Green:** Continuous recording  
**Red:** Motion or alarm recording  
**Grey:** No recording

- 4 Click on a date in the calendar to see the video available for that date.
- 5 Click on the hour of the video you want to play back.
- 6 Select the channel or channels you want to play back.
- 7 Click **Play** to begin playback.

## Using Playback Controls

This system features advanced playback controls that allow you to see when you have recorded footage and motion events on your cameras. They also allow you to use digital zoom in playback mode or take backups from short video clips.

Different playback controls appear depending on the number of cameras you have selected to playback. All available controls appear when you playback from a single camera.

### To use the advanced playback controls:

- 1 Move the mouse slightly to display the on-screen playback controls. You can also use the playback control buttons on the remote control.
  - Click the playback controls to play, pause, fast forward, rewind, and slow down playback.
  - Click **X** or right-click to quit playback and return to the Search Menu.

## Finding Events in the Playback Bar

The advanced playback controls show the time and type of video footage available. Continuous recordings are shown in green and motion or alarm recordings are in red.

**NOTE:** Motion detection or alarms must be enabled for each channel before they will be highlighted, see “Alarm” on page 45 for details.

When up to four channels are selected for playback, multiple channels are shown.

Video footage from up to 4 channels is shown in multiple bars

If more than four channels are selected, one bar is shown that shows the first selected channel. This means that video available on any selected channel will be shown in the bar.

## Controlling the Time Range of the Playback Bar

The time range is the start and end times of the footage displayed in the Playback bar. By default, the Playback bar displays recordings recorded on the day selected for playback (from 00:00~24:00). You can change the time range to narrow in on a specific time.

### To control the time range of the Playback bar:

- 1 During Playback mode, click  to open the time range controls.

- 2 Click **30m**, **1H**, **2H**, or **24H** to select a time range. For example, if 30m is selected, the playback bar will show 15 minutes before to 15 minutes after the currently playing time.

### OR

- To create a custom time range, click . The button will become colored. Move your mouse to the time where you would like the range to start and click. Then, move your mouse to the time where you would like the range to end and click. The start and end times will be replaced by the 1st and 2nd times that you clicked on.

## Using Zoom in Playback Mode

You can use Zoom in Playback Mode. This is useful if you need a closer look at recorded video.

**NOTE:** Zoom is only available when a single channel is selected for Playback.

### To use zoom in playback mode:

- 1 Open Playback mode with only one channel selected. For details, see “Playing Back Recorded Video” on page 22.
- 2 Click  to open Zoom.

**NOTE:** Playback controls are not available when Zoom is activated. If you want to pause the video before you zoom, you will have to pause it before entering Zoom.

- 3 Click and drag on the area of the screen you would like to enlarge. The image zooms in on the selected area.

- The box in the lower right-hand corner shows the entire camera picture with a black box around the zoomed-in area.
  - Click inside the box and drag to move the zoom area.
- 4 Right-click to exit and select a different zoom area. Right-click again to exit Zoom Mode and return to Playback Mode.

### Using Video Clip Backup

Video clip backup allows you to select a duration of video during playback mode and save it to a USB flash drive (not included).

**NOTE:** Video clip backup is only available when a single channel is selected for Playback.

#### To create a backup video clip:

- 1 Connect a USB flash drive (not included) to one of the **USB** ports on the DVR.
- 2 Open Playback mode with only one channel selected. For details, see “Playing Back Recorded Video” on page 22.
- 3 Click the clip backup button (  ) to start your backup at the current playback time.

- 4 When you want the backup clip to stop, click  again.

**TIP:** You can use fast forward or click-and-drag the video cursor to select the stop time for the clip. This is useful because it allows you to backup longer segments of video without having to watch the whole video each time. You must have enough space on your USB flash drive to save the file.

- 5 A confirmation window appears, showing information about the backup file you are about to create. Click **Backup** to confirm. Wait for the file to be saved.

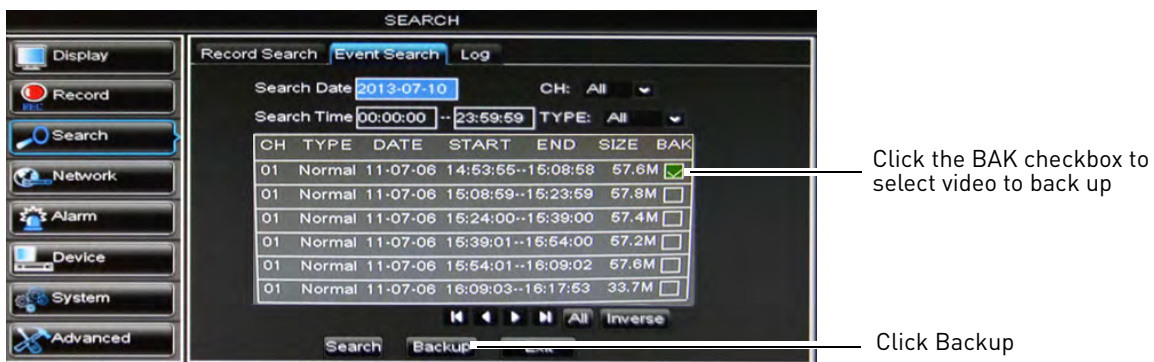

For details on viewing backed up video, see “Lorex Player 11: Playing Backed up Video on PC” on page 97 or see “Lorex Player for Mac: Viewing Backed up Video on Mac” on page 99.

## Backing Up Video

You can back up video to a USB flash drive (not included) connected to the DVR.

### To back up video:

- 1 Connect a USB flash drive to one of the **USB** ports on the DVR.
- 2 Right-click to open the Menu Bar and click the Record Search button (⏮).
- 3 Enter the system user name (default: **admin**) and password (default: **000000**) and click **Apply**.
- 4 Click the **Event Search** tab.
- 5 Configure the following:
  - **Search Date:** Enter the desired month, date, and year
  - **Search Time:** Enter the time range you wish to search.
  - **CH:** Select the channel you wish to search. To search all channels, select **All**.
  - **Type:** Select the type of recording you wish to search. Choose from **All**, **Normal**, or **Alarm**.
- 6 Click **Search**. A list of videos populate in the window.

- 7 Click ◀ ▶ to scroll through the list of videos. The videos are named by time.

- 8 Click the **BAK** checkbox beside the video you wish to back up.
- 9 Click **Backup**. Wait for the backup to finish before removing the USB memory drive.

## Viewing Backed Up Video

To view the downloaded video, you must install the Lorex Player software.

For details on viewing backed up video, see “Lorex Player 11: Playing Backed up Video on PC” on page 97 or see “Lorex Player for Mac: Viewing Backed up Video on Mac” on page 99.

## Converting Backed Up Video to AVI Files

The DVR saves its backup files as proprietary video files. To share these files, you must convert them into .AVI files. Note that the AVI generator can also back up audio from audio-enabled cameras.

### To install the AVI converter:

- 1 Insert the software disc in your computer's CD/DVD rom drive.
- 2 Locate the **AVI Generator** software from the CD installation wizard.
- 3 Follow the on-screen instructions to install AVI Generator.

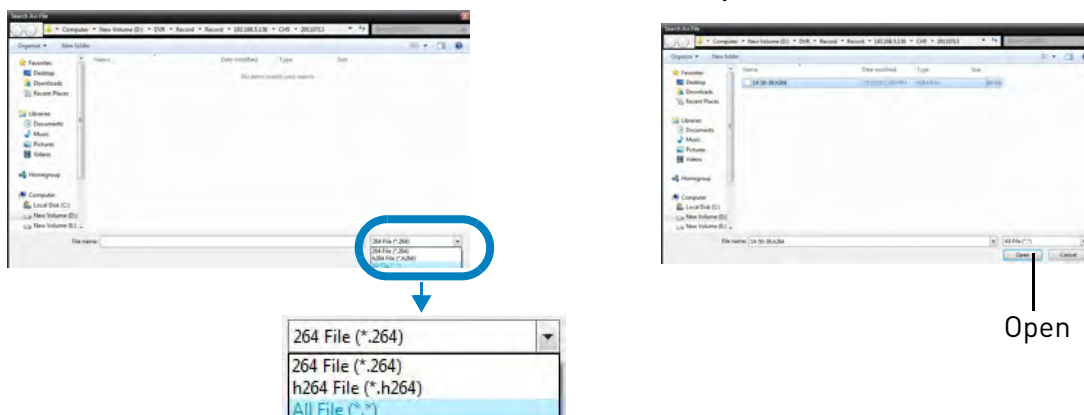

### To start the AVI Generator:

- 1 Double-click the **AVI Generator** shortcut on the desktop (  ).
- 2 Click **Open** and then locate the backed up video file on your hard drive.

- 3 Select the desired file format (.264 , h.264, All File) that you wish to search for. Click **Open**.

- 4 Click **Start** to convert and save the file in the default save folder.
- Or click **Save As** to select a desired save folder, then click **Start** to convert the file.

- 5 Locate the file in the folder you selected in step 4.

# Managing Passwords

**ATTENTION:** By default, the system user name is **admin** and the password is **000000**. Passwords are enabled by default and are required to access the Main Menu.

The password is required to log into the system remotely using a computer or mobile device. You will be prompted to create a custom password after you connect for the first time.

The system supports the following account types:

- **ADMIN**—system administrator: has full control of the system, and can change both administrator and user passwords and enable/disable password protection.
- **USER**—normal user: only has access to live viewing, search, playback, and other functions. You may set up multiple USER accounts with varying levels of access to the system.

For security reasons, it is highly recommended to change the password on your system. **By default, the system password is enabled.**

## Changing Passwords

You can change the system password of the ADMIN and USER accounts from the Users menu.

**To change the admin password:**

- 1 Right-click to open the Menu Bar and click the Main Menu button (  ). Enter the system user name (default: **admin**) and password (default: **000000**) and click **Apply**.
- 2 Click **System** and select the **Users** tab.
- 3 Select the checkbox beside admin to change the admin password, then click the **Edit** button.

Select checkbox beside admin

Edit

- 4 Configure the following:
  - **User Name:** Enter the desired admin user name.
  - **Password:** Enter your desired password.
  - **Confirm:** Re-enter the password.

General Users Info	
User Name	admin
User Name	admin
Password Enable	Enable ▼
Password	
Confirm	

Default Apply Exit

- 5 Click **Apply** to save your settings.

## Adding Users

You can allow multiple users to log in to the system. When adding different users, you can assign what menus they have access to. For example, you may want your friend to monitor your system while you are away, while not giving full access to your system.

**To add a new user:**

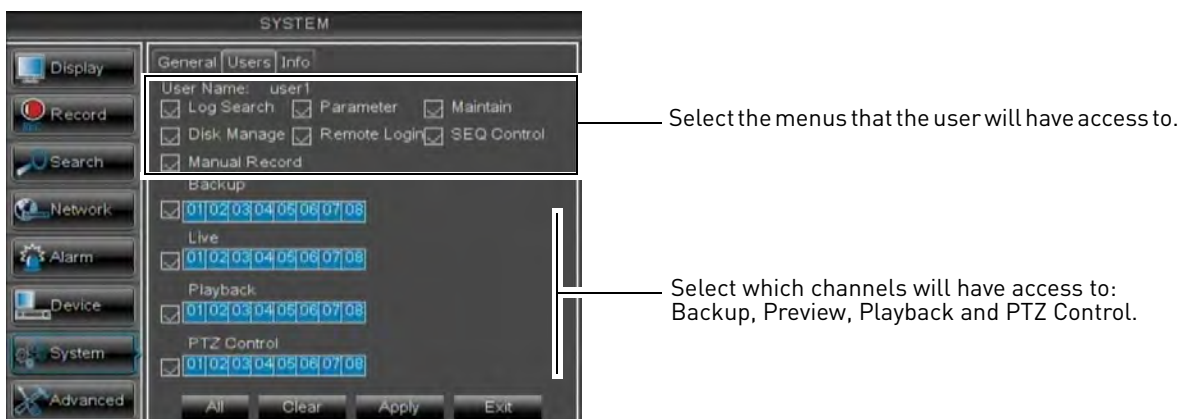

- 1 Right-click to open the Menu Bar and Click the Main Menu button (  ).
- 2 Click **System**→ **Users** tab.
- 3 Select the checkbox beside User1 (or any other user), then click the **Permission** button.

NO.	NAME	LEVEL	ENABLE	SEL
1	admin	admin	ENABLE	<input checked="" type="checkbox"/>
2	user1	user1	DISABLE	<input type="checkbox"/>
3	user2	user2	DISABLE	<input type="checkbox"/>
4	user3	user3	DISABLE	<input type="checkbox"/>
5	user4	user4	DISABLE	<input type="checkbox"/>
6	user5	user5	DISABLE	<input type="checkbox"/>
7	user6	user6	DISABLE	<input type="checkbox"/>

Edit Permission Apply Exit

Configure Permissions

- 4 Select the menus and channels the user will have access to:

- 5 Click **Apply** to save your settings.

- 6 Configure the following:

- **User Name:** Enter the desired user name.
- **User Enable:** Select **Enable** to enable the user account.
- **Password:** Enter your desired password.
- **Confirm:** Re-enter the password.

- 7 Click **Apply** to save your settings.

Now, you can log in to the system locally, or remotely using the user name and password you created. When logging into the system with a user account, the user will only have access to the menus you assigned.

# Using the Main Menu

## To open the Main Menu:

- Right-click to open the Menu Bar and click the Main Menu button (  ). Enter the system user name (default: **admin**) and password (default: **000000**) and click **Apply**.

- 1 Display:** Configure display options (e.g. camera color settings, camera title, video output).
- 2 Search:** Search for recorded video and log files on the system.
- 3 Alarm:** Configure motion detection and alarm settings.
- 4 System:** Configure system time and user accounts.
- 5 Record:** Configure recording settings and recording schedules.
- 6 Network:** Configure system network settings (e.g. email alert settings, video streaming quality settings).
- 7 Device:** Configure PTZ settings, HDD recording mode, HDD format option.
- 8 Advanced:** Configure system restart schedule, perform firmware upgrades or configure automatic upgrades.

## Display

The display menu allows you to configure camera image settings and video output settings.

**Tip:** If you want to apply settings to all channels, use the "Copy To" drop-down menu, and select **All**. Click the **Copy** button to copy the setting across all channels.

### Configuring Custom Channel Names

- 1 Select the **Live** tab.
- 2 In the **Channel** drop-down menu, select the channel that you wish to rename.

Channel drop-down menu

- 3 Click the **Name** field. Use the Virtual Keyboard to enter in the new channel name.
- 4 Click **Apply** to save your settings.

### Changing the Position of the Channel Name

- 1 Select the **Live** tab.
- 2 In the **Channel** drop-down menu, select the channel you would like to configure.
- 3 In the **Position** drop-down menu, select where you would like the channel names to appear:

- **U-L:** Upper left hand corner.
- **D-L:** Lower left hand corner.
- **U-R:** Upper right hand corner.
- **D-R:** Lower right hand corner.
- **OFF:** Do not display the channel name.

- 4 (Optional) Use the drop-downs next to **Copy** to copy settings to another channel or all channels. Click the **Copy** button to copy settings.

- 5 Click **Apply** to save your settings.

### Adjusting Camera Color Settings

- 1 Select the **Live** tab.
- 2 In the **Channel** drop-down menu, select the channel that you wish to configure.
- 3 Click the **Setup** button next to Color. The Color Setup window opens.

- 4 Drag the slider to adjust the **Hue**, **Brightness**, **Contrast**, and **Saturation**.
- 5 Click **Apply** to save your settings.

### Enabling Covert Recording

Covert Recording blanks out the screen so that it seems as if the system is not recording. Covert channels are only visible when the admin account logs in using a remote computer or mobile device.

#### To enable covert recording:

- 1 Select the **Live** tab.
- 2 In the **Channel** drop-down menu, select the channel you wish to hide.

- 3 In the **Covert** drop-down menu, select **Enable**.
- 4 Click **Apply** to save your settings.

### Configuring the Time and Recording Time Display

To add/remove the time stamp in the system display:

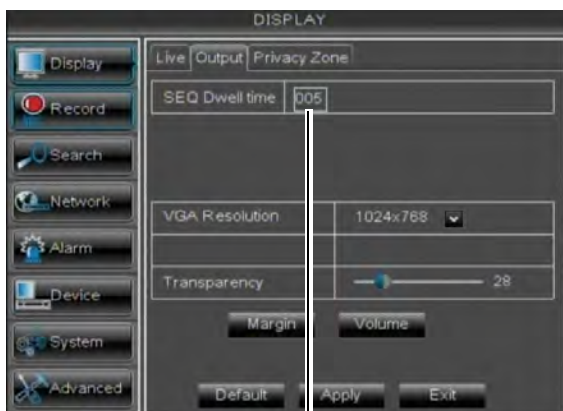

- 1 In the **Live Time** and **Record Time** drop-down menu, select **enable** or **disable**.
- 2 Click **Apply** to save your settings.

### Configuring Sequence Time

Sequence time refers to the amount of time a channel appears on the screen before changing to a different channel when the DVR is in Sequence Mode. For example, when Sequence Mode is on, channel 1 is shown for several seconds before switching to channel 2.

To configure the sequence time:

- 1 Click the **Output** tab.

- 2 Click the **SEQ Dwell time** field and enter the time channels remains on-screen before changing to another channel.
- 3 Click **Apply** to save your settings.

### Changing the Video-out Resolution

- 1 Click the **Output** tab.

- 2 Click the drop-down menu beside **VGA/HDMI Resolution** and select the output resolution.
- 3 Click **Apply** to save your settings.
- 4 Right-click repeatedly to exit all menus. The DVR prompts you to restart. Click **OK**.
- 5 The DVR restarts and asks you to confirm the new resolution. Click **Yes** to confirm or **No** to revert to the old resolution. If you do nothing, the DVR will revert to the last selected resolution and restart.

**NOTE:** If you select a resolution that is greater than what your monitor supports, you may see a blank screen when your DVR restarts. If this occurs, do not do anything and wait until the DVR restarts. If the screen remains blank, press and hold the Stop button (■) on the front panel of the DVR until the DVR restarts. Your system resolution will default to 1024 x 768.

### Restoring the System's Resolution if you see a Blank Screen

If you see a blank screen on your monitor after turning on your system, the DVR's output resolution may be higher than what your monitor supports. Follow the steps below to restore the DVR's default resolution to 1024 x 768.

To restore the DVR's default resolution:

- 1 Ensure the power and video cables are properly connected.
- 2 Press and hold the Stop button (■) on the front panel of the DVR until the DVR restarts. The DVR will restart with the default resolution of 1024 x 768.

- 3 When the DVR restarts, click **Yes** to confirm the default resolution.

**NOTE:** If your system resolution is already in 1024 x 768, pressing and holding the Stop button will not restart the system.

## Adjusting Menu Transparency

You can increase or decrease the transparency of the on-screen menus.

### To adjust the transparency of on-screen menus:

- 1 Click the **Output** tab.
- 2 Drag the **Transparency** slider to adjust transparency.
- 3 Click **Apply** to save your settings.

## Adding Privacy Zones

A privacy zone allows you to block out up to 4 portions of each channel with a black square.

**ATTENTION:** Areas covered by privacy zones are not visible in recordings.

### To configure a privacy zone:

- 1 Click the **Privacy Zone** tab.
- 2 In the **Channel** drop-down menu, select the channel you wish to configure.

- 3 Configure the following:

- **Channel:** Select the channel you wish to configure.
- **Privacy Zone:** Select **ON** to enable privacy zones or **OFF** to disable privacy zones.
- **Area Setup:** Select the **Area1~4** checkboxes to enable up to 4 privacy zones.

- 4 Click the **Setup** button next to Mask Area. The Privacy Area setup screen opens.

Click and drag to move privacy zones

Click Inside the edge and drag to resize

- Click on a privacy area and drag to change its location.
- Click on the edge of a privacy area and drag to resize a privacy area.
- Right-click when you are finished to exit.

- 5 [Optional] Use the drop-downs next to **Copy** to copy privacy areas to another channel or all channels. Click the **Copy** button to copy privacy areas.

- 6 Click **Apply** to save your settings.

## Creating a Custom Split-screen Display

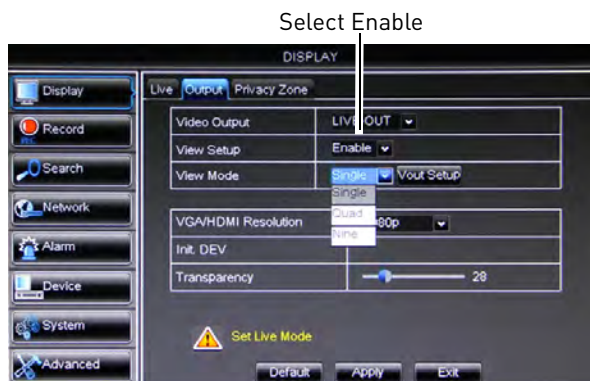

You can create a custom split-screen display and re-arrange where channels are placed.

### To re-arrange the split-screen display:

- 1 Select the **Output** tab.

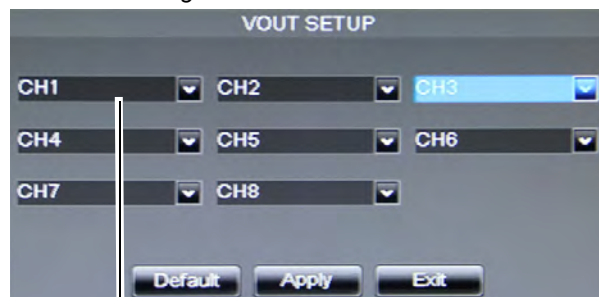

- Under **View Setup**, select **Enable**. This lets you select and arrange the channels you want to show on the screen.

**NOTE:** Enabling View Setup disables your ability to change channels the normal way. You will need to disable View Setup to return to normal operation.

- Under **View Mode**, select the desired viewing mode: **Single**, **Quad**, or **Nine**.
- Click **Vout Setup**. A menu appears that allows you to select the arrangement of channels.

- Click the drop-down menus to select which channels to show on the screen and the arrangement of channels.

- Click **Apply** to save changes. Click **Ok**. Right-click repeatedly to exit all menus and return to live viewing.

## Record

The Record menu allows you to configure recording settings, such as the recording resolution, recording schedule, and audio recording.

### Configuring Pre-recording Settings

- 1 Select the **Rec Para** tab.
- 2 In the **Channel** drop-down menu, select the desired channel you wish to configure.
- 3 In the **PreRecord** drop-down menu, select **Enable** to enable pre-recording or **Disable** to disable pre-recording.
- 4 Click **Apply** to save your settings.

### Configuring the Recording Schedule (Continuous, Motion, Alarm)

To configure the recording schedule:

- 1 Click the **Schedule** tab.
- 2 Configure the following:
  - **Channel:** Select the channel you wish to configure the schedule for.
  - **Week:** Select the day of the week you wish to configure.
- 3 Click inside the grid to configure the recording schedule:
  - The recording schedule is arranged as a grid. Each row represents a recording type (Continuous, Motion, and Alarm), and each box represents an hour.
  - Recording for each recording type is enabled during the selected hour when the box is filled in with the corresponding color. Recording for each recording type is

disabled for the selected hour when the box is gray.

- 4 (Optional): Use the top **Copy** and **Copy To** drop-down to copy the recording schedule to a specific day or all days. Click **Copy** to copy the schedule.
- 5 (Optional): Use the bottom **Copy** and **Copy To** drop-down to copy the recording schedule to a specific channel or all channels. Click **Copy** to copy the schedule.
- 6 Click **Apply** to save your settings.

### Enabling Audio Recording

Audio-capable cameras are required (not included) for audio recording.

To enable audio recording:

- 1 Click the **MainStream** tab.

- 2 Beside the corresponding channel, select or deselect the checkbox under **Audio** to enable or disable audio recording.
- 3 Click **Apply** to save your settings.

## Configuring Recording Quality and Video Frame Rate

You can configure the recording quality and video frame rate for each channel.

### To change the recording quality and video frame rate:

- 1 Click the **MainStream** tab.
- 2 Under the **Quality** drop-down menu, select from **Good**, **Better**, or **Best** to adjust the quality of recordings on each channel.
- 3 Under the **FPS** drop-down menu, select the number of frames per second you want the DVR to record on each channel.
- 4 (Optional) Use the **Copy** and **Copy To** drop-down menus to copy recording settings to one or all channels. Click **Copy** to copy recording settings.
- 5 Click **Apply** to save your settings.

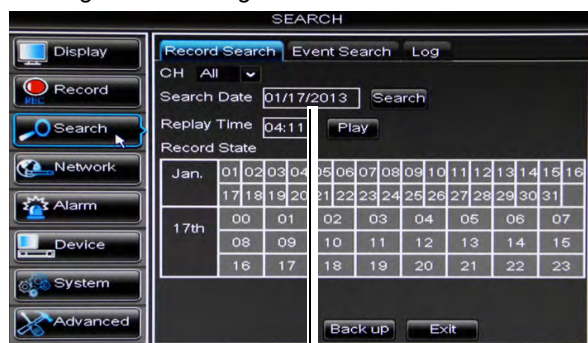

## Search

The Search menu allows you to search for saved video on your system for playback and backup.

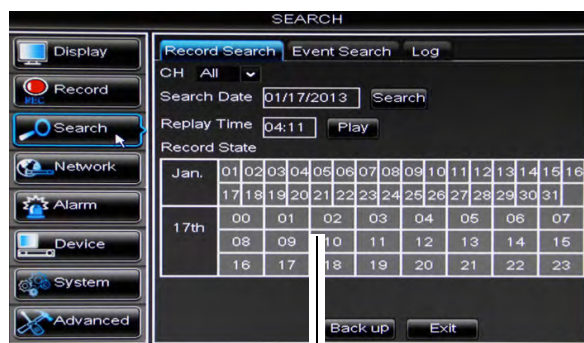

### Searching for Video on the System

- 1 In the main menu, click **Search**, or click the Search Menu button (  ) in the menu bar.
- 2 In the **CH** drop-down menu, select the channel you wish to search or select **All** to search all channels.
- 3 Click the **Search Date** field, to enter the desired month, date, and year you wish to begin searching for video.

Search Date

- 4 Click **Search**.
- 5 Click on a date in the calendar to see the video available for that date.

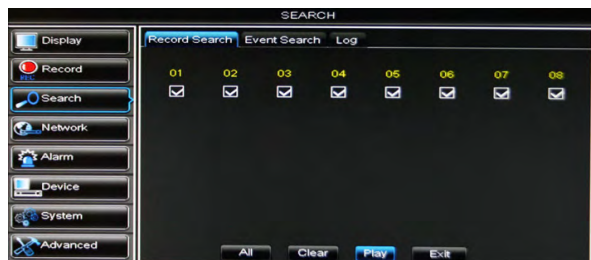

Click a date to see video available

Click a time to play video from that time and date

- 6 Click on the hour of the video you want to play back.

- 7 Select the channel or channels you want to play back.

- 8 Click **Play** to begin playback.

### Video Playback Controls

Move the mouse slightly to display the on-screen playback controls. You can also use the playback control buttons on the remote control or front panel of the system.

Use the video control buttons to manipulate video playback

- Click **X** to quit playback and return to the Search menu.

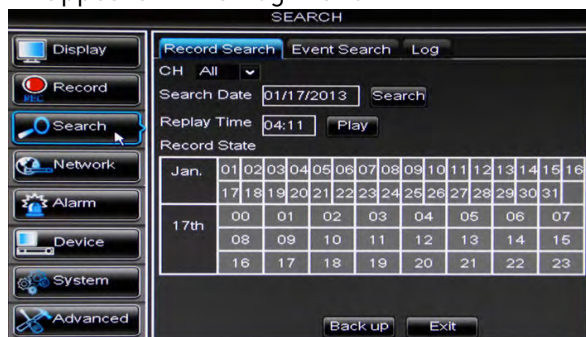

### Backing up Video Files

You can back up video files on your USB flash drive (not included).

#### To back up video files:

- 1 Perform a search.
- 2 Insert a blank USB flash drive into one of the **USB** ports on the DVR.
- 3 Click on the desired date you wish to back up.

- 4 Click the **Backup** button. A list of files appears in the Log menu.

Backup

- 5 Click the checkbox under **BAK** next to the file you want to backup.
- 6 Click the **Backup** button to begin copying the video files to your flash drive.

**NOTE:** You will need the Lorex Player (included on the CD) to view the saved files.

### Using the Event Search

Event Search allows you to find videos that are marked as "Alarm" or "Continuous" recording type. This allows you to quickly and easily sort through videos that only have alarm attributes.

**NOTE:** Videos are not marked as Alarm unless continuous recording is turned off and motion or alarm settings are enabled.

#### To perform an Event Search:

- 1 Click the **Event Search** tab.

- 2 Configure the following:
  - **Search Date:** Enter the Month, Date, and Year.

- **CH:** Select the channels you wish to search.
- **Search Time:** Enter the time range you wish to search.
- **Type:** Select the recording type you wish to search for.

3 Click **Search**. A list populates with videos.

4 Perform one of the following:

- **Play video:** Double-click on the desired file.
- **Back up a file:** Connect a blank USB flash drive to your system. Select the **BAK** checkbox beside the desired file name. Then, click the **Backup** button.

## Using the Log Search

A log search allows you to search system event logs.

To perform a Log search:

1 Click the **Log** tab.

2 Configure the following to perform a Log search:

- **Log Type:** Select the log type you wish to search under. Choose from **System** (i.e. startup and shutdown), **Config** (i.e. Configuration changes, Setup), **Alarm** (i.e. motion events, video loss), **Account** (i.e. Login/Logout), **Record** (i.e. Search/Playback) or **All**.
- **Start Time:** Enter the time you wish to begin searching.
- **End Time:** Enter the time you wish to end searching.

3 Click **Search**.

4 [Optional] Click the **Backup** button to backup system logs to a USB flash drive (not included).

## Network

The Network menu allows you to configure network settings and email alerts.

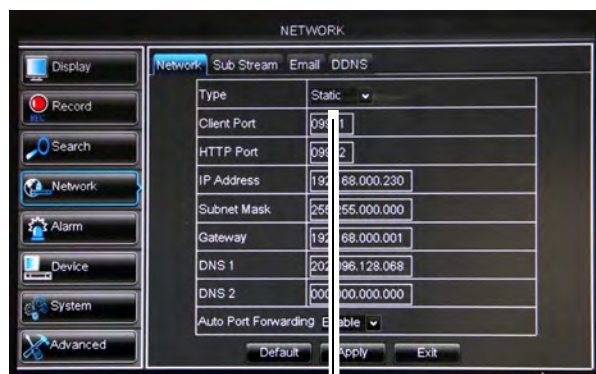

### Configuring Network

#### Type: DHCP & Static IP

The system has the ability to operate in DHCP mode and Static IP mode.

#### To configure DHCP and Static IP settings:

- 1 Select the **Network** tab.
- 2 In the **Type** drop-down menu, select **DHCP** or **Static**. If you select DHCP, the router automatically assigns an IP to your DVR.

Select DHCP or Static

If you select Static, click the field beside IP Address, and enter in the IP address of your choice.

- Enter your custom **Subnet Mask**, **Gateway**, **DNS1** and **DNS2** using the mouse.
- You must assign the IP in your router that you wish to make static. For example, if you assign 192.168.2.89 as the static IP in the DVR, you must assign 192.168.2.89 in your router as a static IP as well. Consult your router's user's manual for details.

- 3 Click **Apply** to save your settings.
- 4 Right-click until you exit all menus. You will be prompted to restart.

### Enabling Auto Port Forwarding

Auto Port Forwarding allows the DVR to open required ports on your router. This feature only works on certain router models.

**NOTE:** Port forwarding is not required to use the Lorex Stratus Connectivity service. For details on setting up remote connectivity, see "Connecting to Your DVR Over the Internet on PC or Mac" on page 53.

#### To Enable Auto Port Forwarding:

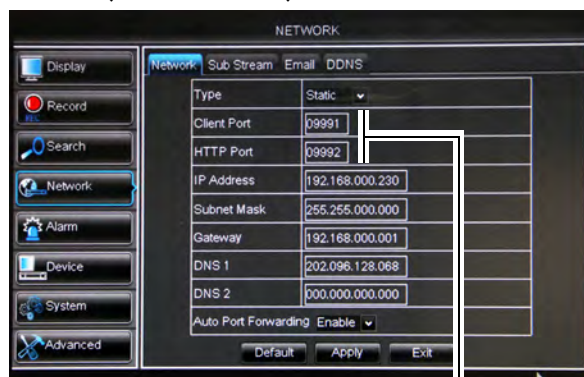

- 1 Select the **Network** tab.
- 2 In the **Auto Port Forwarding** drop-down menu, select **Enable** or **Disable**.
- 3 Click **Apply** to save your settings.

### Changing the DVR's Client and HTTP Port

The DVR's Default Client port is **9000**. The default HTTP port is **80**.

#### To change the Client port and HTTP port:

- 1 Select the **Network** tab.
- 2 In **Client Port**, enter the desired Client Port (default: **9000**).

Client Port & HTTP Port fields

**NOTE:** 9000 is represented as "09000."

- 3 In **HTTP Port**, enter the desired HTTP Port (default: **80**).
- 4 Click **Apply** to save your settings.

- 5 Right-click to exit all menus. You will be prompted to restart.

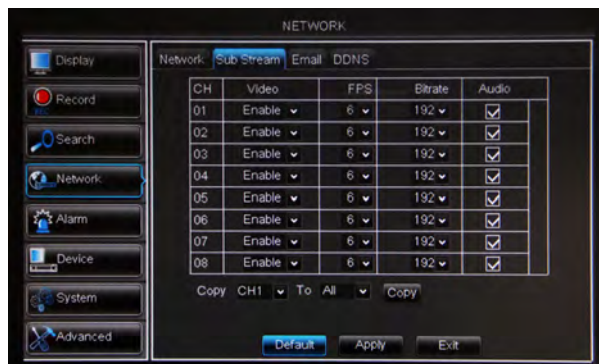

## Adjusting Remote Connectivity Streaming Rates

You can adjust the data streaming rate (also called the SubStream) when you connect to the system remotely. If you want to conserve bandwidth, select a lower frame rate and bitrate.

**NOTE:** Setting your system to stream with a lower frame and bitrate may cause the video to appear choppy or slow.

### To adjust the SubStream settings:

- 1 Click the **SubStream** tab.

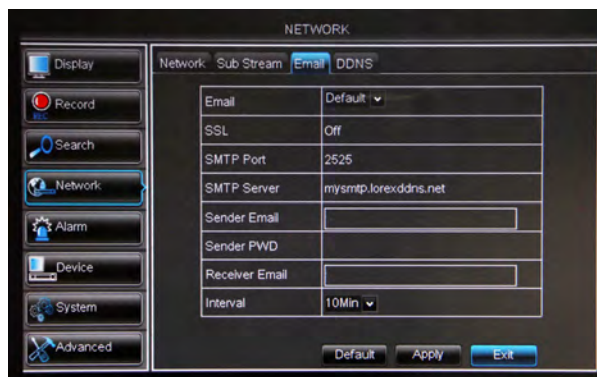

- 2 Configure the following beside the desired channel:
  - **Video:** Select **Enabled** or **Disabled**. If you select Disabled, you will not be able to view the channel when connecting remotely to the system.
  - **FPS:** Select the desired frames per second.
  - **Bitrate:** Select the desired video bitrate.
  - **Audio:** Select or deselect the checkbox to enable or disable the system from streaming audio when viewing the system remotely.
- 3 Click **Apply** to save your settings.

## Setting up Email Notification

The system can send email notifications when it detects motion or when an alarm parameter triggers.

### To set up email notification:

- 1 Click the **Email** tab in the Network menu.

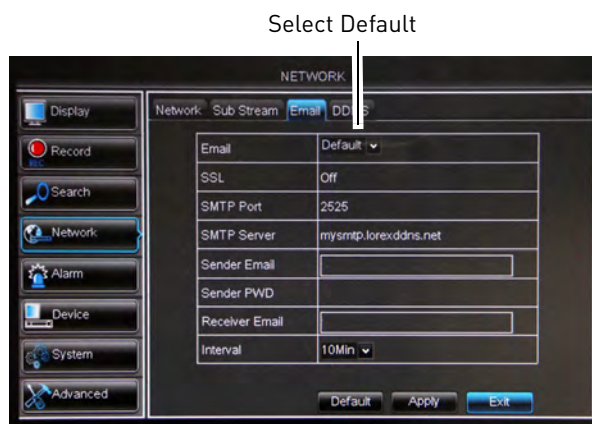

- 2 From the **Email** drop-down menu, select from:

- **Default:** Uses the Lorex email server to send out alarm notifications. This is the recommended selection.
- **Enable:** Uses custom email server settings.
- **Disable:** Disables email notification.

### If you want to use Lorex's email server (recommended):

- 1 In the **Email** drop-down menu, select **Default**.

- 2 In the **Sender Email** field, enter the email address of the sender. This can be any email address of your choice.
- 3 In the **Receiver Email** field, enter the email address you want the DVR to send alarm notifications to.

- 4 In the **Interval** drop-down menu, enter the Duration the DVR must wait before sending out a new notification.

For example, if you select a 3 minute interval, the DVR will send out email notifications every 3 minutes until the DVR stops detecting motion / alarm. The DVR will only send out notifications when it detects motion/alarm triggers.

- 5 Click **Apply** to save your settings.

#### If you select "Enable", and want to use your own email server:

- 1 Configure the following:
  - **SSL**: Select **ON/OFF** to enable/disable Secure Socket Layer protocol.
  - **SMTP Port**: Enter your SMTP address.
  - **SMTP Server**: Enter your SMTP Server.
  - **Sender Email**: Enter the sender email address. This can be any address of your choice.
  - **Sender Password**: Enter your email server's password.
  - **Receiver Email**: Enter the recipient's email address.
  - **Interval**: Enter the interval the DVR waits before sending a new email notification.
- 2 Click **Apply** to save your settings.
- 3 Right-click until you have exited all menus. You will be prompted to restart.

### Configuring DDNS settings

Lorex DDNS is available as an optional connectivity option. Please see "Appendix E: DDNS Setup (Advanced)" on page 111 for details.

The primary connectivity option uses the Lorex Stratus service to connect to your system over the Internet without requiring port forwarding or DDNS registration. For details, See "Connecting to Your DVR Over the Internet on PC or Mac" on page 53.

#### To configure DDNS settings:

- 1 Visit <http://lorexddns.net> and register for a DDNS account.
- 2 Click the **DDNS** tab.

- 3 Configure the following:
  - **DDNS**: Select **Enable**.
  - **Server**: Select **LOREXDDNS** (default).
  - **Domain Name**: Enter the Domain name/ URL Request you received in the email after registering for DDNS.
  - **User Name**: Enter your DDNS User Name.
  - **Password**: Enter your DDNS Device password.
- 4 Click **Apply** to save your settings.

**NOTE:** Please allow 10~15 minutes for the DDNS servers to update with your new DDNS address before attempting to connect.

## Alarm

The Alarm tab allows you to configure Motion Detection and Alarm settings.

### Configuring Motion Detection

Configure motion settings to determine the area you wish to monitor for motion events, and the outcome if a motion event occurs.

To configure motion settings:

- 1 Select the **Motion** tab.

- 2 Configure the following:

- **Channel:** Select the channel you wish to configure.
- **Enable:** Select **Enable** or **Disable** to activate or deactivate motion recording.
- **Area:** Click the **Setup** button to configure the area of the screen that detects motion.

Drag mouse cursor  
over desired area

Click and drag the mouse cursor to configure motion detection areas. Motion detection is enabled in red areas and disabled in transparent areas. Right-click to exit.

- **Sensitivity:** Select motion sensitivity. The greater the number, the greater the sensitivity.
- **Alarm Out:** Select the checkbox to enable the system to trigger a device connected to the alarm block.
- **Latch Time:** Enter the duration the alarm continues to trigger after the event ends.
- **Show Message:** Select the checkbox if you want the system to display a system message when an alarm triggers.
- **Buzzer:** Select the duration the system will "beep" when motion is detected. Or select **OFF** to disable the "beep" during motion events.
- **Send Email:** Select the checkbox if you want the system to send email notifications if an alarm triggers. Email notifications must be configured.
- **Record Channel:** Select the channel you wish the DVR to record during motion recording.
- **Full Screen:** Select the **Full Screen** checkbox so that the system goes into full screen mode when motion or an alarm trigger is detected.
- **Post Recording:** Enter the post recording duration (the time the system continues to record after a motion event occurs).

- 3 Click **Apply** to save your settings.

### Configuring Alarm Settings

The Alarm settings menu allows you to configure how the system behaves when an external alarm device (not included) is triggered.

**To configure the Alarm tab:**

- 1 From the Alarm menu, click the **Alarm** tab.

- 2 Configure the following:
  - **Alarm In:** Select the channel you wish to configure.
  - **Alarm Type:** Select the alarm type of the device. Choose from N/O (normally open), N/C (normally closed).
  - **Alarm Out:** Select the checkbox to enable the system's alarm block to trigger a connected external alarm.
  - **Latch Time:** Enter the duration the alarm continues to trigger after the event ends.
  - **Show Message:** Select the checkbox if you want the system to display a system message when an alarm triggers.
  - **Buzzer:** Select the checkbox to enable the system to "beep" if an alarm triggers.
  - **Send Email:** Select the checkbox if you want the system to send email notifications if an alarm triggers.
  - **Post Recording:** Select the duration the system continues to record as an event after the alarm trigger ends. For example, if you select 30s (30 seconds), the system continues to record for 30 seconds after the alarm trigger ends.
  - **Full Screen:** Select the Full Screen checkbox so that the system goes into full screen mode when motion or an alarm trigger is detected.

- 3 Click **Apply** to save your settings.

**Device**

The Device menu allows you to configure hard drive and PTZ settings and format a USB flash drive (not included).

- For details on connecting PTZ cameras (not included), see "Appendix B: Connecting a PTZ Camera" on page 102.

**Configuring Hard Drive settings****To format the hard drive:**

**ATTENTION:** Formatting the HDD erases **all data** on the hard disk. **This step cannot be undone.**

- 1 Select the **HDD** tab.

- 2 Click the checkbox under **Select** to choose the drive you wish to reformat.
- 3 Click **Format HDD**. Enter the system user name (default: **admin**) and password (default: **000000**), and click **Apply**.
- 4 When the warning window appears, click **OK**. Wait for the system to format the hard drive.

**To set the hard drive recording mode (loop recording or linear recording):**

- 1 Select the **HDD** tab.
- 2 Select the checkbox beside the hard drive you wish to configure.

- 3 In the **Overwrite** drop-down menu, select **Auto** (recommended), or select the desired duration the hard drive should retain its data.

**NOTE:** If overwrite recording is enabled, the system's hard drive automatically re-writes the hard drive's oldest content (first in first out).

- 4 Click **Apply** to save your settings.

### Formatting USB Flash Drives

**ATTENTION:** Formatting a USB flash drive erases **all data** on the drive.  
**This step cannot be undone.**

- 1 Insert a USB flash drive (not included) into one of the USB ports.
- 2 In the main menu, click **Device→HDD**.
- 3 Click **Format USB**, then click **OK**. Wait for formatting to complete.

### Formatting eSATA Backup Drives

You may use a single eSATA external hard drive for backup purposes. This allows for the quick backup of large amounts of data. You must format an eSATA hard drive before you may use it with the system.

**NOTE:** The eSATA hard drive must be self-powered to work with the system.

**NOTE:** You may use any size eSATA hard drive with the system. However, the system will only use the first 900GB for backup purposes.

### To format an eSATA hard drive:

**ATTENTION:** Formatting an eSATA hard drive erases **all data** on the drive.  
**This step cannot be undone.**

- 1 Connect an eSATA external hard drive to the system.

**NOTE:** If you have previously used the hard drive for another purpose, the hard drive must be formatted as FAT32 before it will be recognized by the DVR.

- 2 Right-click and select  to open the Main Menu.
- 3 Click **Device→HDD**.
- 4 Click **Format esata**.

Click Format eSATA

- 5 Click **OK** to confirm.

**NOTE:** If the DVR cannot recognize the hard drive, restart the DVR. If it still does not recognize the hard drive, format the hard drive using a PC to FAT32.

- 6 When performing backups, the DVR will now copy data to the eSATA drive. You can view the data on the eSATA hard drive by connecting it to a PC or Mac.

## System

The System tab allows you to configure the system time and user accounts.

- For instructions on how to set the system time, including how to setup automatic Daylight Savings Time adjustments or NTP, see “Setting the Date and Time” on page 18.

### Changing Date Format

You can change the way the system displays the time (i.e. Month, Day, Year)

**To change the date format:**

- 1 Select the **General** tab.
- 2 In the **Date Format** drop-down menu, select the desired format. Choose from **MM/DD/YY** (Month, Day, Year), **YY/MM/DD** (Year, Month, Date), or **DD/MM/YY** (Day, Month, Year).
- 3 Click **Apply** to save your settings.

### Changing Time Format

You can change the way the system displays the date and time format (i.e 6:00 pm or 18:00).

**To change the time format:**

- 1 Select the **General** tab.
- 2 In the **Time Format** drop-down menu, select **12 Hour** or **24 Hour**.
- 3 Click **Apply** to save your settings.

### Changing the System Language

- 1 In the **Language** drop-down menu, select your desired system language.
- 2 Click **Apply** to save your settings.
- 3 Right-click until you exit the menu. Follow the on-screen instructions to restart your system.

## Changing Video Output - NTSC & PAL

**To change the video output:**

- 1 In the **Video Format** drop-down menu, select **NTSC** or **PAL**.
- 2 Click **Apply** to save your settings.

## Configuring Menu Time Out and Auto Logout

The Menu Time Out setting allows you to configure how long the system menu will remain on the screen during inactivity. If passwords are enabled, it also enables the Auto Logout, which allows the system to lock itself after the system is idle for the selected duration.

**To configure Auto Logout:**

- 1 Select the **General** tab. In the **Menu Time Out** drop-down menu, select the desired time before the system locks itself.
- 2 Click **Apply** to save your settings.

**NOTE:** You will need your system’s user name and password to unlock the system.

## Adding Users & Changing the Admin Password

- For details on changing admin and user passwords, see “Managing Passwords” on page 30.
- For details on creating User accounts, see “Adding Users” on page 31.

## Viewing System Information

- Click the **Info** tab.

## Advanced

The Advanced menu allows you to load system defaults, upgrade the system firmware, and configure automatic firmware updates.

### Configuring the "Auto Reboot" feature

Auto Reboot allows the system to restart during a specified time and date. Restarting the system every so often ensures system stability.

**To enable the Auto Reboot feature:**

- 1 Select the **Maintain** tab.

- 2 Configure the following:
  - **Auto Reboot:** Select **Enable** or **Disable** to activate or deactivate the Auto Reboot feature.
  - **Reboot:** In the drop down menu, select how often the system restarts. Choose from **Every day**, **Every Week**, or **Every Month**. Enter the desired day and time you want the system to restart.
- 3 Click **Apply** to save your settings.

### Configuring Firmware Upgrades

Firmware upgrades can provide improved functionality to your DVR. When firmware upgrades become available, you will automatically be prompted to upgrade your system. **You must have the latest DVR firmware and client software or mobile apps to**

**connect to the DVR over the Internet.**

You can enable or disable firmware upgrade prompts from appearing.

The system must be connected to the Internet to enable automatic firmware updates.

**To configure firmware upgrade notifications:**

- 1 Select the **Auto Upgrade** tab.

- 2 Under **Auto Upgrade**, select **Enable** to enable automatic firmware updates. Messages for firmware upgrades will appear on the DVR locally and via remote software.
- 3 Check **Check for update** to enable local messages on the DVR to notify you for updates. The system will check for firmware upgrades every hour.
 

**NOTE:** Click **Detect** to check for firmware updates manually.
- 4 Click **Apply** to save changes.

### Upgrading the System Firmware Using a USB Thumb Drive

If your system is not connected to the Internet, you may also download firmware upgrades for free from [www.lorextechnology.com](http://www.lorextechnology.com) and install them manually using a USB thumb drive (not included).

**You must have the latest DVR firmware and client software or mobile apps to connect to the DVR over the Internet.**

### To upgrade the system firmware:

- 1 In your web browser, visit [www.lorextechnology.com](http://www.lorextechnology.com) and search for the model number of your DVR (check the label underneath your DVR for the model number). Download the free firmware upgrade if one is available.
- 2 Extract the firmware into a blank USB flash drive. The firmware should be in a folder named **dvrupgrade**. Ensure that this is the only folder in the USB drive.
- 3 Insert the flash drive into one of the **USB** ports.
- 4 Right-click to open the Menu Bar and click the Main Menu button (  ).
- 5 Click **Advanced**.
- 6 Click **Firmware Update**.

Firmware Update

- 7 Follow the on-screen instructions to update the firmware. **Do not remove the USB flash drive or power off the DVR during the firmware update.** Wait for the system to reboot.

### Restoring to Factory Default Settings

Restoring to factory default settings reverts any setting changes you have made to their original settings. This does not affect the recordings saved on the DVR. You can reset a single menu, or all menus.

### To load system defaults:

- 1 Right-click to open the Menu Bar and click the Main Menu button (  ).
- 2 Click **Advanced**. Then click **Load Default**.
- 3 Select the menus that you wish to restore to default settings, or click **All** to restore the entire system to default settings.

**NOTE:** It is recommended to leave the Network menu unchecked when restoring the system to factory defaults. If you restore the Network menu, you will need to redo remote connectivity setup to access your DVR over the Internet.

- 4 Click **Apply**.
- 5 When the warning window appears, click **OK** to restore your settings.

- 6 Click **OK** to return to the menu.

- 7 Right-click until you have exited all menus. The DVR prompts you to restart.

## Restarting or Shutting Down the DVR

### To restart or shut down the DVR:

- 1 Right-click to open the Menu Bar and click the Main Menu button (  ).
- 2 Click **Advanced**.
- 3 Click **Reboot** or **Shut Down**.

- 4 Follow the on-screen instructions to restart or shut down your system.

## Configuring System Warnings

The system can send out email notifications, or trigger a connected alarm device if it detects system abnormalities. For example, the system can send out a warning if the hard drive is low on storage.

### To configure system warnings:

- 1 Click the **Events** tab.

- 2 Configure the following:

- **Event Type:** Select the event that triggers the system to send out a notification or alarm trigger. Choose from **Disk No Space** (low hard drive space), **Disk Error** (hard drive error), or **Video Loss**.
- **Enable:** Select **Enable** or **Disable** to activate or deactivate the system from sending out notifications.
- **Alarm Out:** Select the checkbox to enable alarm out devices from triggering.
- **Show Message:** Select the checkbox for the system to display an error message when an event occurs.
- **Send Email:** Select the checkbox for the system to send out email notifications when a system error occurs. Note, email notifications must be configured.
- **Latch Time:** Select the delay duration in the drop-down menu.
- **Buzzer:** Select the buzzer (system beep) duration when the system detects a system error.

- 3 Click **Apply** to save your settings.

## Saving Your System Configuration to a USB Flash Drive

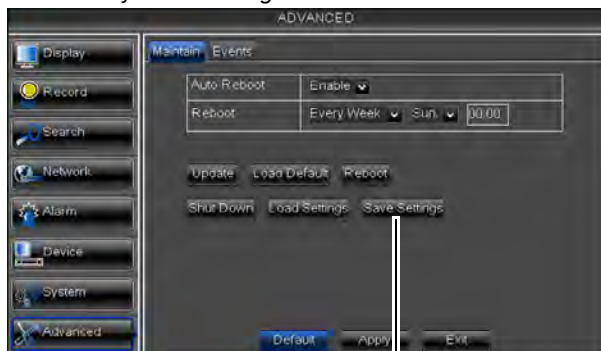

The DVR allows you to save your current system configuration to a USB flash drive (not included). This is useful if you want to backup your current settings.

**NOTE:** This function only saves settings created in system menus. It does not save or backup any video.

### To save your system configuration to a USB flash drive (not included):

- 1 Insert a USB flash drive (not included) into one of the **USB** ports.
- 2 Right-click to open the Menu Bar and click **Main Menu** (  ).
- 3 Click **Advanced** and select the **Maintain** tab.

- 4 Click **Save Settings**. Wait for the system to save your settings.

Click to save all system settings to a USB flash drive

### Loading a System Configuration from a USB Flash Drive

- 1 Insert a USB flash drive (not included) that contains a saved configuration to a **USB** port. See above for details on how to save your DVR configuration.
- 2 Right-click to open the Menu Bar and click **Main Menu** (  ).
- 3 Click **Advanced** and select the **Maintain** tab.
- 4 Click **Load Settings**. The DVR will load the saved settings from the USB flash drive and then restart.

# Connecting to Your DVR Over the Internet on PC or Mac

This DVR features connectivity using the exclusive Lorex Stratus solution. This cloud-enabled service allows for Internet connectivity without requiring any network configuration. Up to 3 devices may connect to the system at the same time.

This section refers to Internet setup on PC or Mac, for smartphone/tablet setup, see “Mobile Apps: Accessing your DVR Using a Mobile Device” on page 80.

**Lorex Stratus Client**

## System Requirements

Prior to using Lorex Stratus Client, make sure your system meets or exceeds the following system requirements:

Description	Requirement
<b>CPU</b>	Pentium® 4 or above
<b>Operating System</b>	Windows 7/8 Mac OSX 10.6.6 and above (Intel processors only)**
<b>Memory</b>	256 MB RAM or greater
<b>Video</b>	16 MB of video memory
<b>Network (LAN)</b>	10/100 BaseT Network
<b>Network (WAN)</b>	384 Kbps upload* *An upload speed of 1Mbps is recommended for best video performance
<b>Browser</b>	Safari 6.0 and above** (Mac)

**NOTE:** If a user connects to the system remotely, there may be slow performance when accessing the system locally. This is normal, and not a malfunction.

\*\* For the latest compatibility list, check [www.lorextechnology.com](http://www.lorextechnology.com), as new software versions are released to the market.

## Step 1 of 3: Connect your DVR to Your Router

- 1 Power off your DVR by turning the power switch to ●.
- 2 Connect an Ethernet cable (included) to the **LAN** port on the rear panel of the DVR. Connect the other end of the Ethernet cable to an empty LAN port (usually numbered 1~4) on your router.
- 3 Turn the power switch to I to power the DVR back on.

8-channel model shown

## Step 2 of 3: Obtain the DVR's Device ID

The Device ID is a unique code that allows your system to handshake with the Lorex servers for connection over the Internet.

**To find the Device ID.**

- 1 Press the **PTZ/** button on the front panel of the DVR to open the System Information window.

- 2 Write down the **Device ID** of the DVR.

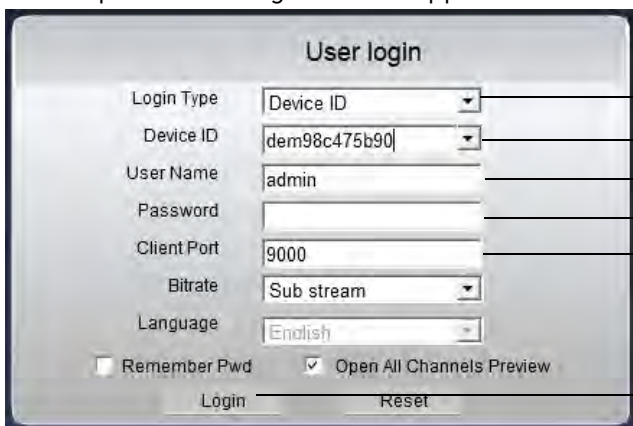

## Step 3 of 3: Connect to the DVR Over the Internet

Follow the steps below to connect to the DVR over the Internet using a PC or Mac.

**NOTE: Make sure to upgrade your DVR to the latest firmware version.** You must have the latest DVR firmware and client software to connect to the DVR over the Internet.

### PC

- 1 Insert the software CD that comes included with the system. Open the CD and click **DVR Software**→**Lorex Client Software - PC**. Follow the on-screen instructions to install.
  - **OR**, download the **Client Software for PC** from [www.lorextechnology.com](http://www.lorextechnology.com).
- 2 Once installation is finished, double-click the **Lorex Stratus Client 1 icon** () from the desktop. The DVR login screen appears.

The screenshot shows the 'User login' window with the following fields and annotations:

- Login Type:** A dropdown menu set to 'Device ID'. Annotation: 'Select Device ID'.
- Device ID:** A text box containing 'dem98c475b90'. Annotation: 'Enter Device ID'.
- User Name:** A text box containing 'admin'. Annotation: 'Enter User Name (default: admin)'.
- Password:** An empty text box. Annotation: 'Enter Password (default: 000000)'.
- Client Port:** A text box containing '9000'. Annotation: 'Enter Client Port (default: 9000)'.
- Bitrate:** A dropdown menu set to 'Sub stream'.
- Language:** A dropdown menu set to 'English'.
- Remember Pwd:** An unchecked checkbox.
- Open All Channels Preview:** A checked checkbox.
- Login:** A button at the bottom left. Annotation: 'Click Login'.
- Reset:** A button at the bottom right.

- 3 Under **Login Type**, select **Device ID**.
- 4 Under **Device ID**, enter the **DVR's Device ID**. Press **PTZ/**  on the front panel to find the Device ID.
- 5 Under **User Name**, enter the DVR's **user name** (default: **admin**).
- 6 Under **Password**, enter the DVR's **password** (default: **000000**).
- 7 Under **Client Port**, enter the DVR's **Client Port** (default: **9000**).
- 8 Click **Login**.
  - If this is the first time connecting to your system, you will be prompted to change the password. Enter the new password and click **OK**.

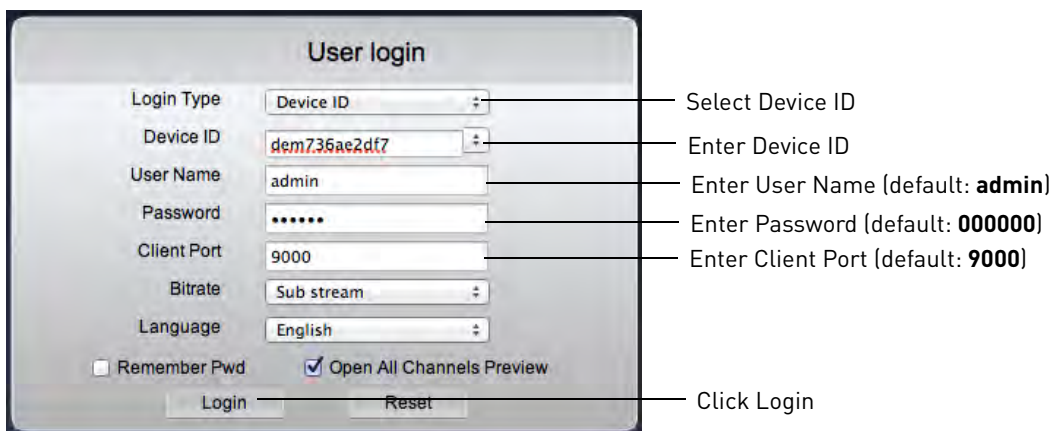

The screenshot shows the 'Change Password' window with the following fields and annotations:

- Current password is insecure, please change the password:** A red message at the top.
- New Password:** An empty text box. Annotation: 'Enter the new password and click OK'.
- Confirm Password:** An empty text box.
- OK:** A button at the bottom left.
- Cancel:** A button at the bottom right.

- Enter the new password in the login screen and click **Login** to connect to the DVR. The Client Software connects to your DVR and streams live video from your cameras.

## Mac

- 1 Visit [www.lorextechnology.com](http://www.lorextechnology.com) and download the **Client Software for Mac**.
- 2 Extract the installer file and double-click it to install.
- 3 Open Safari, then click **Safari→Quit Safari**. This resets Safari to complete the installation.
- 4 Open the **Lorex Stratus Client** (  ) from the Applications list.

- 5 Under **Login Type**, select **Device ID**.
- 6 Under **Device ID**, enter the **DVR's Device ID**. Press **PTZ/**  on the front panel to find the Device ID.
- 7 Under **User Name**, enter the DVR's **user name** (default: **admin**).
- 8 Under **Password**, enter the DVR's **password** (default: **000000**).
- 9 Under **Client Port**, enter the DVR's **Client Port** (default: **9000**).
- 10 Click **Login**.
  - If this is the first time connecting to your system, you will be prompted to change the password. Enter the new password and click **OK**.

- Enter the new password in the login screen and click **Login** to connect to the DVR.

The Client Software connects to your DVR and streams live video from your cameras.

# Using the PC/Mac Client Software

Upon login, the Live tab opens. The Client Software interface is the same on PC or Mac.

- 1 Navigation Tabs:** Allows you to access the following tabs:
  - **Live:** Watch live video.
  - **Playback:** View saved video footage.
  - **Remote Setting:** Configure system and networking options.
  - **Local setting:** Configure where local files are stored on your hard drive.
  - **Logout:** Exits remote viewing.
- 2 Active Channel List:** Displays channels that are currently live.
- 3 Main Screen:** Main display screen for live viewing and playback. You can also drag the screens to any desired position.
- 4 Viewing options:**
  - : Click to open all connected channels.

- : Click to close all connected channels. Note that the system continues to record when you close channels remotely.
- : Previous page.
- : Next page.
- : Click to open the selected channel in full screen view.
- : Click to select the desired split-screen viewing options.

**5 Split screen viewing:** Click the desired viewing mode.

**6 Mute:** Click to mute audio.

**7 PTZ Controls:** PTZ (Pan, Tilt, Zoom) control for connected PTZ cameras (not included).

**8 Connection Status:** Shows the type of connection used.

- **P2P** (peer-to-peer) indicates that the video is streaming directly from the DVR to the computer running the Client Software.
- **RELAY** indicates that the video is streaming through a Lorex video server. While relay mode is activated, the system will disconnect after 10 minutes of inactivity. Relay mode is only used when a direct connection cannot be made between the DVR and computer.

## Changing Viewing Modes

You can change the number of channels that the system displays simultaneously (i.e. Split-screen Mode, Single-channel Mode, etc.).

**To change the DVR's viewing mode:**

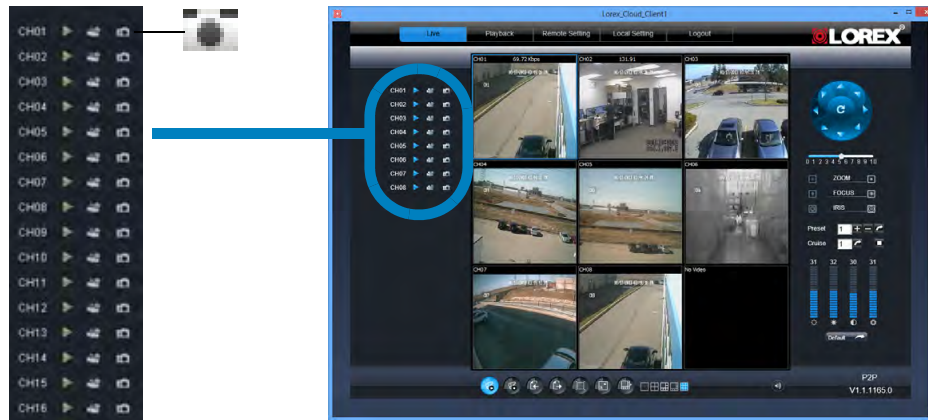

- Click one of the following:  .
- If the controls are not shown, click .

## Taking Screen Shots

The system can take screen shots of a selected channel during live view.

**To take a screen shot of a channel:**

- 1 Click  beside the desired channel to capture an image.

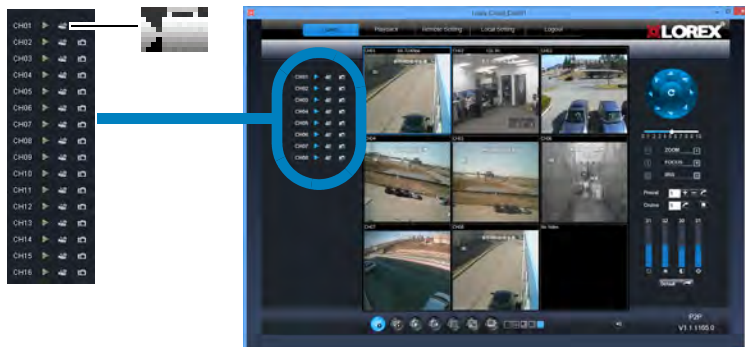

- 2 A pop-up window opens on the bottom left corner of the window. Click **Preview** to view the image or **Folder** to show the image in the save folder.

## Recording Video

You can record video footage directly onto your local hard drive. Once the video is in your hard drive, you can back up the video footage onto record-able media such as USB memory keys and blank CD/DVD media.

**To record video:**

- 1 Click  next to the channel that you wish to capture video from. The video will record to the default save directory.

- 2 Click  to stop video recording.

## Showing / Hiding Channels

The Active Channel List is a convenient way to show / hide the cameras that display in the main viewing window.

**To show or hide video in the main video window:**

- 1 Click  beside the channel number to show a channel. Click  again to hide the channel.

## Viewing the Bit Rate

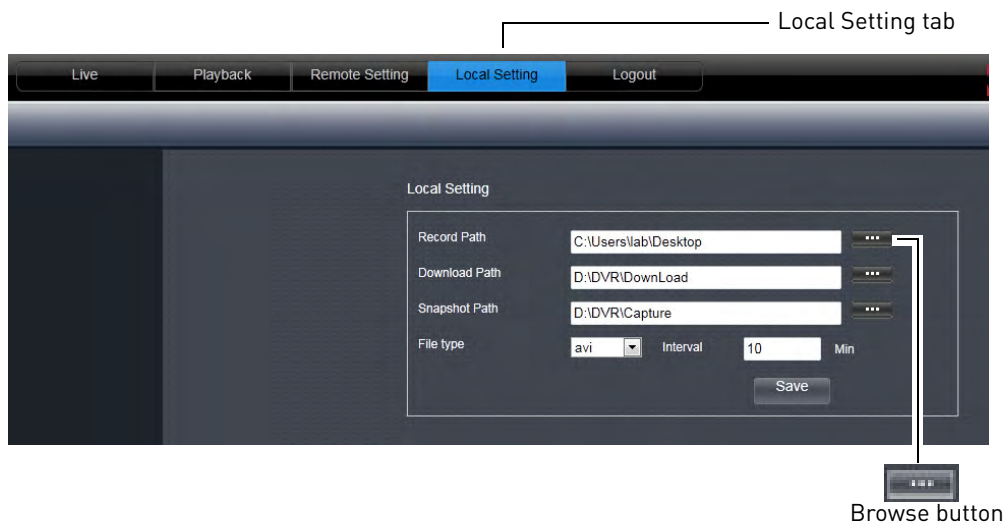

- Right-click on a channel and click **Show Bit** rate to display the video bit rate.

## Changing the Save Directory of Screenshots or Recorded Video

- 1 Click the **Local Setting** tab.
- 2 Click  beside the desired category to browse for a save directory.

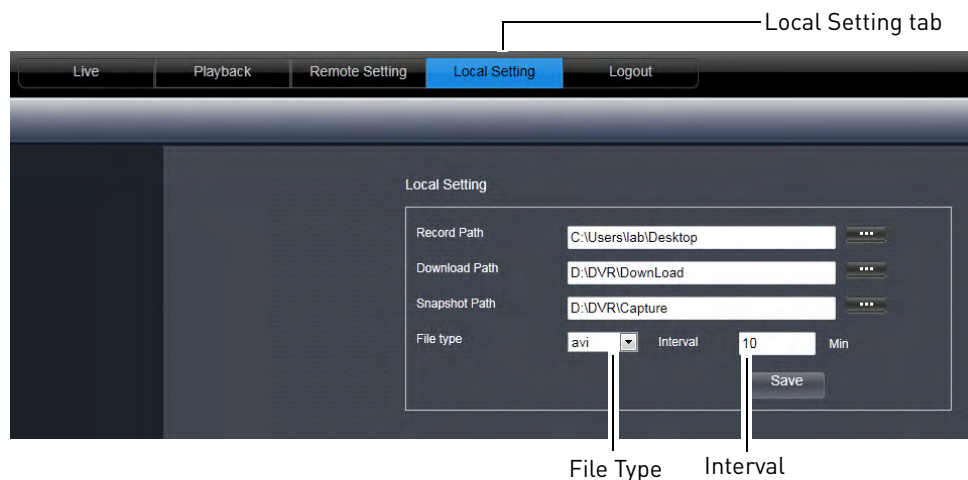

- 3 Select the desired save directory, and then click **OK**.
- 4 Click **Save** to save your changes.

## Changing the Format of Recorded Video (PC Only)

You can change the format of recorded video saved using Remote Surveillance. This allows you to directly backup footage from your DVR as an .avi file. This does not affect the format of video files that are backed up locally on the DVR (i.e. using a USB flash drive).

**NOTE:** This feature is not available via Mac.

- 1 Click the **Local Setting** tab.
- 2 Under **File Type**, select the file format you would like to use when saving video (**264** or **avi**).

- 3 (Optional) Under **Interval**, select the maximum length (in minutes) for video saved on the remote computer.
- 4 Click **Save** to save your changes.

## Configuring PTZ Settings

The system supports remote PTZ controls for compatible PTZ cameras (not included).

- For details on connecting PTZ cameras to your system, see “Appendix B: Connecting a PTZ Camera” on page 102.

### To control the PTZ settings on the DVR:

- 1 From the Live tab, double-click to select the channel the PTZ camera is connected to.
- 2 Use the PTZ control panel to control the pan, tilt, zoom, focus, and iris control of the camera.

## Video Playback

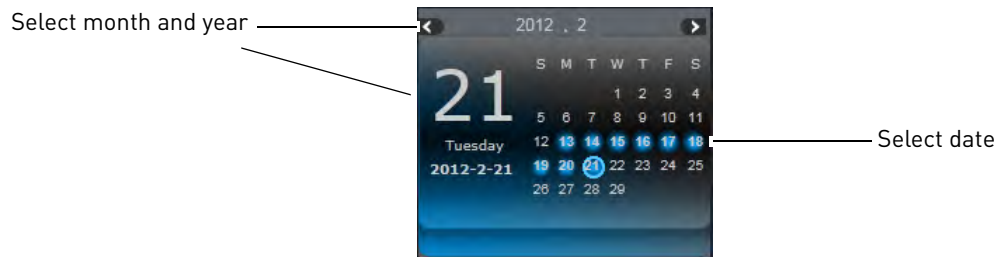

Video playback allows you to watch video that has been saved in the DVR's hard drive.

### To playback video:

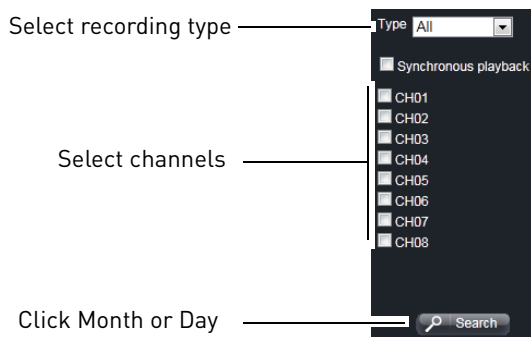

- 1 Click the **Playback** tab.

- 2 In the calendar window, click the desired month, year, and date.

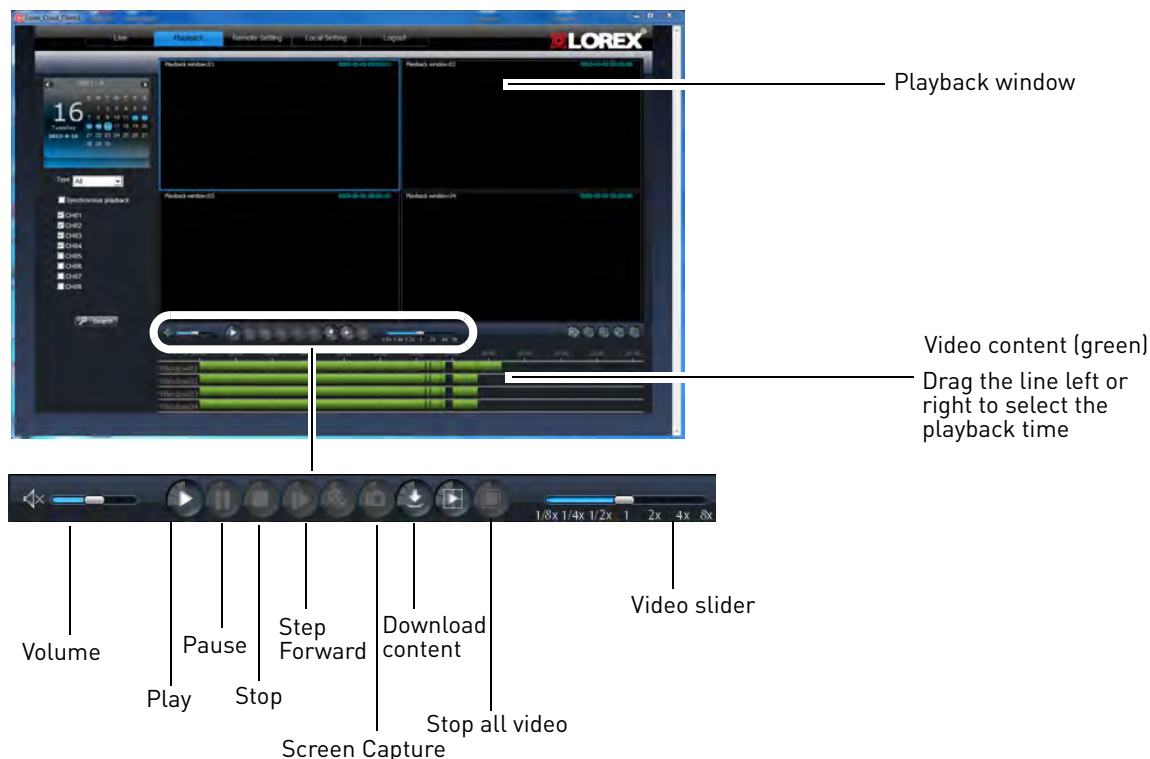

- 3 Under the **Type** drop-down menu, select the desired recording type you wish to search for (Continuous, Alarm, or All).
- 4 Select the channels you wish to search. Check **Synchronous playback** to play all selected channels at the same time.

- 5 Click the **Search** button.
- 6 Click **Play** to begin playback.

## Video Playback Controls

- **Step Forward:** Plays video frame by frame. Click the Step Forward button to advance the video by 1 frame.
- **Video Slider:** Drag the slider to control the playback speed.
- **Download Content:** Allows you to download recorded videos to your computer hard drive. To download video, click the channel you want to back up and click the Download content button. A list of files appears. Select the files you want to back up and click **Start Download**.

## Configuring Display Settings

- 1 Click the **Remote Setting** tab, and then click **Display→Live**.

2 Configure the following:

- **Channel:** Select the channel you want to modify.
- **Name:** Enter the channel name if you want to re-name the channel
- **Position:** Select the position of where the title appears in the channel.
- **Covert:** **Enable** or **Disable** covert recording. Covert recording will hide the channel on the DVR's local display. You will be able to see the channel when you log in remotely.
- **Show Time:** Select **Enable** or **Disable** to show or hide the time on the DVR's local display.
- **Record Time:** Select **Enable** or **Disable** to show or hide the record time on the remote display.

3 Click **Save** to apply your settings.

## Configuring Privacy Zone Settings

**ATTENTION:** Areas covered by privacy zones are not visible in recordings.

You can blank out a certain portion of the channel with a black box.

**To configure a privacy zone:**

1 Click the **Remote Setting** tab, and then click **Display→Privacy Zone**.

2 In the **Channel** drop-down menu, select the channel you wish to configure.

3 Select the **Privacy Zone** checkbox to enable privacy masking.

4 Drag your mouse cursor over the areas you wish to black out. A red box indicates the area that is masked (blocked out).

Drag mouse over desired area

- To remove a privacy area, click on the red box, then click the **Delete** button.

5 Click **Save** to apply your settings.

## Configuring Recording Parameters

To configure system recording parameters:

- 1 Click the **Remote Setting** tab, and then click **Record→Rec Parameters**.

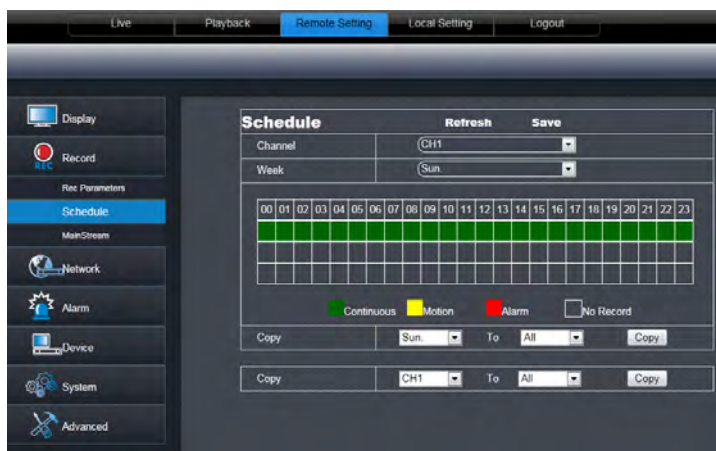

- 2 Configure the following:
  - **Channel:** Select the channel you wish to configure.
  - **Record:** Select **Enable** or **Disable** to start or stop system recording.
  - **Pre-record:** Select whether to enable or disable pre-recording.
- 3 Click **Save** to apply your settings.

## Configuring the Recording Schedule

To configure the recording schedule:

- 1 Click the **Remote Setting** tab, and then click **Record→Schedule**.
- 2 Configure the following:
  - **Channel:** Select the channel you wish to configure.
  - **Week:** Select the day of the week you would like to apply the settings to.

The recording schedule is arranged as a grid. Each row represents a recording type (Continuous, Motion, and Alarm), and each box represents an hour.

- 3 Click the recording grid, and select the type and duration of recording.

- 4 (Optional) Use the top **Copy** and **Copy To** drop-down to copy the recording schedule to a specific day or all days. Click **Copy** to copy the schedule.
- 5 (Optional) Use the bottom **Copy** and **Copy To** drop-down to copy the recording schedule to a specific channel or all channels. Click **Copy** to copy the schedule.
- 6 Click **Save** to apply your settings.

## Configuring System Recording Quality

- 1 Click the **Remote Setting** tab, and click **Record→MainStream**.

- 2 Configure the following:
  - **Channel:** Select the channel you wish to apply the settings to.
  - **FPS (Framerate):** Select the desired recording frame rate. Note that higher frame rates require greater bandwidth consumption during remote viewing.
  - **Audio:** Select whether you want the system to record audio (audio cameras required, not included).
- 3 Click **Save** to apply your settings.

## Configuring Basic Network Settings

The basic network menu allows you to configure the network protocol type (DHCP or Static).

**To configure basic network settings:**

- 1 Click the **Remote Setting** tab, and click **Network**.

- 2 Configure the following under Basic Configuration:
  - **Type:** Select between **DHCP** or **Static**. If you select Static, you can edit the IP address, Subnet Mask, Gateway, and DNS settings.
  - **Auto Port Forwarding:** Select **Enable** or **Disable** to enable or disable the Auto Port Forwarding feature.
- 3 Click **Save** to apply your settings.

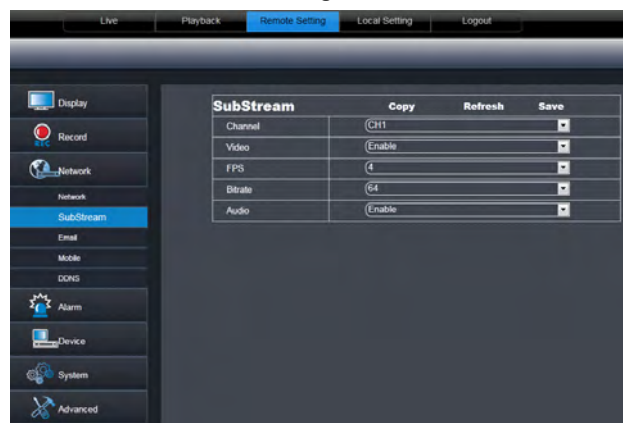

## Configuring the System Substream

You can adjust the data streaming rate (also called the SubStream) when you connect to the system remotely. If you want to conserve bandwidth, select a lower frame rate and bitrate.

**NOTE:** Setting your system to stream with a lower frame and bitrate may cause the video to appear choppy or slow.

**To configure the system's substream:**

- 1 Click the **Remote Setting** tab, and click **Network→SubStream**.

- 2 Configure the Substream settings:
  - **Channel**: Select the channel you wish to apply the settings to.
  - **FPS (Framerate)**: Select the desired recording frame rate. Note that higher frame rates require greater bandwidth consumption during remote viewing.
  - **Bitrate**: Select the desired video bitrate.
  - **Audio**: Select **Enable** or **Disable** to enable or disable the system from streaming audio when viewing the system remotely.
- 3 Click **Save** to apply your settings.

## Configuring Email Notification Settings

To configure email notification settings:

- 1 Click the **Remote Setting** tab, and click **Network→ Email**.

- 2 In the Email drop-down menu, select **Default** to use the default Lorex email server (recommended) or select **Custom** to use your own custom SMTP email server.

**If you want to use Lorex's email server (recommended):**

- 1 In the **Sender Email** field, enter the email address of the sender. This can be any email address of your choice.
- 2 In the **Receiver Email** field, enter the email address you want the DVR to send alarm notifications to.
- 3 In the **Interval** drop-down menu, enter the duration the DVR must wait before sending out a new notification.

For example, if you select a 3 minute interval, the DVR will send out email notifications every 3 minutes until the DVR stops detecting motion / alarm. The DVR will only send out notifications when it detects motion/alarm triggers.

- 4 Click **Save** to save your settings.

**If you select "Enable", and want to use your own email server:**

- 1 Configure the following:
  - **SSL**: Select **Enable** or **Disable** to enable/disable Secure Socket Layer protocol.

- **SMTP Port:** Enter your server's SMTP port.
- **SMTP Server:** Enter your SMTP Server address.
- **Sender Email:** Enter the sender email address. This can be any address of your choice.
- **Sender Password:** Enter your email server's password.
- **Receiver Email:** Enter the recipient's email address.
- **Interval:** Enter the interval the DVR waits before sending a new email notification.

- 2 Click **Save** to save your settings.

## Configuring DDNS Settings

Lorex DDNS is available as an optional connectivity option. Please see "Appendix E: DDNS Setup (Advanced)" on page 111 for details.

The primary connectivity option uses the Lorex Stratus service to connect to your system over the Internet without requiring port forwarding or DDNS registration. For details, See "Connecting to Your DVR Over the Internet on PC or Mac" on page 53.

### To configure DDNS settings:

- 1 Visit <http://www.lorexddns.net> and register for a free Lorex DDNS account.
- 2 Click the **Remote Setting** tab, and click **DDNS**.

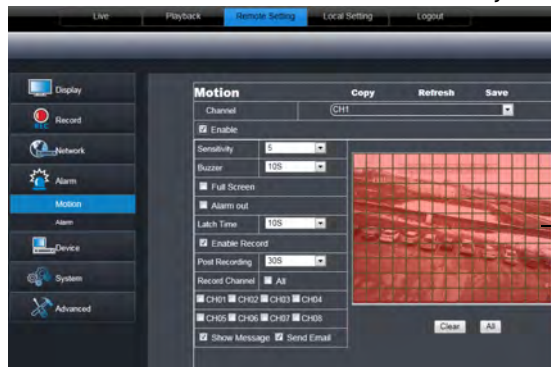

DDNS		Refresh	Save
DDNS	Enable		
Server	LOREXDDNS		
Domain Name	lorexddns.net		
User Name			
Password			

- 3 Configure the following:
  - **DDNS:** Select **Enable** or **Disable**.
  - In the **Server** drop-down menu, select **LOREXDDNS**.
  - **Domain Name:** Enter your **Domain name/URL Request** from the confirmation email that was sent after you created your DDNS account.
  - **User name:** Enter your **DDNS User Name** that was emailed to you after DDNS registration.
  - **Password:** Enter your **DDNS Device password** that was emailed to you after DDNS registration.
- 4 Click **Save** to apply your settings.

## Configuring Motion Detection Settings

To configure motion settings:

- 1 Click the **Remote Setting**, and click **Alarm→Motion**.
- 2 Configure the following motion recording parameters:
  - **Channel**: Select the channel you wish to apply the settings to.
  - **Enable**: Select this checkbox to enable motion recording.
  - **Sensitivity**: Select the desired motion detection sensitivity. The greater the value, the greater the motion sensitivity.
  - **Buzzer**: Select **OFF** to disable the buzzer when the system detects a motion event or select the duration of the buzzer after the system detects a motion event.

Click and drag to configure motion detection areas  
**Red**: Motion detection enabled  
**Clear**: Motion detection disabled

- **Alarm Out**: Select the checkbox to trigger connected alarm devices.
  - **Full Screen**: Select the checkbox so that the channel goes into full screen mode when motion is detected.
  - **Enable Record**: Select to enable system recording when motion is detected.
  - **Post Recording**: Select the post-recording time after a motion event occurs.
  - **Record Channel**: Select the channels that should record during a motion event.
  - **Show Message**: Select the checkbox to enable the system to display a warning message during a motion event.
  - **Send Email**: Select the checkbox for the system to send a email notification during a motion event.
- 3 Drag your mouse cursor in the window to select the desired area to monitor the channel for motion.
  - 4 Click **Save** to apply your settings.

## Configuring your System to "Beep" During Motion

You can set your system to "beep" during motion. This is useful to notify you if someone enters or exits an area.

To configure the system to "beep" during motion:

- 1 Click the **Remote Setting** tab, and click **Alarm→Motion**.
- 2 In the **Channel** drop-down menu, select the channel you wish to configure.

- 3 Select the **Enable** checkbox.
- 4 Beside the **Buzzer** drop-down menu, select the "beep" duration or select **OFF** to disable the "beep."
- 5 In the video window, select the area you wish to monitor for motion.
- 6 Click **Save** to apply your settings.

**Result:** The system beeps when it detects motion, and a green "M" icon appears. The green "M" icon indicates that the system is only detecting motion, but not recording. To have the system record motion events, enable motion recording in the recording calendar (**Remote Setting tab→Record→Schedule**).

## Configuring Alarm Notifications

Configure the settings for alarm devices (not included).

**To configure alarm notifications:**

- 1 Click the **Remote Setting** tab, and click **Alarm→Alarm**.

Alarm		Copy	Refresh	Save
Alarm In	CH1			
Alarm Type	NO			
Buzzer	OFF			
Latch Time	10S			
<input checked="" type="checkbox"/> Show Message <input checked="" type="checkbox"/> Send Email <input type="checkbox"/> Full Screen				
<input type="checkbox"/> Alarm Out				
<input checked="" type="checkbox"/> Enable Record				
Post Recording	30S			
Record Channel	<input type="checkbox"/> All			
<input checked="" type="checkbox"/> CH01 <input type="checkbox"/> CH02 <input type="checkbox"/> CH03 <input type="checkbox"/> CH04 <input type="checkbox"/> CH05 <input type="checkbox"/> CH06 <input type="checkbox"/> CH07 <input type="checkbox"/> CH08				

- 2 Configure the following:
  - **Alarm In:** Select the channel that you wish to configure.
  - **Alarm Type:** Select the alarm type **N/O** (normally open), **N/C** (normally closed), or select **OFF**.
  - **Buzzer:** Select the "beep" duration when an event occurs.
  - **Latch Time:** Select the desired latch time when an alarm triggers.
  - **Show Message:** Select the checkbox so that the system displays a warning message during an alarm recording.
  - **Send email:** Select the checkbox for the system to send out email alerts during alarm recording.
  - **Full Screen:** Select the checkbox to enable the system to go into Full-screen View when an alarm triggers.
  - **Alarm out:** Select the checkbox to enable alarm out devices to activate.
  - **Enable Record:** Select the checkbox to enable system recording when an alarm triggers.
  - **Post Recording:** Select the desired post recording time after an alarm triggers.

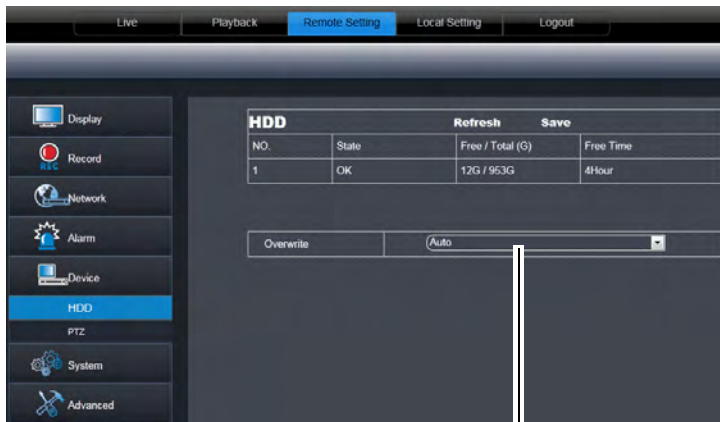

- **Record Channel:** Select the channels that the system should record during an alarm trigger.

3 Click **Save** to apply your settings.

## Configuring Hard Drive Recording Mode

To configure the hard drive recording mode:

1 Click the **Remote Setting** tab, and click **Device→HDD**.

Overwrite drop-down menu

2 In the Overwrite drop-down menu, select **Auto** to enable overwrite mode. When overwrite is enabled, the system deletes the oldest footage (first in, first out) when the hard drive is full.

You can also select a desired amount of days the system should retain data. For example, if you select 30 days, the hard drive will begin to overwrite itself after 30 days. Note that your hard drive must be large enough to store video for the selected duration.

3 Click **Save** to apply your settings.

## Configuring PTZ Parameters

The system is capable of controlling PTZ cameras (not included) that are connected to the system. Please note that you will need PTZ information from the PTZ camera manufacturer's users guide. For details on connecting a PTZ camera to your system, see "Appendix B: Connecting a PTZ Camera" on page 102.

**To configure PTZ settings:**

- 1 Click the **Remote Setting** tab, and click **Device→PTZ**.

- 2 Configure the following:
  - **Channel:** Select the channel that the PTZ camera connects to.
  - **Protocol:** Select the protocol of the PTZ camera\*.
  - **Baud Rate:** Select the baud rate of the PTZ camera\*.
  - **Data Bit:** Select the data bit rate of the PTZ camera\*.
  - **Stop Bit:** Select the stop bit rate of the PTZ camera\*.
  - **Parity:** Select the parity settings of the PTZ camera\*.
  - **Cruise:** Select Enable or Disable\*.
  - **Address:** Select the address of the PTZ camera\*.

\*Consult the PTZ camera's instruction manual for protocol and configuration details

- 3 Click **Save** to apply your settings.

## Configuring the System Time and Date

**To configure the system time and date:**

- 1 Click the **Remote Setting** tab, and click **System→General**.

- 2 Configure the system format and time:
  - **System Time:** Enter the desired system time and date. An on-screen calendar appears when you click the date.
  - **Date Format:** Select the desired format the date is displayed in.

- **Time Format:** Select between 12 hour or 24 hour time formats.

- 3 Select **DST** to enable daylight savings time, or **NTP** to sync the time with a NTP time server.

**NOTE:** Using the NTP feature requires that your DVR have a constant Internet connection.

## Changing the System's Menu Time Out

To change the system's time out menu:

- 1 Click the **Remote Setting** tab, and click **System→General**.
- 2 In the **Menu Timeout** drop-down menu, select the duration the menu stays on screen before disappearing.
- 3 Click **Save** to apply your changes.

## Configuring System User Accounts

You can add user accounts on the system.

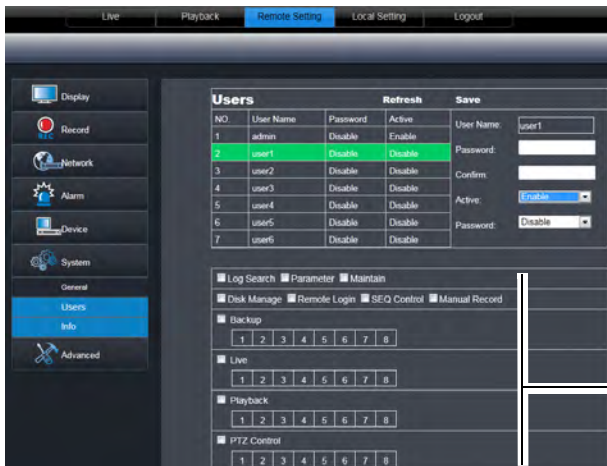

To configure the user accounts menu:

- 1 Click the **Remote Setting** tab, and click **System→Users**.

- 2 Configure the following:
  - Click the desired user you wish to configure (i.e. user1).
  - **User name:** Enter the desired user name.
  - **Password:** Enter the desired user password.
  - **Confirm:** Re-enter the user password.
  - **Active:** Select **Enable** or **Disable** to activate or de-activate a user account.
  - **Password:** Select **Enable** to require a user password when users log on.

- 3 Select the menus that the user will have access to.

The screenshot shows the 'Remote Setting' tab in the client software. On the left is a sidebar with icons for Display, Record, Network, Alarm, Device, System, General, Users, Info, and Advanced. The 'Users' section is active, displaying a table of users and a menu selection area on the right.

NO.	User Name	Password	Active
1	admin	Disable	Enable
2	user1	Disable	Disable
3	user2	Disable	Disable
4	user3	Disable	Disable
5	user4	Disable	Disable
6	user5	Disable	Disable
7	user6	Disable	Disable

Below the table is a 'Save' button and a 'Refresh' button. To the right of the table is a form for adding a new user with fields for User Name, Password, Confirm, Active (dropdown), and Password (dropdown).

Below the table is a section for selecting menu access:

- ☐ Log Search ☐ Parameter ☐ Maintain
- ☐ Disk Manage ☐ Remote Login ☐ SEQ Control ☐ Manual Record
- ☐ Backup
  - ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 ☐ 7 ☐ 8
- ☐ Live
  - ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 ☐ 7 ☐ 8
- ☐ Playback
  - ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 ☐ 7 ☐ 8
- ☐ PTZ Control
  - ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 ☐ 7 ☐ 8

An annotation points to the menu selection area: "Select the menus users will have access to".

- 4 Click **Save** to apply your settings.

## Viewing System Information

To view system information:

- 1 Click the **Remote Setting** tab, and click **System→Info**.

The screenshot shows the 'Remote Setting' tab with the 'Info' section selected. The 'Info' section displays system information in a table with a 'Refresh' button.

Info	Refresh
Device ID	dem4894c9a0
Device Type	JH158000
Firmware Version	V4.1.0-20130416
IE Version	V1.1.1161.0
IP Address	010.000.000.045
MAC Address	00-23-63-50-18-F4
Domain Name	DDNS is closed
HDD Capacity	149G/95.3G
Video Format	NTSC
Client Port	8000
HTTP Port	80

## Configuring Firmware Upgrades

Firmware upgrades can provide improved functionality to your DVR. When firmware upgrades become available, you will automatically be prompted to upgrade your system. **You must have the latest DVR firmware and client software to connect to the DVR over the Internet.**

**To configure firmware auto upgrades:**

- 1 Click the **Remote Setting** tab, and click **Advanced**→**Auto Upgrade**.

- 2 Under **Auto Upgrade**, select **Enable** to enable automatic firmware updates. Messages for firmware upgrades will appear on the DVR locally and via remote software.
- 3 Check **Check for update** to enable local messages on the DVR to notify you for updates. The system will check for firmware upgrades every hour.

**NOTE:** Click **Detect** to check for firmware updates manually.

- 4 Click **Save** to save changes.

## Manually Upgrading System Firmware

To manually upgrade the system firmware, download the latest firmware from the system's product page at [www.lorextechnology.com](http://www.lorextechnology.com).

**You must have the latest DVR firmware and client software to connect to the DVR over the Internet.**

**To upgrade the system firmware:**

- 1 Download and extract the file to your computer's desktop.
- 2 Click the **Remote Setting** tab, and click **Advanced**→**Firmware upgrade**.

- 3 Beside **Upgrade File Path**, click the browse button (  ). Locate the firmware, and click **Open**.
- 4 Click **Start** to begin the firmware upgrade.
- 5 Follow the on-screen instructions to complete the firmware upgrade.  
**NOTE:** Your system may have to restart after a firmware upgrade.

## Restoring Default Settings

To restore the system's system defaults:

- 1 Click the **Remote Setting** tab, and click **Advanced**→**Load Default**.

- 2 Select the menus that you wish to restore to factory defaults.
- 3 Click **Save** to restore system defaults for the selected items.

## Configuring Event Settings

The Event Settings tab allows you to configure how the system behaves when a system event occurs (e.g. hard drive error, video loss). This is useful if you want your DVR to notify you if there is a potential system problem.

To configure the system event settings:

- 1 Click the **Remote Setting** tab, and click **Advanced**→**Events**.

- 2 Configure the following:
  - **Event Type:** Configure the type of event that triggers the system to send an alert.
  - **Enable:** Select **Enable** to activate the system to notify you if an event occurs.

- **Buzzer:** Select **OFF** to enable/disable the system buzzer or select the duration of the system buzzer after an event occurs.
- **Show Message:** Select the checkbox to enable the system to display a warning message when an event occurs.
- **Send Email:** Select the checkbox to enable email notifications. Email notification must be enabled.
- **Alarm Out:** Enable or disable the alarm out panel.
- **Latch Time:** Configure the system latch time after an event occurs.

- 3 Click **Save** to save changes.

## Configuring Auto-Reboot

Auto-reboot allows the system to restart automatically at a set time or date. This improves system stability.

**To configure Auto Maintain:**

- 1 Click the **Remote Setting** tab, and click **Advance→Maintain**.
- 2 Click the **Auto Reboot** drop-down menu, and select **Enable** or **Disable** to activate or deactivate the auto-reboot feature.
- 3 Under **Reboot**, select how often you want the system to reboot and the time you want the system to reboot.

- 4 Click **Save** to apply your settings.

# Mobile Apps: Accessing your DVR Using a Mobile Device

You can remotely view camera streams from your DVR on compatible mobile phones and tablets. This system features connectivity using the exclusive Lorex Stratus solution, which allows for easy access using a mobile device without requiring network configuration or a computer to complete the setup.

**NOTE:** Up to 3 devices can connect to the system at the same time.

## Compatible Devices and Platforms

Platform	Supported Versions and Devices	App Name	Get App From
iOS	iOS v. 5.0 and higher iPhone/iPod Touch iPad (1st generation and above)	Lorex ECO Stratus	Apple App Store
Android	Android v. 2.2 and above	Lorex ECO Stratus	Google Play Store

For the latest device compatibility list, visit [www.lorextechnology.com](http://www.lorextechnology.com)

## iPhone / iPad

Use the **Lorex ECO Stratus** application to connect to your DVR on the iPhone or iPad.

**NOTE:** Resolution is scaled up for the iPad screen.

### Prerequisites

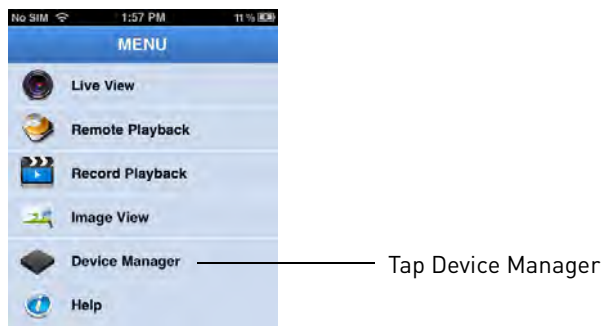

- iOS version 5.0 and above.
- An iTunes account (requires valid credit card number). Your credit card will not be billed when downloading the Lorex ECO Stratus App.
- Connect your DVR to your router using an Ethernet cable (included).
- **Make sure to upgrade your DVR to the latest firmware version.** You must have the latest DVR firmware and mobile apps to connect to the DVR over the Internet.

**NOTE:** For the latest device compatibility list, visit [www.lorextechnology.com](http://www.lorextechnology.com)

### Connecting to Your System Using Lorex ECO Stratus

- 1 Install the **Lorex ECO Stratus** app for free from the App Store.
- 2 Tap the Lorex ECO Stratus icon () to open the app.

### 3 Tap **Device Manager**.

### 4 Tap **+**.

### 5 Under **Name**, enter a name for your DVR of your choice.

### 6 Press the QR code icon ( ) next to Device ID and line up the QR code on the top of the DVR using the camera on your device.

#### OR

If your device does not have a camera (e.g. 1st generation iPad), manually enter the **Device ID** printed on the label.

### 7 Under **Client Port**, enter the **DVR's Client Port** (default: **9000**).

### 8 Under **User Name**, enter the DVR's User Name (default: **admin**).

### 9 Under **Password**, enter the **DVR's Password** (default: **000000**).

### 10 Tap **Press to retrieve channels**.

### 11 Tap **Save**. Then tap **Menu**.

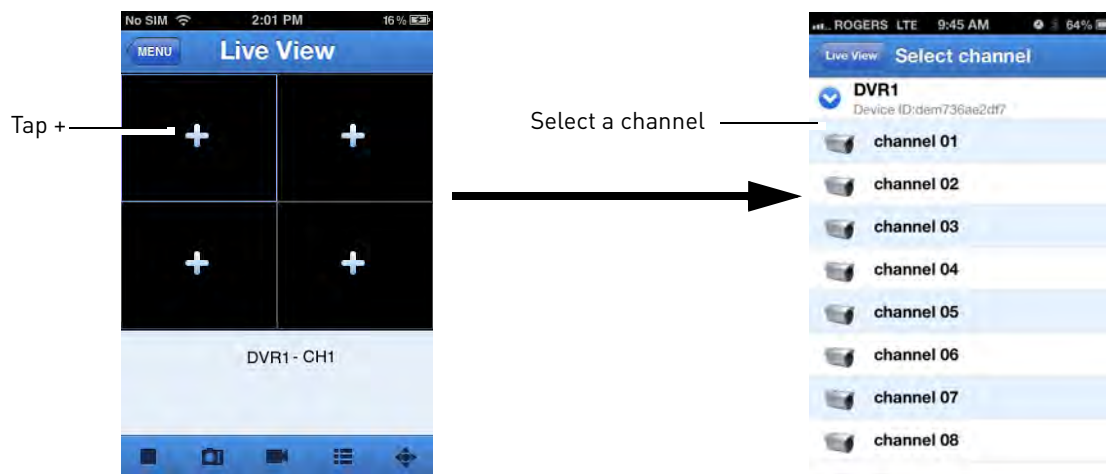

### 12 Tap **Live View**.

Scan the QR code on the top of the DVR to automatically add the DeviceID

- 13 Tap **+** in one of the display areas and select the channel you would like to view.

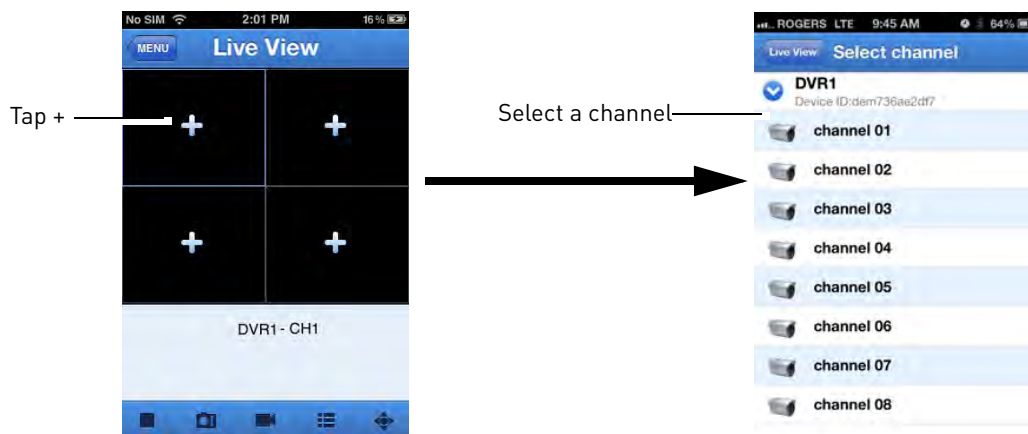

- 14 If this is the first time connecting, you will be prompted to change the DVR password. Tap **OK**.

- 15 Enter the new password and tap **Done**. This password will be used to connect to your system from now on.

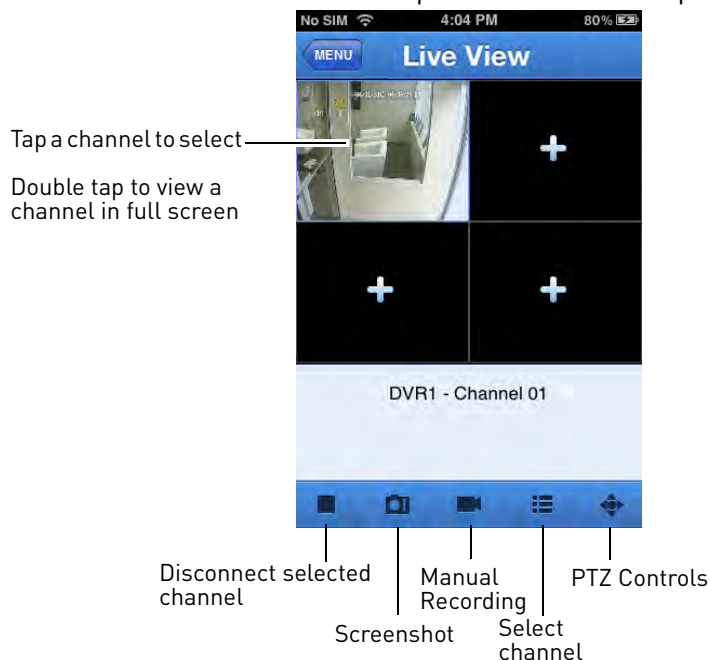

- 16 Tap **+** in one of the display areas and select the channel you would like to view. Repeat for any additional channels you would like to view.

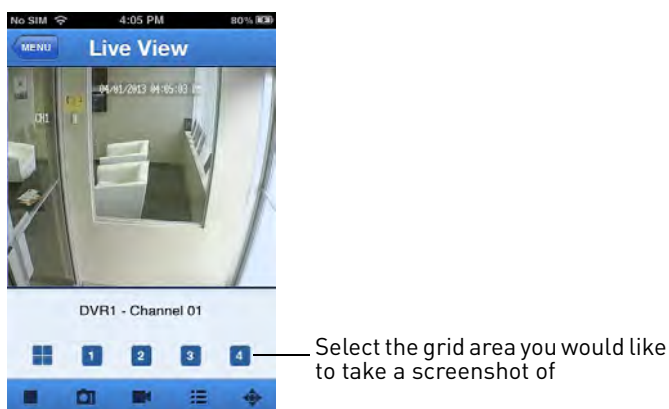

## Lorex ECO Stratus Interface

You can use Lorex ECO Stratus in both portrait and landscape mode.

### Taking Screenshots

- 1 Tap  during live view or playback.
  - If taking screenshots from live view: select the grid area you would like to take a screenshot from or tap  to take a screenshot from all connected cameras.

- 2 To view screenshots, see “Viewing Manual Recordings” on page 86.

### Taking Manual Recordings

- 1 Tap  during live view or playback.
  - If taking manual recordings from live view: tap the grid area you would like to start recording on. Tap again when you would like to stop recording.
  - If taking manual recordings from playback: tap  when you would like to stop recording.

- 2 To view manual recordings, see “Viewing Screenshots” on page 85.

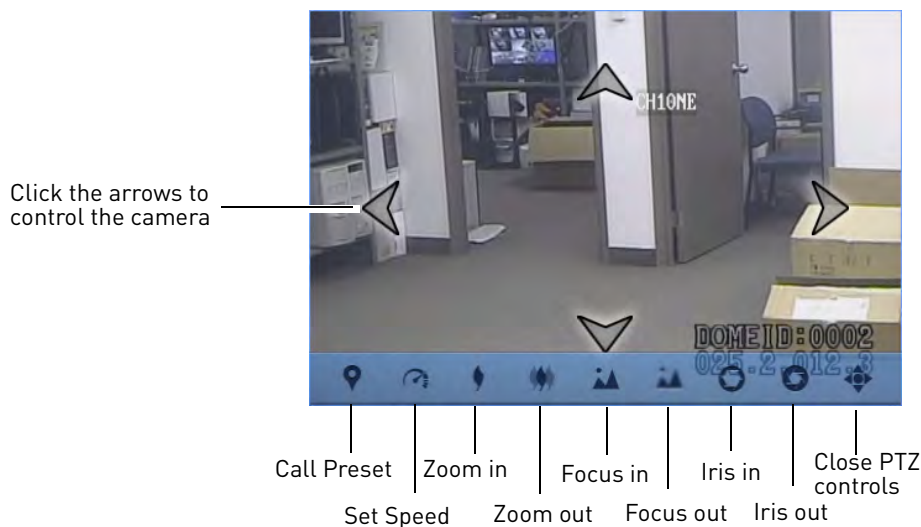

### Using PTZ Controls

If you have a PTZ camera (not included) connected, you may control it using the app.

**NOTE:** You must configure the system to communicate with the PTZ camera locally before you can control it using the app. For details, see “Appendix B: Connecting a PTZ Camera” on page 102.

#### To use PTZ Controls:

- 1 Tap the channel with your PTZ camera.
- 2 Tap  to open PTZ controls.
- 3 Double-tap the channel to select it in full screen. Use the PTZ controls.

### Using Remote Playback Mode on iPhone/iPad

Remote Playback Mode allows you to view recorded video saved on your DVR’s hard drive.

#### To use remote playback mode:

- 1 From the Main Menu, tap **Remote Playback**.
- 2 Tap **Select Channel**. Select the channel you would like to playback from.

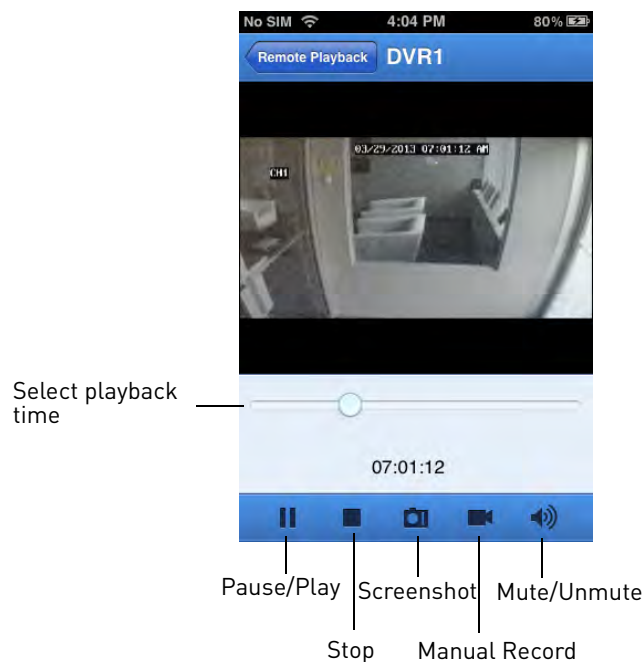

Select channel — Tap select channel

- 3 The calendar shows any days that have recorded video for the selected channel with dots under the date. Tap on a date to view video from that day. Swipe up or down to change the month shown in the calendar.

- 4 Playback begins at the earliest available recordings from the selected day. Use the on-screen playback controls.

## Viewing Screenshots

You can view screenshots or email them using the app.

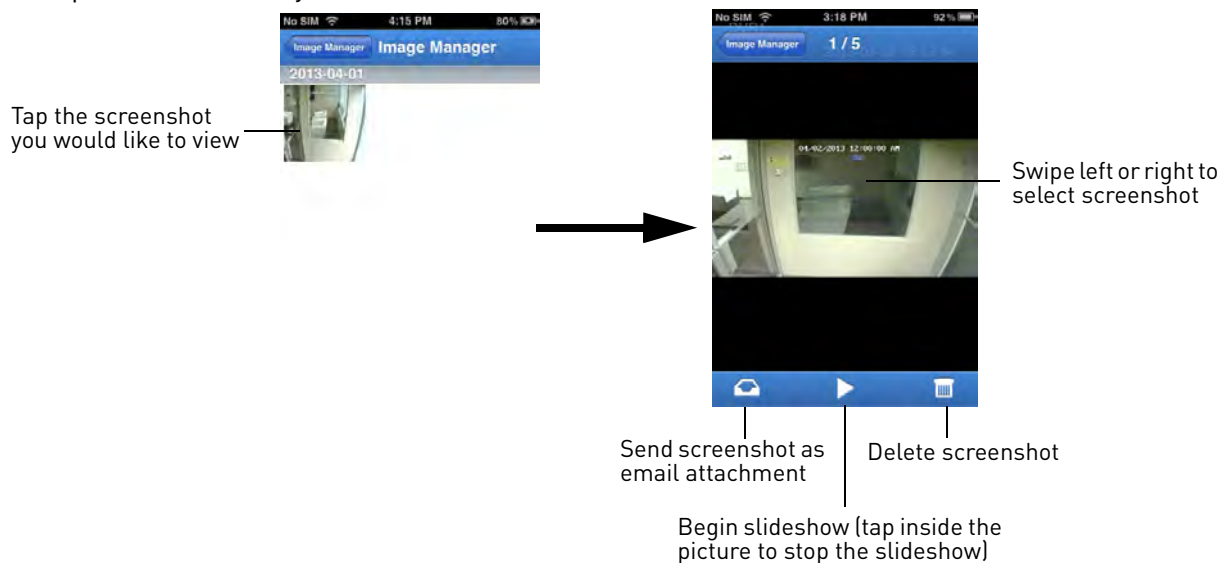

**NOTE:** To email screenshots, you must have an email account configured in the Email app. Lorex does not support the Email app. Please refer to your iPhone/iPad user's guide or [www.apple.com](http://www.apple.com) if you need support to set up the Email app.

### To view screenshots:

- 1 From the Main Menu, tap **Image Manager**.
- 2 Select the DVR with screenshots you would like to view.

### 3 Tap the screenshot you would like to view.

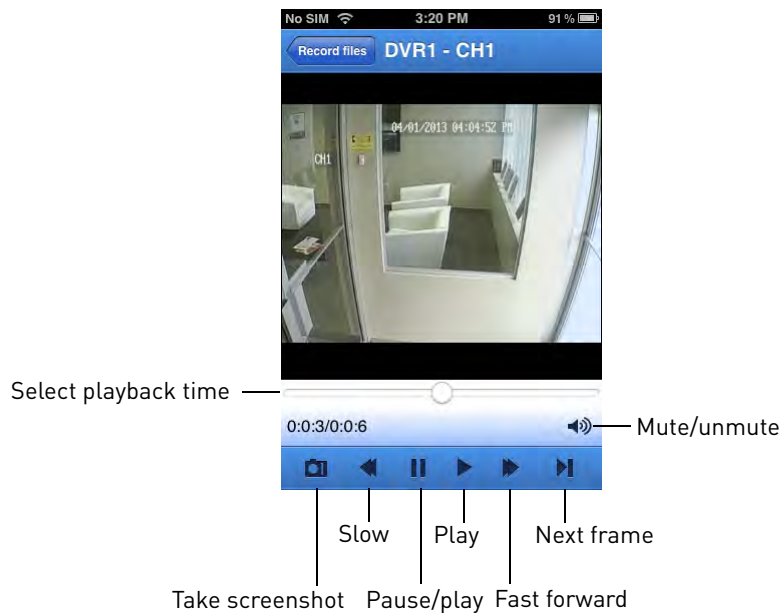

## Viewing Manual Recordings

You can view manual recordings using the app.

### To view manual recordings:

- 1 From the Main Menu, tap **Record Playback**.
- 2 Tap the DVR you would like to view manual recordings from.
- 3 Tap the recording file you would like to view.
- 4 Use the on-screen controls.

## Using Device Manager to Manage DVR's

You can use the Device Manager to add, delete, or modify your DVR's.

### To delete a DVR:

- 1 From the Main Menu, tap **Device Manager**.
- 2 Swipe to the right on the DVR you would like to delete and tap **Delete**.

Swipe right to delete a DVR

- 3 Tap **Delete** to confirm.

### To modify a DVR:

- 1 From the Main Menu, tap **Device Manager**.
- 2 Tap on the DVR you would like to modify.
- 3 Change the connection details as needed and then tap **Save**.

## Android

Use the **Lorex ECO Stratus** application to connect to your DVR on an Android smartphone or tablet.

**NOTE:** The instructions below may differ depending on the model of your Android device.

### Prerequisites

- Android v. 2.2 and above.
- Connect your DVR to your router using an Ethernet cable.
- **Make sure to upgrade your DVR to the latest firmware version.** You must have the latest DVR firmware and mobile apps to connect to the DVR over the Internet.

**NOTE:** For the latest device compatibility list, visit [www.lorextechnology.com](http://www.lorextechnology.com)

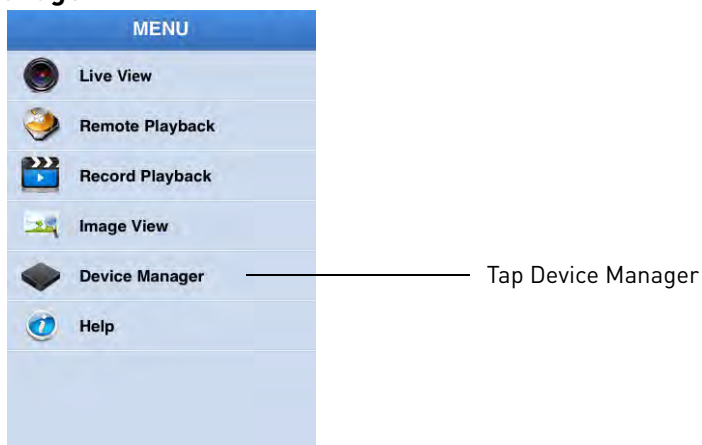

### Connecting to Your System Using Lorex ECO Stratus

- 1 Install **Lorex ECO Stratus** from the Google Play Store.

**NOTE:** For support on downloading or installing Android apps, consult your Android device's user's manual or the manufacturer's support site.

- 2 Tap the Lorex ECO Stratus icon (  ) to open the app.

- 3 Tap **Device Manager**.

- 4 Tap **Add**.

- 5 Under **Device Name**, enter a name for your DVR of your choice.

- 6 Tap the QR code icon (  ) next to **Device ID**, and use the camera on your device to line up the QR code on the top of the DVR.

**OR**

If your device does not have a camera, manually enter the **Device ID** printed on the label.

- 7 Under **Client Port**, enter the **Client Port** (default: **9000**).
- 8 Under **UserName**, enter the DVR's user name (default: **admin**).
- 9 Under **Password**, enter the system password. By default the password is **000000**.
- 10 Tap **Press to retrieve channels**.
- 11 Tap **Save**. Then tap **Back**.
- 12 Tap **Live View**.
- 13 Tap inside one of the display areas and then tap **Select**. Select the channel you would like to view.

Enter Device Name — Device Name ECO4

Tap icon to scan QR code — Login Type Device ID

Device ID dema66d2516

Enter Client Port (default: 9000) — Client Port 9000

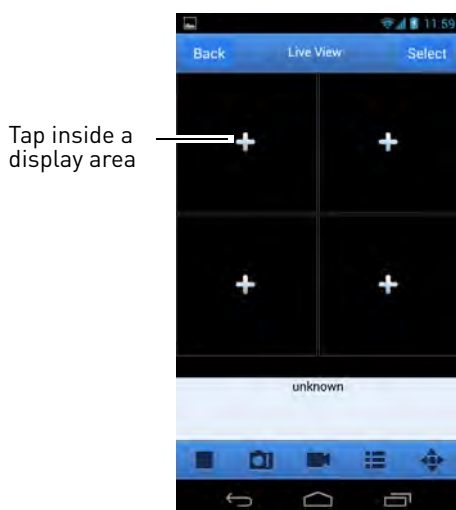

Enter User Name (default: admin) — User Name admin

Enter Password (default: 000000) — Password .....

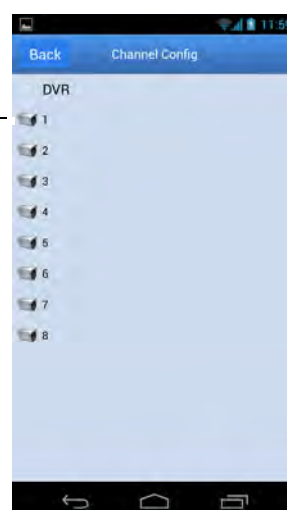

Channels 8

Tap press to retrieve channels — Press to retrieve Channels

Scan the QR code on the top of the DVR to automatically add the Device ID

Select a channel

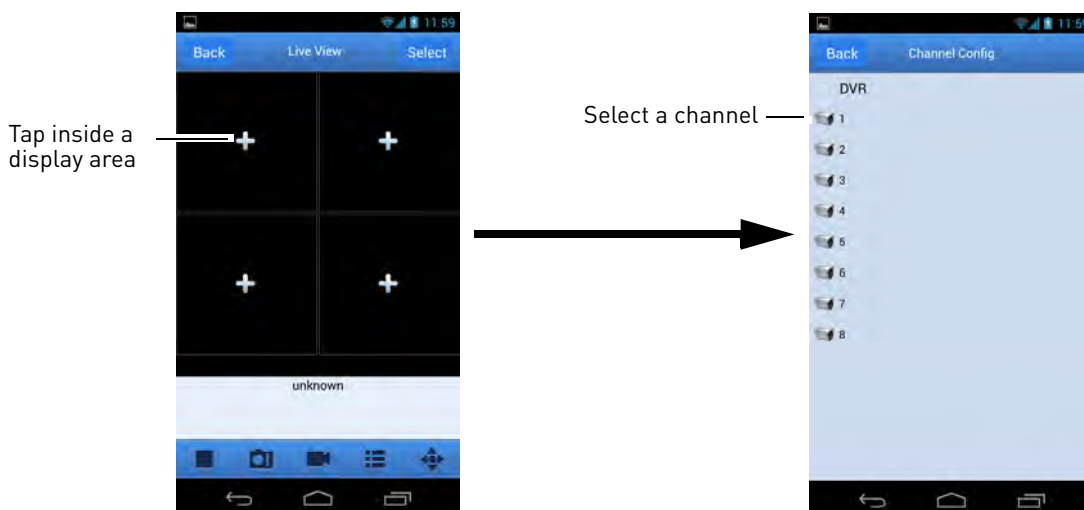

- 14 You will be prompted to change the DVR password. Tap **Confirm**.

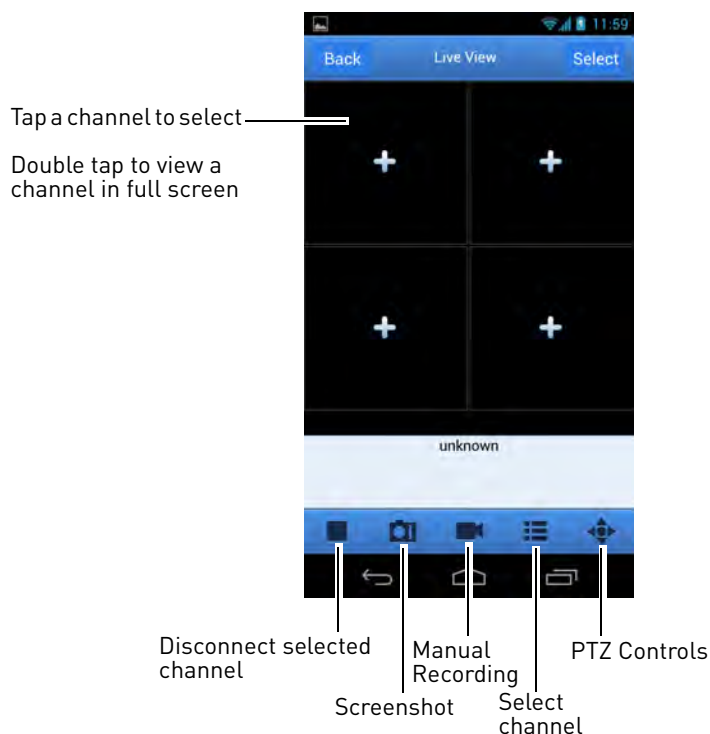

- 15 Enter the new password and tap **Save**. This password will be used to connect to your system from now on.

- 16 Tap inside one of the display areas and then tap **Select**. Repeat for any additional channels you would like to view.

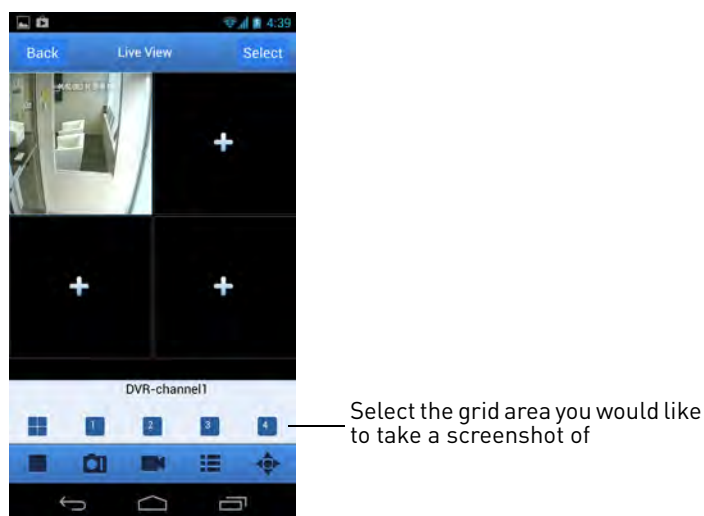

## Lorex ECO Stratus Interface.

### Taking Screenshots

- 1 Tap  during live view or playback.
  - **If taking screenshots from live view:** Select the grid area you would like to take a screenshot from or tap  to take a screenshot from all connected cameras.

- 2 To view screenshots, see “Viewing Screenshots” on page 85.

### ***Taking Manual Recordings***

- 1 Tap  during live view or playback.
  - **If taking manual recordings from live view:** Tap the grid area you would like to start recording on. Tap again when you would like to stop recording.
  - **If taking manual recordings from playback:** Tap  when you would like to stop recording.
- 2 To view manual recordings, see “Viewing Screenshots” on page 85.

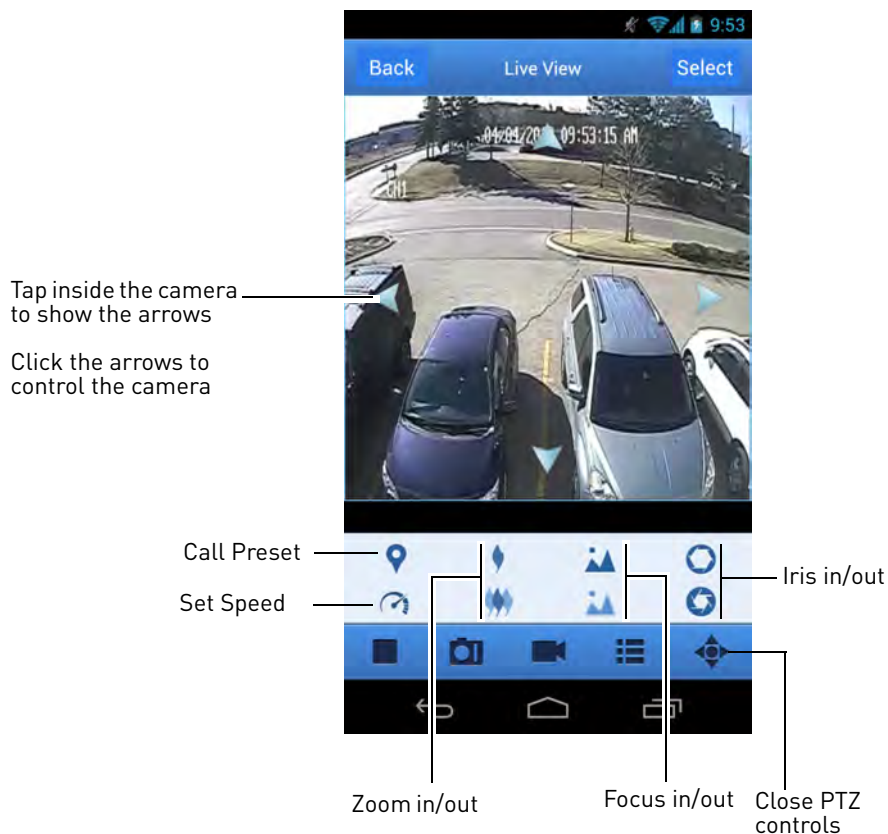

### ***Using PTZ Controls***

If you have a PTZ camera (not included) connected, you may control it using the app.

**NOTE:** You must configure the system to communicate with the PTZ camera locally before you can control it using the app. For details, see “Appendix B: Connecting a PTZ Camera” on page 102.

#### **To use PTZ Controls:**

- 1 Tap the channel with your PTZ camera.
- 2 Tap  to open PTZ controls.
- 3 Double-tap the channel to select it in full screen.
- 4 Use the PTZ controls.

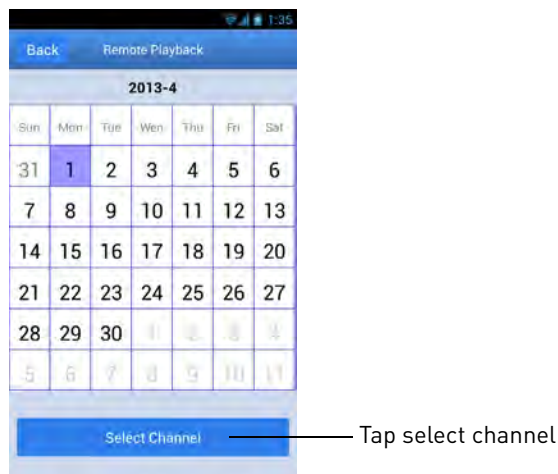

## Using Remote Playback Mode on Android

Remote Playback Mode allows you to view recorded video saved on your DVR's hard drive.

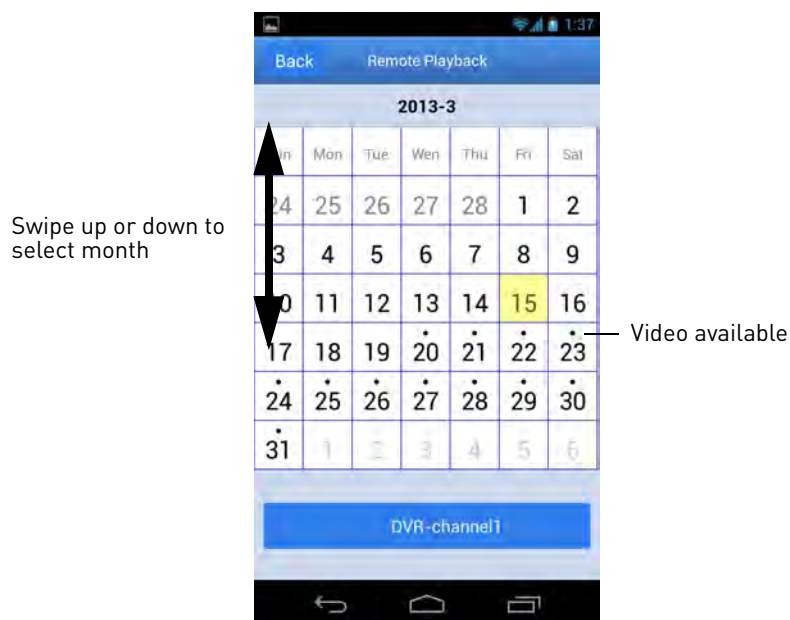

**To use remote playback mode:**

- 1 From the Main Menu, tap **Remote Playback**.
- 2 Tap **Select Channel**. Select the channel you would like to playback from.

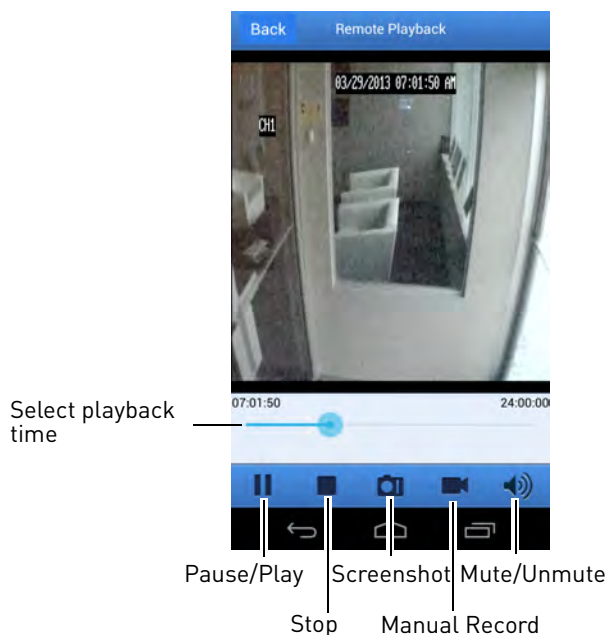

**NOTE:** If you receive the message "No video found," close the app and restart it.

- 3 The calendar shows any days that have recorded video for the selected channel with dots under the date. Tap on a date to view video from that day. Swipe up or down to change the month shown in the calendar.

- 4 Playback begins at the earliest available recordings from the selected day. Use the on-screen playback controls.

## Viewing Screenshots

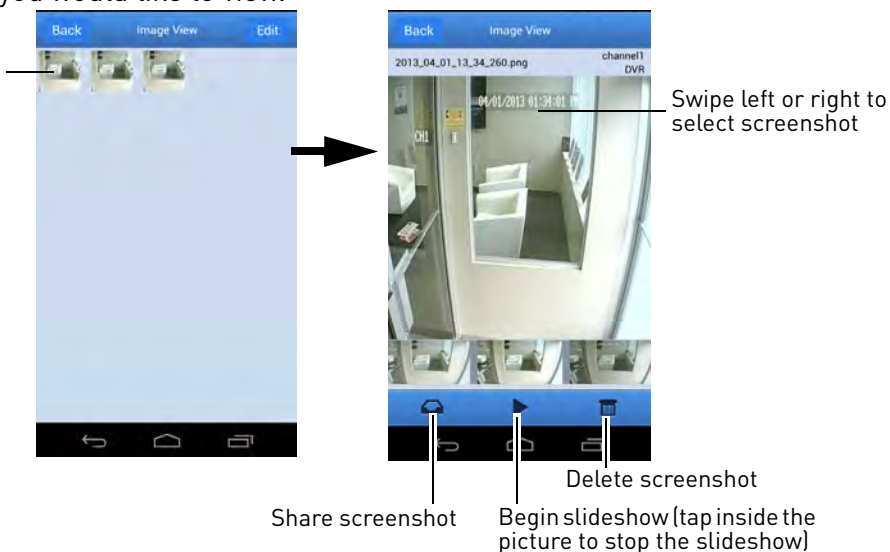

You can view screenshots or share them using the app.

**NOTE:** To share screenshots, you must configure the apps used for sharing. Lorex does not support 3rd party applications.

### To view screenshots:

- 1 From the Main Menu, tap **Image Manager**.
- 2 Select the DVR with screenshots you would like to view.
- 3 Tap the screenshot you would like to view.

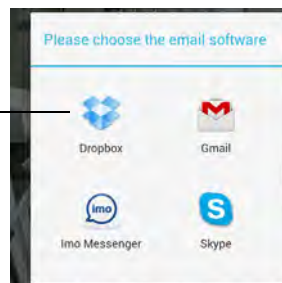

Tap the screenshot you would like to view

**To share screenshots:**

- 1 Tap  to share. Select an app that you would like to share the file with. Follow the app's instructions to share the file.

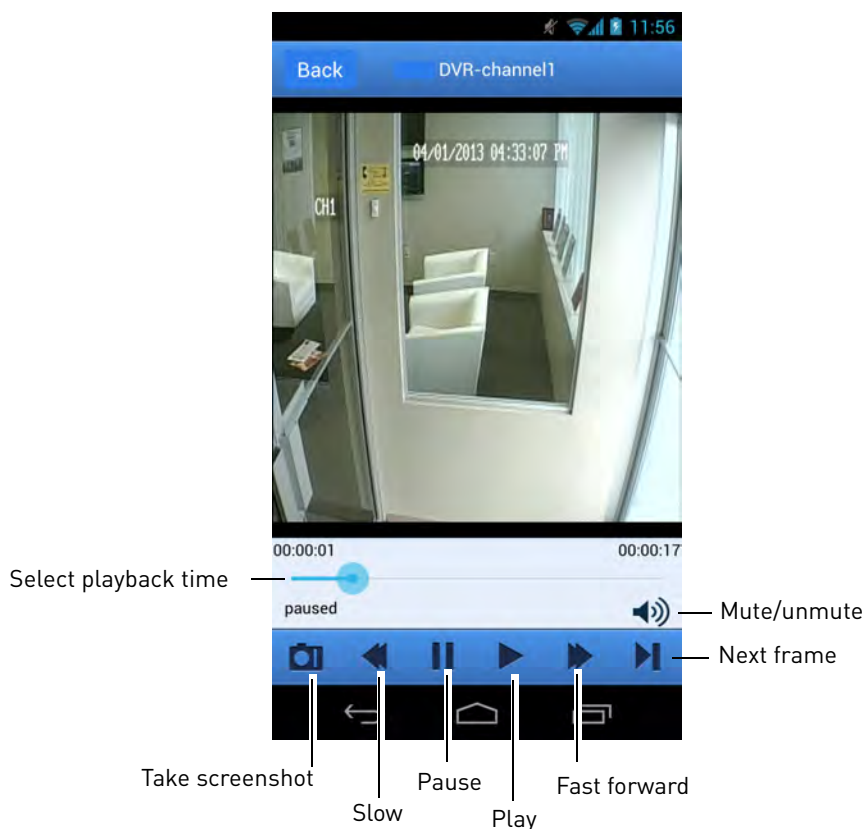

Select the sharing app

**Viewing Manual Recordings**

You can view manual recordings using the app.

**To view manual recordings:**

- 1 From the Main Menu, tap **Record Playback**.
- 2 Tap the DVR you would like to view manual recordings from.
- 3 Tap the recording file you would like to view.
- 4 Use the on-screen controls.

## Using Device Manager to Manage DVR's

You can use the Device Manager to add, delete, or modify your DVR's.

### To delete a DVR:

- 1 From the Main Menu, tap **Device Manager**.
- 2 Press and hold on the DVR you would like to delete and then tap **Delete**.

### To modify a DVR:

- 1 From the Main Menu, tap **Device Manager**.
- 2 Tap on the DVR you would like to modify.
- 3 Change the connection details as needed and then tap **Save**.

# Lorex Player 11: Playing Backed up Video on PC

Lorex Player 11 allows you to view your backed up video files from your DVR on your PC.

**NOTE:** To view backed up video files on Mac, see “Lorex Player for Mac: Viewing Backed up Video on Mac” on page 99.

## Minimum System Requirements

- Intel Pentium 4 or above
- Microsoft Windows XP/Vista/7/8
- 256 MB Ram
- 16 MB video memory

## Prerequisites

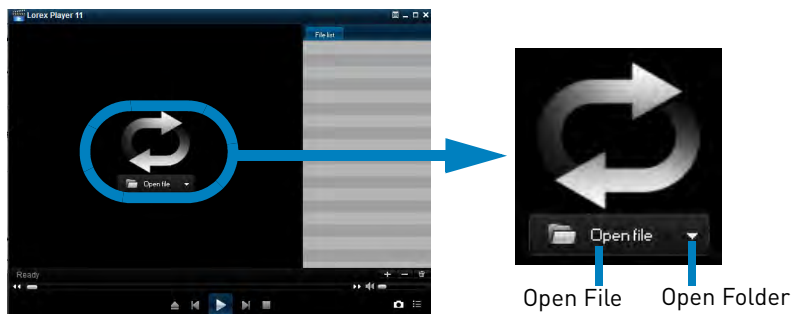

- Back up video files from the DVR to your local hard drive.

## Installing Lorex Player 11

- 1 Insert the software CD that comes included with the system.
  - **OR** download **Video Player for PC** from [www.lorextechnology.com](http://www.lorextechnology.com), under the page for your DVR model.
- 2 Click **DVR Software**→**Lorex Player - PC**. Follow the on-screen instructions to install Lorex Player 11.

## Running Lorex Player 11

- 1 Double-click the Lorex Player 11 (  ) icon on the desktop.
- 2 Click the **Open File** to load a single video file. Click the ▼ button next to it to load a folder with backed-up videos.

- 3 Select the file and click **Open**.
  - If you are opening a folder, click **Add**.
- 4 Double-click the file in the list on the right to begin playback.

## Lorex Player 11 Interface Overview

### About the Advanced Config Menu

The Advanced Config menu allows you to select where the screen captures are stored.

**To open the Advanced Config menu:**

- 1 Click the  button.
- 2 Click **Select** to change the snapshot save folder. Then select the folder and click **OK**.

- 3 Click **OK** to save changes.

# Lorex Player for Mac: Viewing Backed up Video on Mac

Lorex Player for Mac allows you to view your backed up video files.

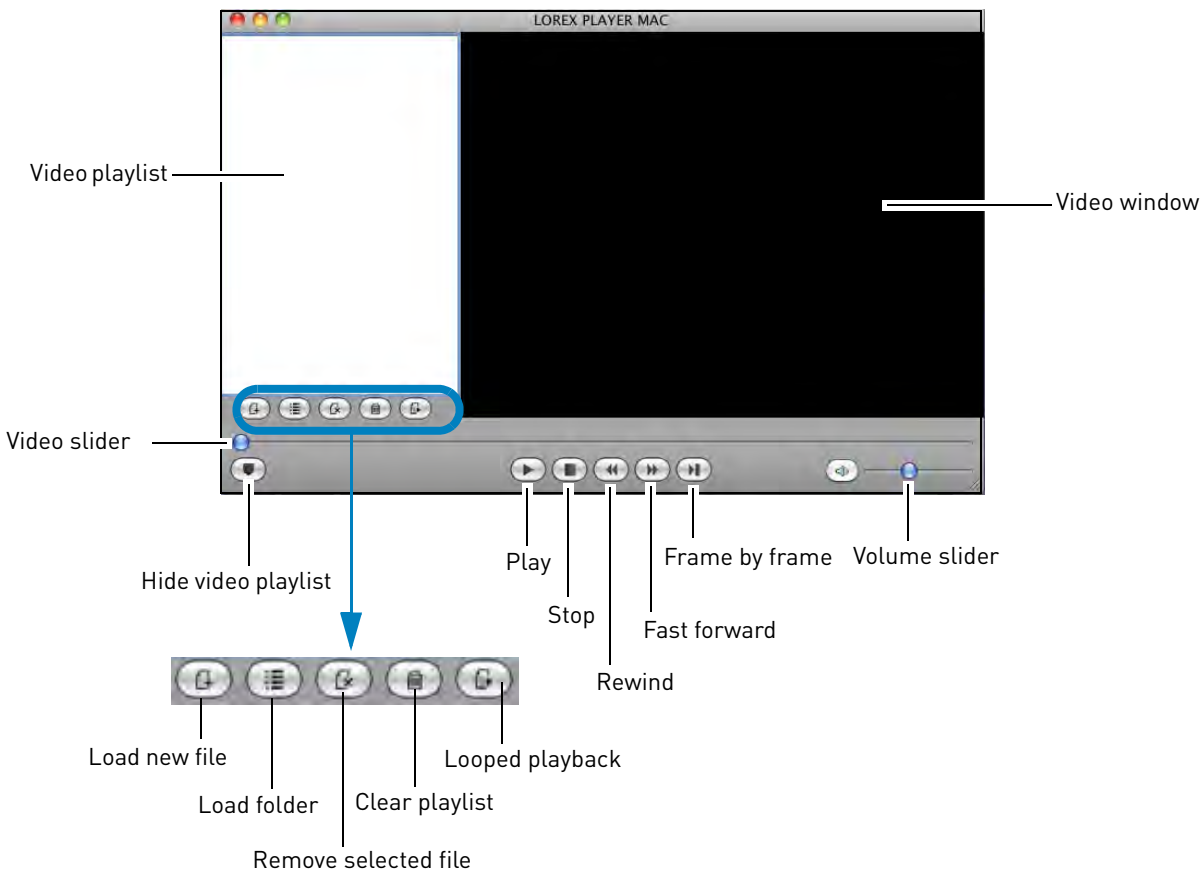

## To install Lorex Player Mac:

- 1 Go to [www.lorextechnology.com](http://www.lorextechnology.com) and search for the model number of your DVR (look at the label underneath your DVR for the model number).
- 2 Navigate to the product page for your DVR model and download **Video Player for MAC**.
- 3 Extract the file and double-click the Lorex Mac Player installer (.pkg) file. Follow the on-screen instructions to install the software.

## Launching Lorex Player Mac:

- Click the Lorex Player Mac icon (  ) in the Dock or in your Applications List in Finder.

## Lorex Player Mac Interface

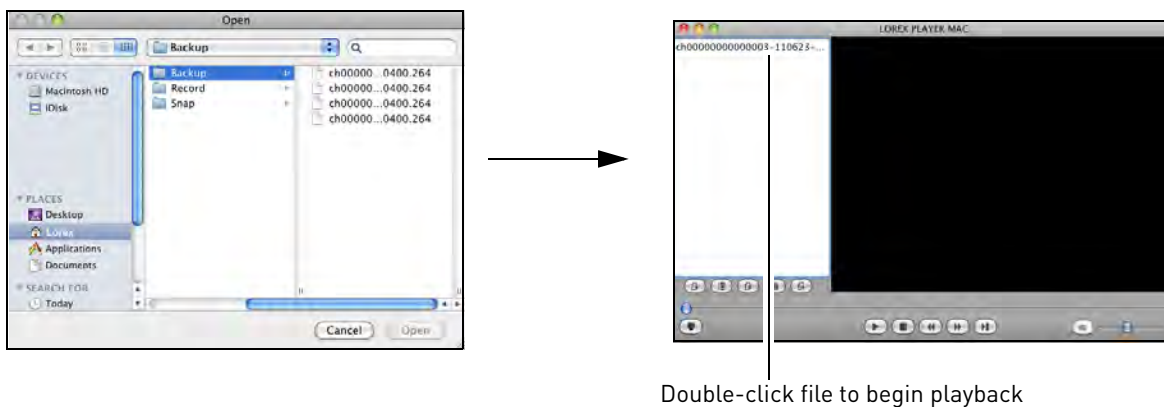

## Loading Individual Video Files

To load files saved onto your hard drive:

- 1 Click the Load new file button (  ).
- 2 Browse and select the desired file. Click **Open** to add the file to the video playlist.

**NOTE:** The default save directory is in your Home folder/dvr.

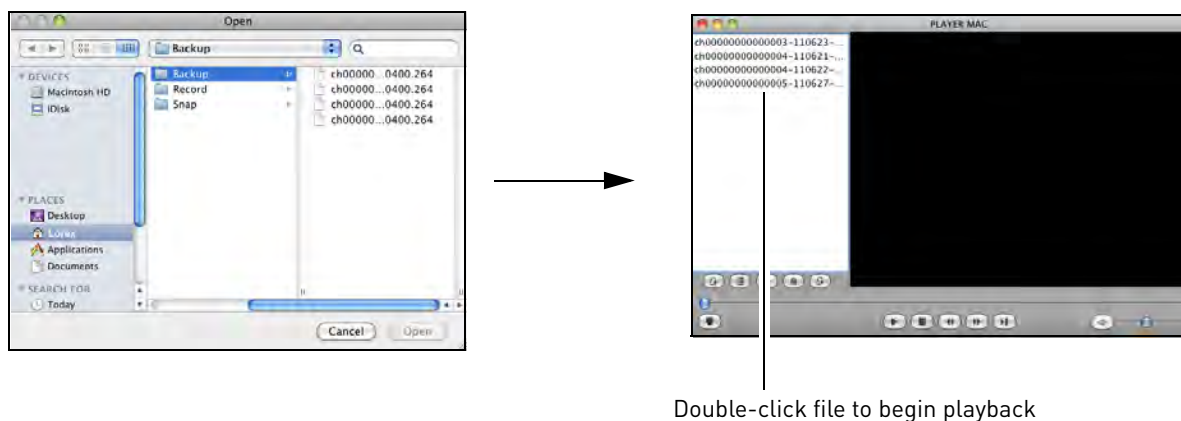

- 3 Double-click the video file in the playlist to begin playback.

## Loading Multiple Video Files

You can load an entire folder of video files.

To load multiple video files saved onto your hard drive:

- 1 Click the Load folder button (  ).
- 2 Select the desired folder you wish to add to the playlist. Click **Open** to add all the videos in the folder.

- 3 Double-click the video file in the playlist to begin playback.

# Appendix A: System Specifications

## SYSTEM

Operating System	Linux (embedded)
Pentaplex	Simultaneous View, Record, Playback, Backup & Remote Monitoring
Number of Channels	<b>4 or 8 Channels</b>

## Inputs/Outputs

Video IN	4 or 8 x 800m Vpp, 75 ohms, HD-SDI BNC
VGA OUT	Yes (simultaneous with HDMI)
HDMI	Video and Audio (simultaneous with VGA)
Audio IN	4 Line in(RCA), CODEC: G.711 (4 ch) 8 Line in(RCA), CODEC: G.711 (8ch)
Audio OUT	1 line OUT (RCA), CODEC: G.711
USB Port	1 at the back for Mouse, 1 at the front for firmware upgrade & USB backup
eSATA <sup>4</sup>	Yes (high capacity backup)
Alarm IN	4 x TTL, programmable as NC/NO (4 ch) 8 x TTL, programmable as NC/NO (8 ch)
Alarm OUT	1x Relay with NO/NC contact; 12VDC/1A, 110VAC/0.5A resistive
Video Output Resolution	800x600, 1024x768, 1280x1024, 1440x900, 1920x1080
PTZ control	RS-485

## Display

Live Display	1 or 4 or 8
Live Display Speed	4 ch: 120/100fps, 8 ch: 240/200fps (NTSC/PAL)
OSD	ON/OFF
Digital Zoom	Live view and playback
System Navigation	USB Mouse, IR Remote Controller, Front Panel
Motion Area Setting	Adjustable grid (30x44) NTSC Adjustable grid (36x44) PAL
Sensitivity levels	8
Firmware Upgrade	Automatic firmware upgrade or via USB
User Authority	By user group (1 x Admin/ 6 x Users)
Time Synchronization	Auto time sync by NTP server

## RECORDING

Video Compression	H.264
Audio Compression	G.711
Recording Resolution	<b>NTSC/PAL:</b> 1080p (1920 x 1080)
Recording Speed	<b>NTSC/PAL:</b> 1080p: 120/100fps 1080p: 240/200fps
Recording Quality Control	3 levels (good/better/best)
Recording Schedule	By hour, by day, by recording mode, by motion, by alarm, by ch
Pre Recording	Max. 8 Secs
Post Recording	Max. 300 seconds
Alarm Recording	Programmable per camera
Reliability	Watch-Dog, Auto-recovery after power failure
Covert Video	Yes

## PLAYBACK

Playback Channel	4 ch: 1, 4 / 8 ch: 1, 4, 8
Playback Speed	Variable Max 16x
Playback Players	Backup Player
Search	By time & event
Multi-time Search	Multi Day/ Hour
Log Search	Up to 4,000 lines for motion detected, configuration changes, connects/disconnects and video loss.
Audio Play	Single camera in full screen mode

## STORAGE & ARCHIVE

Storage	Up to 2 HDD's (SATA)
Maximum Capacity	up to 8TB (2 x 4TB)
Backup Media	USB (Flash Drive & HDD) & eSATA <sup>4</sup>
Backup File Format	H.264 file (AVI generator included)
Watermark	Watermarked video for security

## CONNECTIVITY

Cloud Connection	Loxex Stratus Connectivity
Supported Operating Systems	<b>Windows™ 7</b> <b>Mac</b> OSX Snow Leopard 10.6 or above
Remote Software	Client Software (PC) & Safari 6.0 (Mac)
Email notification	Text with snapshot
Instant Smart Phone Compatibility	Smart Phone & Tablet Compatibility: iPad®, iPhone®, Android (version 2.2 & above)
DDNS	Free Loxex DDNS
System Configuration	Full setup configuration over network
Ports	Web: 80, Client: 9000
Network Protocol	LAN, DHCP, Dynamic IP, DDNS
Network Interface	10/100Base-TX, RJ-45 (4 ch), 10/100/1000Base-TX, RJ-45 (8 ch)
Network Speed Control	17 levels (8/16/24/32/48/64/80/96/128/160/192/224/256/320/348/448/512kb)

## GENERAL

Power Consumption	Approx. 15 watts (no HDD included)
Supply Voltage	100VAC/240VAC, 12VDC, 5A, 50/60Hz
Unit Dimensions (W x D x H)	14.9" / 380mm x 13.3" / 340mm x 1.9" / 50mm
Unit Weight (KGs)	3 kg / 6.6 lbs
Operating temperature	32° ~ 104° F / 0° ~ 40° C
Humidity	10 ~ 90% NC

## RECORDING RESOLUTION - 1080p

### SPEED (FPS - FRAMES PER SECOND)

<b>4ch</b>	Per channel	30fps
	Total	120
<b>8ch</b>	Per channel	30fps
	Total	240

## Appendix B: Connecting a PTZ Camera

You can connect HD-SDI RS-485 PTZ cameras (not included) to the RS485 ports on the rear panel.

**HD-SDI PTZ cameras are required to use PTZ functions. Regular BNC PTZ cameras are not compatible with the DVR.**

**To connect a PTZ camera to the system:**

- 1 Connect the Transmit+ (TX+) Cable to the **+** side of the **RS485** port on the rear panel.
- 2 Connect the Transmit- (TX-) Cable to the **-** side of the **RS485** port on the rear panel.
- 3 Connect the video cable to a BNC port.

8-channel model shown

## Configuring PTZ Settings

Before you can use the PTZ controls, you must enter your camera's PTZ protocol details into the DVR.

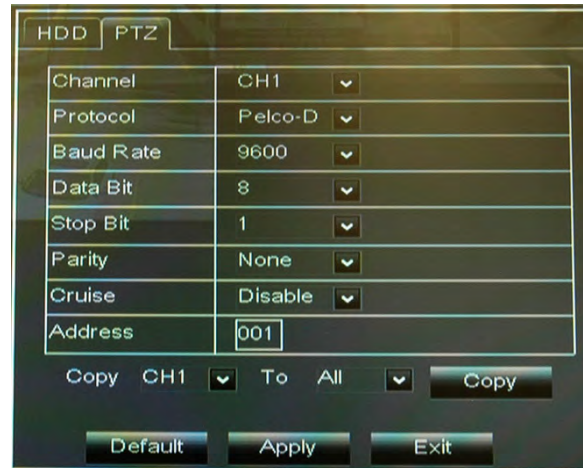

### Prerequisite:

- Obtain the PTZ protocol details for your camera. Check your camera's instruction manual for details.

**To enter PTZ camera settings in the DVR:**

- 1 Right-click to open the Menu Bar and click the Main Menu button (  ). Enter the system password.
- 2 Click **Device** and select the **PTZ** tab.
- 3 Configure the following according to your PTZ camera's specifications:
  - **Channel:** Select the channel the PTZ camera is connected to.
  - **Protocol:** Select from **Pelco-D** or **Pelco-P**.
  - **Baud rate:** Select the PTZ camera's baud rate.
  - **Data Bit:** Select from **5~8** data bits.
  - **Stop Bit:** Select from **1** or **2** stop bits.
  - **Parity:** Select from **None, Odd, Even, Mark** or **Space**.
  - **Cruise:** Select **Enable** to enable PTZ cruise.
  - **Address:** Enter the PTZ camera's address

Use the Copy To drop-down menu to copy the PTZ settings to multiple channels.
- 4 Click **Apply** to save your settings.

**Using the PTZ Menu (Local DVR)****To control the PTZ camera locally on your DVR:**

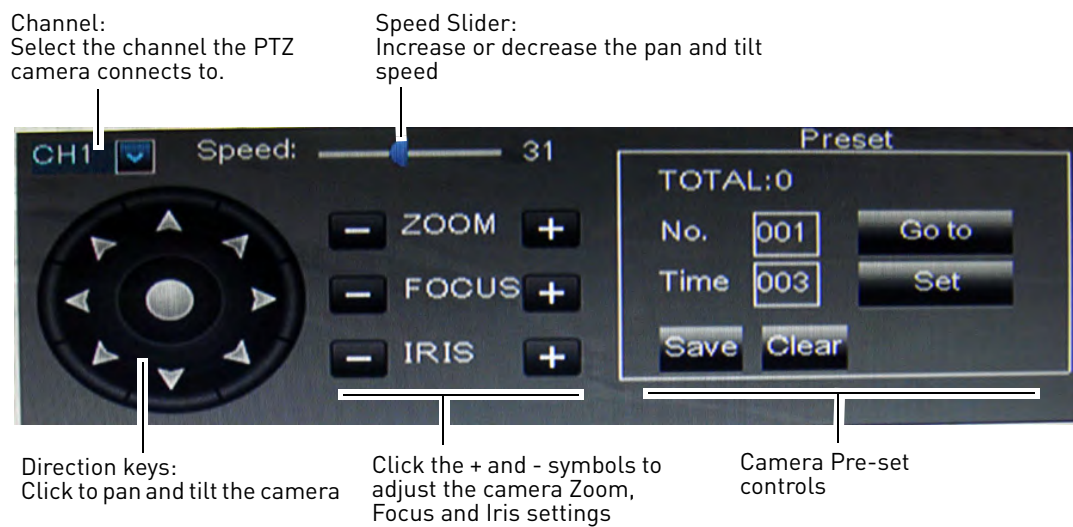

- 1 Select the channel that the PTZ camera is connected to.
- 2 Press and hold the **PTZ** button on the front panel of the system for 6 seconds. Enter the system password. The PTZ menu opens.

**Press and hold for 6 seconds**

- 3 Use the on-screen PTZ controls to control the camera.

## PTZ Presets and PTZ Cruise

You can set preset positions for your PTZ cameras. You can also use PTZ cruise to have the camera automatically cycle through presets.

### Setting PTZ Presets

- 1 Using the PTZ controls, move the camera into position.
- 2 (Optional) In the **Time** field, select the number of seconds the camera will remain in that position during PTZ cruise before going to the next position.
- 3 Click **Set** to set the preset. The Total and No. field will automatically increase. The Total field shows you the total number of created presets, and the No. field shows you the number of the preset you are currently creating.

- 4 Complete the steps above to create additional presets as needed. Press **Save** when you are finished to save all created presets.

### Selecting PTZ Presets

- 1 In the **No.** field, select the number of the preset you would like to select.
- 2 Click **Go to** to go to the preset.

### Deleting PTZ Presets

- 1 In the **No.** field, select the number of the preset you would like to delete.
- 2 Click **Clear** to delete the preset and click **Save** to save your changes.

### Starting / Stopping PTZ Cruise

When PTZ cruise is enabled, the camera will cycle through saved presets. You must set and save presets to use PTZ cruise.

#### To start / stop PTZ cruise:

- 1 Right-click to open the Menu Bar and click the Start Cruise button (). Enter the system password. The camera will cycle through PTZ presets.
  - To stop the PTZ cruise, right-click to open the Menu Bar and click the Stop Cruise button (). Enter the system password.

## Appendix C: Recording Audio

The system can also record audio for up to 4 channels (4-channel models) or 8 channels (8-channel models). You must have audio-capable cameras (not included) or self-powered microphones (not included) in order to record audio on the system.

### To enable audio recording:

- 1 Connect the BNC video cable from the camera to one of the BNC **Video INPUT** ports on the rear panel of the DVR. For example, connect the camera to Video INPUT port 1.
- 2 Connect the RCA audio cable from the camera to the corresponding **Audio INPUT**. Following the example in step 1, you would connect the cable to Audio INPUT port 1.
- 3 Right-click to open the Menu Bar and click the Main Menu button (  ).
- 4 Click **Record** and select the **MainStream** tab.

- 5 Ensure the **Audio** checkbox is checked next to the channel the audio-enabled camera is connected to.
- 6 Click **Apply** to save your changes.

## Appendix D: Replacing the Hard Drive

The system comes with a pre-installed SATA hard drive. You can expand the system with a maximum of two 4TB 3.5" or 2.5" SATA hard drives (for a maximum storage space of 8TB).

**NOTE:** It is recommended to use surveillance or security-certified hard drives, which are designed to be reliable over long periods of time while recording 24/7. Security-certified hard drives are available at [www.lorextechnology.com](http://www.lorextechnology.com)

### Removing the Hard Drive

Make sure that the power cable has been disconnected before changing the hard drive.

- 1 Remove the screws from each side panel (x2) and rear panel (x4) of the cover.

- 2 Gently slide the cover away from the rear panel and lift off. Be careful of sharp edges.
- 3 Disconnect the power and data cables.

- 4 Next remove the hard drive from the housing:
  - If your system has a 3.5" hard drive, remove the 4 screws holding the hard drive bracket and remove the bracket from the DVR. Remove the 4 screws securing the hard drive to the bracket

and remove the hard drive from the bracket. Replace the hard drive bracket and hard drive bracket screws.

Remove hard drive bracket

Remove the hard drive screws

- If your system has a 2.5" hard drive, turn the DVR over carefully. Hold the hard drive in place and remove the 4 screws securing the hard drive. Keep holding the hard drive and turn the DVR back over. Remove the hard drive from the DVR.

Remove the hard drive screws

Make sure to hold the hard drive in place while removing the hard drive screws and turning the DVR to avoid damaging the DVR.

- 5 Replace the DVR cover.

## Installing the Hard Drive

Make sure that the power cable has been disconnected before changing the hard drive.

- 1 Remove the screws from each side panel (x2) and rear panel (x4) of the cover.

- 2 Gently slide the cover away from the rear panel and lift off. Be careful of sharp edges.
- 3 Next, install the hard drive:

- If installing a 3.5" hard drive, remove the 4 screws holding the hard drive bracket and remove the bracket from the DVR. Place the hard drive in the bracket and insert 4 screws to secure

the hard drive to the bracket. Place the hard drive and bracket back in the DVR with the power and data connectors facing the middle and replace the hard drive bracket screws.

- If installing a 2.5" hard drive, place the hard drive over one of the two sets of screw holes with the power and data connectors facing the center of the DVR. Hold the hard drive in place and carefully turn the DVR over. Insert 4 hard drive screws to secure the hard drive. Turn the DVR back over.

- 4 Connect the power and data cables.

- 5 Replace the DVR cover.

## Formatting the Hard Drive

If you replace the pre-installed hard drive, it *must* be formatted in order to function properly with the system.

**ATTENTION:** Formatting the HDD erases **all data** on the hard disk.  
**This step cannot be undone.**

**To format the hard disk:**

- 1 Right-click to open the Menu Bar and click the Main Menu button (  ).
- 2 Click **Device**.
- 3 Click the checkbox under **Select** to choose the drive you wish to reformat.

Select checkbox

- 4 Click **Format HDD**.
- 5 When the warning window appears, click **OK**. Wait for the system to format the hard drive.

**NOTE:** You will notice that the size of the HDD and the free space are not the same. The system uses a portion of the disk space for the operating system and initialization. This is common in all security DVRs as well as computer hard drives.

## Appendix E: DDNS Setup (Advanced)

Free Lorex DDNS service is available as an optional connectivity method to connect to your system over the Internet.

DDNS Service is not required to connect to your DVR, since the system supports the new Lorex Stratus cloud connectivity solution. For details on setting up your system using Lorex Stratus, see “Connecting to Your DVR Over the Internet on PC or Mac” on page 53.

**Remote Viewing Client**

For details on navigating the remote viewing interface, see “Using the PC/Mac Client Software” on page 57.

### Accessing your DVR within a local network (LAN)

You can connect to your DVR using the client software over the local area network (LAN). It is recommended to confirm connectivity over a local network before setting up your DVR for DDNS connectivity.

**NOTE:** To complete the steps below, your computer must be on the same network as your DVR.

**NOTE:** Except where noted, the instructions below are the same for PC and Mac.

#### Step 1 of 3: Connect your DVR to the Local Area Network

- 1 Power off your DVR by turning the power switch to ●.
- 2 Connect an Ethernet cable (included) to the **LAN** port on the rear panel of the DVR. Connect the other end of the Ethernet cable to an empty LAN port (usually numbered 1~4) on your router.

- 3 Turn the power switch to **I** to power the DVR back on.

8-channel model shown

### Step 2 of 3: Obtain the DVR's Local IP Address

- 1 Press the **PTZ/** button on the front panel of the DVR to open the System Information window. If prompted, enter the system user name (default: **admin**) and password (default: **000000**).

- 2 Write down the **IP Address** number of the DVR.
  - A local IP looks something like this: 192.168.5.118. Note that single digit numbers appear as three digits. For example, "005" is the same as "5".

### Step 3 of 3: Connect to the DVR's Local IP Address

Follow the steps below to confirm connectivity over a local network on a PC or Mac.

#### To connect using the DVR's local IP address on a PC:

- 1 Insert the software CD that comes included with the system. Open the CD and click **DVR Software**→**Lorex Client Software - PC**. Follow the on-screen instructions to install.
  - OR, download the **Client Software for PC** from [www.lorextechnology.com](http://www.lorextechnology.com).

- 2 Once installation is finished, double-click the **Lorex Stratus Client 1 icon** () from the desktop. The DVR login screen appears.

— Select IP Login

— Enter IP address

— Enter User Name (default: **admin**)

— Enter Password (default: **000000**)

— Enter Client Port (default: **9000**)

— Click Login

- 3 Under **Login Type**, select **IP Login**.
- 4 Under **IP Address**, enter the **DVR's IP Address** (e.g. *192.168.0.100*).
- 5 Under **User Name**, enter the DVR's **user name** (default: **admin**).
- 6 Under **Password**, enter the DVR's **password** (default: **000000**).
- 7 Under **Client Port**, enter the DVR's **Client Port** (default: **9000**).
- 8 Click **Login**.
- If this is the first time connecting to your system, you will be prompted to change the password. Enter the new password and click **OK**.

— Enter the new password and click OK

### To connect using the DVR's local IP address on a Mac:

- 1 Visit [www.lorextechnology.com](http://www.lorextechnology.com) and download the **Client Software for Mac**.
- 2 Extract the installer file and double-click it to install.
- 3 Open Safari, then click **Safari→Quit Safari**. This resets Safari to complete the installation.

- 4 Open the Lorex Stratus Client (  ) from the Applications list.

- 5 Under **Login Type**, select **IP Login**.
- 6 Under **IP Address**, enter the **DVR's IP Address** (e.g. *192.168.0.100*).
- 7 Under **User Name**, enter the DVR's **user name** (default: **admin**).
- 8 Under **Password**, enter the DVR's **password** (default: **000000**).
- 9 Under **Client Port**, enter the DVR's **Client Port** (default: **9000**).
- 10 Click **Login**.
- If this is the first time connecting to your system, you will be prompted to change the password. Enter the new password and click **OK**.

- Enter the new password in the login screen and click **Login** to connect to the DVR.

## DDNS Setup—Access your DVR Remotely over the Internet

Setting up DDNS connectivity allows you to view your DVR from any computer or compatible mobile device with Internet access.

**NOTE:** Except where noted, the instructions below are the same for PC and Mac.

**To set up remote connectivity with your DVR, you must:**

- 1 Port forward the HTTP and Client ports (default: **80** and **9000**) on your router to your DVR's IP address.
- 2 Create a DDNS account.
- 3 Enable DDNS on the DVR.
- 4 Test the remote connection by entering your DDNS address in a web browser.

## Step 1 of 4: Port Forwarding

You **must** port forward the HTTP and Client ports (default: **80 and 9000**) on your router to your DVR's IP address before you can remotely connect to your system. There are several methods to port forward your router:

- Use the **Lorex Easy Connect Auto Port Forwarding Wizard** (PC only) to port forward the required ports (see [www.lorextechnology.com](http://www.lorextechnology.com) for details). For instructions on how to use the Easy Connect Wizard, see the Easy Connect manual on [www.lorextechnology.com](http://www.lorextechnology.com).
- Manually port forward the required ports on your router to your DVR's IP address by following your router manufacturer's instructions. For more information on port forwarding, see the reference guides on [www.lorextechnology.com](http://www.lorextechnology.com).

**NOTE:** If the above ports are not forwarded on your router, you will not be able to access your system remotely.

## Step 2 of 4: Create a DDNS Account

Lorex offers a free DDNS service for use with your system. A DDNS account allows you to set up a web site address that points back to your local network. This allows you to connect to your system remotely. **You must create a DDNS account in the same network as your DVR.**

**To setup your free Lorex DDNS account:**

- 1 In your browser, go to <http://www.lorexddns.net> and click **Step 1**.

### Lorex DDNS - Remote Viewing Setup

A Lorex DDNS account allows you to connect to your Lorex system from anywhere in the world using an easy-to-remember web site address that is available 24/7. This is perfect whether you have a Static or Dynamic IP address - no matter how often your Internet Service Provider changes your IP address, Lorex's exclusive DDNS service will keep you connected to the things that matter to you most.

To set up Lorex DDNS:

- 2 The My Lorex account login screen opens (if you are already logged in, skip to step 4). Create a new account or log into an existing account. To create a new account, fill in the required fields on the right and click **Create Account**.

**Log in to your Account**

If you have an account with Lorex already, please sign in. If you don't, please create a new account.

Click Save Warranty

- 7 A page pops up to prompt you to register your product for Lorex DDNS. Click **Set Up a New DDNS**.

- 8 Configure the following:

Save

\* Required information

Select your product warranty — Product Warranty\*  
LH338501 — [Activate Warranty](#)

Enter a Device Name of your choice — Device Name\*  
Tom Smith DVR — ?

Enter the product's MAC address — MAC Address (XX-XX-XX-XX-XX-XX)\*  
00-00-00-00-00-00 — ?

Enter the web site address that will be used to connect — URL Request\*  
tomsmith .lorexddns.net ?

[Cancel](#) **Save** — Click Save

- **Product Warranty:** Select the product warranty you created in the previous steps.
- **Device Name:** Enter a name for your device. You can enter your name, business name, or anything of your choice. This is used to identify this device in your list of activated DDNS accounts that appears anytime you visit the DDNS page.
- **MAC Address:** Enter the MAC address of your Lorex product. Press the **PTZ/**  button on the front panel to find your MAC address. A MAC address is a permanent, unique 12-digit address used to identify a device on a network.

- **URL Request:** Enter the web site address that will be used to connect to your Lorex product. For example, if you enter *tomsmith*, the address to access your video will be *http://tomsmith.lorexddns.net*

- 9 Click **Save** to register your product for DDNS. A confirmation email will be sent to the email address used to register for My Lorex.

**You will need this information to enable remote access to your system.** Record your information below:

Domain name/URL Request: \_ \_ \_ \_ \_  
 DDNS User Name: \_ \_ \_ \_ \_  
 Device DDNS password: \_ \_ \_ \_ \_

### Step 3 of 4: Enable DDNS on the DVR

To enable DDNS in your DVR:

- 1 Right-click to open the Menu Bar and click the Main Menu button (  ). Enter the system password if prompted.
- 2 Click **Network** and select the **DDNS** tab.
- 3 In the **DDNS** drop-down menu, select **Enable**.

Select **Enable**

**Domain Name:** Enter Domain name/URL Request  
**User Name:** Enter DDNS User Name  
**Password:** Enter DDNS Device password

Example of entering DDNS information in the DDNS setup menu

- 4 Beside **Server**, select **LOREXDDNS** (default).
- 5 Under **Domain Name**, enter your **Domain name/URL Request** from the confirmation email that was sent after you created your DDNS account.
- 6 Under **User Name**, enter your **DDNS User Name** that was emailed to you after DDNS registration.

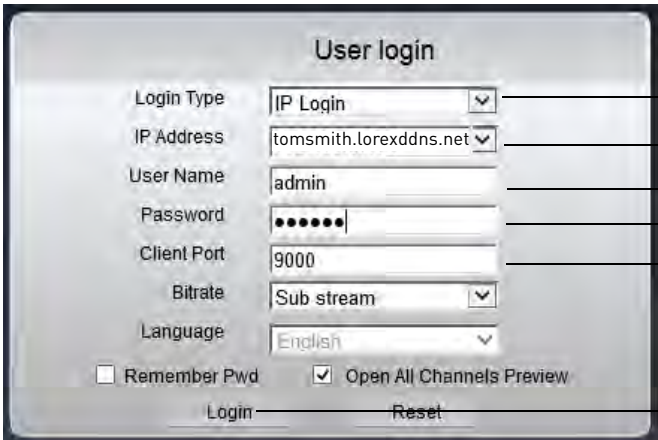

- 7 Under **Password**, enter your **DDNS Device password** that was emailed to you after DDNS registration.
- 8 Click **Apply** to save your settings.

### Step 4 of 4: Connect to the DVR's DDNS Address

**NOTE:** Please allow 10~15 minutes for the DDNS servers to update with your new DDNS address before attempting to connect.

#### To connect using the DVR's DDNS address on a PC:

- 1 Install the Lorex Stratus Client 1 on a remote computer.
- 2 Once installation is finished, double-click the **Lorex Stratus Client 1 icon** () from the desktop. The DVR login screen appears.

The screenshot shows the 'User login' window of the Lorex Stratus Client 1. It contains several input fields and buttons. Annotations with lines pointing to specific fields are as follows:

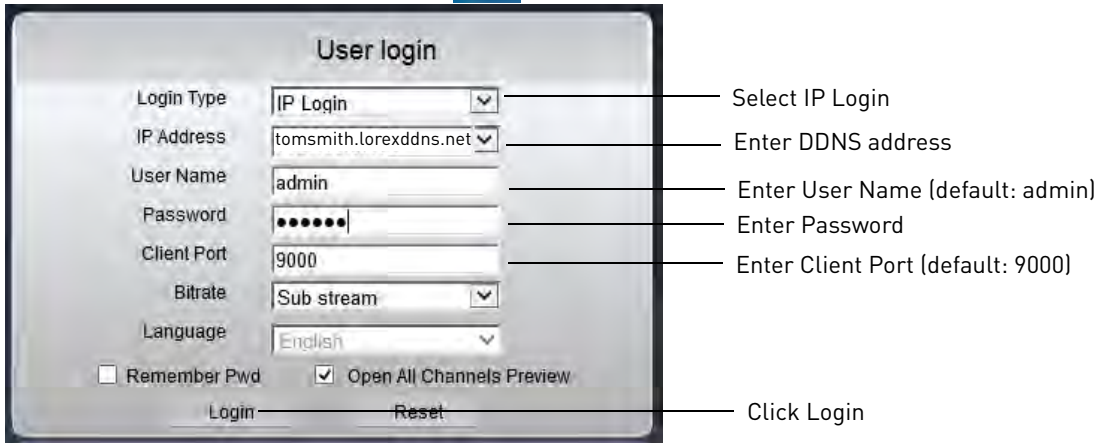

- Login Type:** A dropdown menu set to 'IP Login'. Annotation: 'Select IP Login'.
- IP Address:** A text field containing 'tomsmith.lorexddns.net'. Annotation: 'Enter DDNS address'.
- User Name:** A text field containing 'admin'. Annotation: 'Enter User Name (default: admin)'.
- Password:** A text field with masked characters (dots). Annotation: 'Enter Password'.
- Client Port:** A text field containing '9000'. Annotation: 'Enter Client Port (default: 9000)'.
- Bitrate:** A dropdown menu set to 'Sub stream'.
- Language:** A dropdown menu set to 'English'.
- Remember Pwd:** An unchecked checkbox.
- Open All Channels Preview:** A checked checkbox.
- Login:** A button at the bottom left. Annotation: 'Click Login'.
- Reset:** A button at the bottom right.

- 3 Under **Login Type**, select **IP Login**.
- 4 Under **IP Address**, enter the **DVR's DDNS Address** (e.g. *tomsmith.lorexddns.net*).
- 5 Under **User Name**, enter the DVR's **user name** (default: **admin**).
- 6 Under **Password**, enter the password you created when you connected over the local network.
- 7 Under **Client Port**, enter the DVR's Client Port (default: **9000**).
- 8 Click **Login**.

#### To connect using the DVR's DDNS address on a Mac:

- 1 Install the Lorex Stratus Client on a remote computer.
- 2 Open Safari, then click **Safari→Quit Safari**. This resets Safari to complete the installation.

- 3 Open the **Lorex Stratus Client** (  ) from the Applications list.

User login

Login Type: IP Login

IP Address: tomsmith.lorexddns.net

User Name: admin

Password: •••••

Client Port: 9000

Bitrate: Sub stream

Language: English

☐ Remember Pwd ☒ Open All Channels Preview

Login Reset

- 4 Under **Login Type**, select **IP Login**.
- 5 Under **IP Address**, enter the **Domain name/URL Request** followed by **.lorexddns.net** (e.g. *tomsmith.lorexddns.net*).
- 6 Under **User Name**, enter the DVR's **user name** (default: **admin**).
- 7 Under **Password**, enter the DVR's **password** (default: **000000**).
- 8 Under **Client Port**, enter the DVR's **Client Port** (default: **9000**).
- 9 Click **Login**.

# Troubleshooting

When a malfunction occurs, it may not be serious and can be corrected easily. The following describes the most common problems and solutions. Please refer to the following before calling Lorex Technical Support:

Error	Possible Causes	Solutions
<ul style="list-style-type: none"> <li>System is not receiving power, or is not powering up</li> </ul>	<ul style="list-style-type: none"> <li>Cable from power adapter is loose or is unplugged</li> </ul>	<ul style="list-style-type: none"> <li>Confirm that all cables are connected correctly</li> <li>Confirm that the power adapter is securely connected to the back of the unit</li> </ul>
	<ul style="list-style-type: none"> <li>Power switch is set to OFF (●) position</li> </ul>	<ul style="list-style-type: none"> <li>Confirm that the power switch is in the ON (II) position.</li> </ul>
	<ul style="list-style-type: none"> <li>Cables are connected, but system is not receiving sufficient power</li> </ul>	<ul style="list-style-type: none"> <li>Confirm that the system is powered on (LED indicators on the front should be ON)</li> <li>If the unit is connected through a power bar or surge protector, try bypassing the bar and connecting the power directly to the wall outlet</li> <li>Confirm that there is power at the outlet:                             <ul style="list-style-type: none"> <li>Connect the power cable to another outlet</li> <li>Test the outlet with another device (such as a lamp or phone charger)</li> </ul> </li> </ul>
